

NEW EVIDENCE
IN BRIBE INQUIRY;
NO STATE AUDIT,
BLAIR DECLARES

Tucker, Meanwhile,
Says a Check Is Need-
ed to Inform Public
on Operations of Li-
cense Office.

New evidence has been obtained in the investigation of reported pay-offs and solicitation of bribes in the office of License Collector Joseph T. (Juggy) Hayden, Circuit Attorney Thomas F. Eagleton said today before going to Jefferson City where he attended a conference called by Gov. James T. Blair to discuss the matter.

Gov. Blair, at the conclusion of the conference, announced that the state would not step into the investigation, and that the inquiry should be handled by the circuit attorney's office.

The Governor said he saw no reason to call in an outside auditing agency to check the license collector's books, saying it was the opinion of those at the meeting that the work could be handled by Comptroller John H. Poelcher.

Tucker for Audit.
At the same time in St. Louis, Mayor Raymond R. Tucker called for a complete audit of the license collector's office. He declared such an audit is necessary at this time so that the public will be fully informed as to operations of the office.

"This audit of course will not improve the system," he said. "This audit should be extensive enough to clearly show whether the various taxpayers have paid the full amount due under the merchants and manufacturers tax, when inventories and sales are compared with earnings tax returns."

"As I have stated publicly on many occasions in the past during our efforts to write a new city charter, the present set-up of so-called county offices is not responsible to the Mayor and divorced from civil service. I am therefore, in my administrative practices in relation to the government as a whole."

Others at Talks.
Attending the conference with the Governor and Eagleton in Jefferson City were Attorney General John M. Dalton, who had said earlier that he was ready to step into the investigation if directed by Blair to do so, and State Auditor Haskell Holman.

At the conclusion of the meeting, Gov. Blair said: "Our considered judgment pertaining to this inquiry is that it should be handled by the circuit attorney and his staff, and if the evidence warrants, it should be presented to the grand jury in the regular manner."

The Governor said he was informed the comptroller's office makes a regular monthly audit of all funds charged to and paid by taxpayers to the license collector's office, and there had been no evidence of discrepancies.

Meanwhile, the Post-Dispatch was told that officials investigating the reported pay-offs had received "tacit admissions" from some employees in the office that unspecified irregularities had occurred.

Gov. Blair called the meeting after the Post-Dispatch reported there have been many allegations that some of Hayden's employees solicited bribes and received pay-offs from St. Louis business men seeking reduction of their merchants and manufacturers license taxes.

At least 12 of Hayden's 74 employees are known to police, and several have been convicted of major crimes.

Hayden told a Post-Dispatch reporter today he does not intend to dismiss any of his employees.

CONTINUED COOL WEATHER
PREDICTED FOR ST. LOUIS
IN FIVE-DAY FORECAST

COOLER weather is expected to continue in St. Louis for the next five days, the Weather Bureau said today in its extended forecast.

The forecast is: Considerable cloudiness is expected in the St. Louis area for the next five days, with a chance of light rain or drizzle beginning tomorrow and possibly extending into Wednesday or Thursday; forecast for cool weather through the period with the average to range 2 to 5 degrees below normal; normal maximums are in upper 50s and normal lows 38 to 40.

RUSSIA BREAKS
OFF ARMS TALKS
IN U.N. GROUP

Not Participating in
Subcommittee Work
—Says No Progress
Has Been Made.

By DONALD GRANT
A Staff Correspondent of the
Post-Dispatch.

UNITED NATIONS, N.Y., Nov. 4.—Russia today announced it will not participate any longer in disarmament discussions in the subcommittee of the U.N. Disarmament Commission, as now constituted.

The announcement was made by Vasily Kuznetsov, Deputy Foreign Minister of the Soviet Union, in an address before the Political Committee of the U.N. General Assembly.

"The Soviet Government," he said, "considers that all attempts to make use of the disarmament subcommittee for productive work have been entirely exhausted."

"Under these conditions the Soviet Government does not see any sense in further participation in the work of the Disarmament Commission and its subcommittee. Proceeding from the Soviet Government declares it will not participate in the U.N. Disarmament Commission and its subcommittee in their present composition."

End of Talks Evident.
Since Russia is the only non-Western member of the subcommittee, which also includes the United States, Britain, France and Canada, this action would seem effectively to end subcommittee discussions.

The Soviet Union has asked the Assembly to set up a new Disarmament Commission composed of representatives of all 48 U.N. member nations. The United States opposes this suggestion and is asking for a continuation of discussions in the five-nation subcommittee.

The Soviet action in refusing to participate in discussions on the old basis was not unanticipated, but there had been no warning as to its announcement today. It came after the Soviet Foreign Minister, Andrei A. Gromyko, had left for Moscow.

24-Nation Resolution.
The Political Committee is considering a 24-nation resolution which calls on the deadlocked disarmament subcommittee to reconvene as soon as feasible and give priority to reaching a disarmament agreement that would provide "upon its entry into force" for certain specified steps subject to adequate controls.

These steps are essentially those Britain, Canada, France and the United States proposed to the Soviet Union in the subcommittee's London talks last summer.

They are (1) suspend nuclear tests, (2) stop producing fissionable materials for weapons, (3) start transferring such materials to peaceful uses, (4) cut conventional arms and forces, (5) install ground and air inspection against surprise attack and (6) study an inspection system "designed to insure that the sending of objects through outer space will be exclusively for peaceful and scientific purposes."

Approval of the Western resolution would dump rival Soviet, Indian, Japanese and Yugoslav proposals to stop nuclear tests as the first step toward a disarmament resolution.

A resolution requires only a bare majority for political Committee approval but must get a two-thirds vote in the General Assembly.

Eisenhower, Truman, Sinatra
Make 'Best Dressed Men' List

NEW YORK, Nov. 4 (INS)—

Dwight D. Eisenhower, Harry S. Truman and Frank Sinatra are on the nation's latest list of best-dressed men.

The President was picked by the Custom Tailors Guild of America as the best-dressed man in politics. Harry S. Truman won top honors in the field of statesmen.

Sinatra represented the motion picture field, and Guy Lombardo was called the best dressed in the music industry. Ricardo Montalban, starring in the Broadway musical "Ja-

FLINT COMPANIES
SAID TO HAVE
PAID THOUSANDS
TO BALK UNIONS

Business Men Tell Sen-
ators They Gave
Shefferman Aid
Up to \$2000 Yearly
for 'Entertainment.'

By EDWARD F. WOODS
A Washington Correspondent
of the Post-Dispatch.

WASHINGTON, Nov. 4.—Business men at Flint, Mich., spent thousands of dollars on entertainment of Teamsters union officers as part of a scheme to balk unionization of their employees, the Senate rackets investigating committee was told today.

At least that was the inference the Senators drew from the testimony of several business men who made heavy and continuous payments to George Kamenow, a Detroit representative of Nathan W. Shefferman, a "union buster" and fixer and close friend of Teamster president Dave Beck.

The pattern in each of several operations outlined for the committee by witnesses was this: Teamsters pickets would appear at a Flint company, the management would summon Kamenow; the labor consultant would set a monthly fee for his services, plus \$1800 to \$2000 a year for entertaining the "boys," the Teamsters pickets would disappear and that's the last the employers would hear of the organizing efforts.

"Buying Labor Peace."
Senator John L. McClellan (Dem.), Arkansas, committee chairman, charged bluntly that the employers were buying labor peace. "Senator Karl E. Mundt (Rep.), South Dakota, speculated it would have been cheaper to give the employees a substantial increase than to keep paying off Kamenow."

Robert F. Kennedy, committee counsel, told the employer witnesses no other reason could be given for their expenditures except to prevent unionization.

Kamenow was expected to be heard later today to give his version of his formula for making Teamster pickets disappear as soon as money started changing hands, transactions through which Kamenow, union officers and the company mutually profited, but out of which the employees got nothing.

Max Graff, a Ford dealer at Flint, testified that in April 1954 he received a letter signed by Henry Lower, business agent for Teamsters Local 299 at Detroit, notifying him that the local wished to be recognized as bargaining agent for 10 employees at his company.

Graff said he had heard from other business men at Flint that Kamenow and Labor Relations Associates, the Shefferman labor consulting firm, had been successful in handling such problems of Teamsters and he got in touch with Kamenow.

"Guaranteed Results."
At a conference, he said Kamenow "guaranteed results" in return for \$500 a month, plus \$1800 for entertainment expenses. The first result of the agreement with Kamenow, the witness continued, was that Local 299, of which James R. Hoffa, president-elect of the union, dropped its organizing efforts and turned the job over to a Hoffa lieutenant at Flint, Frank Kierdorf, a Hoffa henchman who is business agent of Local 332.

Next he said, on Kamenow's instructions, he wrote Kierdorf notifying him that Kamenow had been retained to handle the problem for the company, and he never heard from the Teamsters again.

Still Paying Him.
In the three-year period 1954 through 1956, Graff said he paid Kamenow a total of \$9931 in fees and expenses, and still is paying him, though he no longer works for Shefferman.

The expense money, he said, was used in 1954 and 1955 according to Kamenow, to take union officers on a fishing trip to Canada, buy them Christmas presents and pay the expenses of the officers and their families to a union convention at Seattle.

"I see nothing wrong in this," he said.

IMPROVED POWER SOURCES
TOOK SPUTNIK II ALOFT,
RUSSIAN SCIENTIST SAYS

JOHNSON CALLS LAUNCHING ADDS
FOR DRASTIC URGENCY TO U.S.
CHANGE IN U.S. PLEA FOR WEST
MISSILE POLICY TO POOL IDEAS

President and Aids
Analyzing Signifi-
cance of New Satel-
lite — Special Ses-
sion Urged.

WASHINGTON, Nov. 4 (AP)—Senate Democratic Leader Lyndon B. Johnson of Texas said today the second successful Soviet firing of a satellite demonstrates "the real need for drastic changes in our policy."

Johnson indicated, in advance of a conference of three influential Senators with Secretary of Defense Neil McElroy, that the Senate Preparedness subcommittee will make a thorough investigation of missile development activities.

He said he expects the decision whether to make the study will come this week. A staff inquiry was finished Friday, Johnson said.

"The time is come for bold, new thinking in the field of defense and foreign policy," Johnson said.

"The new developments have further confirmed my feeling that we have not done our best in this field. This does not mean we can't catch up with the Soviets. It does mean we have not kept in step with the needs of our times."

President Studying Situation.
The White House said that President Eisenhower and his advisers are carefully analyzing the significance of Russia's new satellite, both in terms of rocketry and scientific advancement.

Johnson, chairman Richard B. Russell (Dem.), Georgia, of the Senate Armed Services Committee, and Senator Styles Bridges of New Hampshire, top Republican on the committee, were scheduled to get a lengthy briefing on missile and satellite developments after a luncheon meeting with McElroy. Bridges, however, was delayed flying into Washington.

Johnson, who heads the preparedness subcommittee, said he believes there is need to "explore the real need for drastic changes in our policies."

"The object of any inquiry with which I am associated will not be to fix blame or put anybody on trial," Johnson said. "The objective should be to determine what steps can be taken to strengthen our position and restore the leadership we should have in technology. The question of who is to blame is far less important than what is to be done."

Johnson declined to comment on reports that if the subcommittee undertakes a full scale investigation it will do most of its work behind closed doors.

Special Session Urged.
Senator Estes Kefauver (Dem.), Tennessee, renewed today his appeal for a special session of Congress to spur the nation's efforts to move into outer space. He suggested a new Cabinet post for "a Secretary of Science." He said the launching of Sputnik II "emphasizes anew that we need something more than a schedule of reassuring speeches by President Eisenhower."

Kefauver said a special session also should be asked "to relax the ridiculous and outmoded security regulations which have the effect of preventing some of the best minds of science from working in the Government programs."

Mrs. Anne Wheaton, associate White House press secretary, said today.

TRUMAN QUIP: 'NEVER
ROOM FOR A REPUBLICAN'

Ex-President Watches Rams,
Bears With Bob Hope.

LOS ANGELES, Nov. 4 (UP)—Former President Harry S. Truman, dapper and jovial, traded wisecracks with comedian Bob Hope and other spectators yesterday at the Los Angeles Rams-Chicago Bears football game here.

Truman was greeted with the usual "Hi, Harry!" shouts when people saw him sitting with Hope and his friend Edwin Pauley. One man greeted him with the query, "Any room for a Republican here, Harry?"

Truman quipped, "There's never any room for a Republican!"

WASHINGTON, Nov. 4 (AP)—Russia's launching of a second satellite added urgency today to the Eisenhower Administration's slowly developing drive for a pooling of western scientific brainpower and greater co-operation among Allied nations.

A new Soviet achievement in outer space flight had been anticipated following the launching of the first satellite a month ago and was somewhat discounted in advance. Nevertheless officials recognized that it afforded fresh evidence of Russia's lead in the missile field—a matter of great military as well as scientific significance.

President Eisenhower was kept informed of Russia's newest satellite but there was no indication yesterday of any stepped-up activity at the White House.

The President was informed of Sputnik II by telephone in his living quarters during the morning, Anne Wheaton, assistant White House press secretary, reported.

Offset by Zhukov Ouster.
The impact of this second rocket triumph on world opinion is offset somewhat by the Moscow announcement Saturday that Marshal Georgi Zhukov had been stripped of all his political authority as well as the position of defense minister which he had lost a week ago.

Officials said privately this removal of one of Russia's top war heroes and greatest military leaders from the ruling group in which he had seemed to be a powerful figure was a convincing proof that the whole Soviet system is subject to great political instability.

Insofar as Russia's military power is concerned, this means the existence of a worrisome element of uncertainty for free world leaders in estimating what course the Soviet Union may follow over even a relatively short time.

Officials also said this fact, together with Russia's progress in missile development, makes it more important than ever for the allied powers to begin moving actively along the line which President Eisenhower and British Prime Minister Macmillan laid down here 10 days ago in a joint communique.

Orbit Not Calculated.
An accurate orbit for the new satellite still had not been calculated today, but residents of the United States were expected to be sighting Sputnik II before long. It is traveling substantially the same pattern as its predecessor, but is taking a little bit longer for each circuit.

Fred L. Whipple, director of the Smithsonian Astrophysical Observatory at Cambridge, Mass., said the new satellite "should be visible very soon as an evening object in United States latitudes."

Whipple said it also should be visible in the morning.

17 PCT. OF DOCTORS
IN SURVEY QUIT
SMOKING SINCE '52

NEW YORK, Nov. 4 (AP)—Medical Times magazine said yesterday its survey of doctor-readers showed that 17 per cent of those who smoked regularly in 1952 have since quit smoking.

Based on a survey of 2122 general practitioners, the magazine said 3 per cent quit to cigars or a pipe, 14 per cent cut down on smoking, 10 per cent increased smoking and 56 per cent reported no change.

On a similar study of about 2500 residence physicians, Medical Times said 20 per cent have quit smoking, 7 per cent have switched to cigars or a pipe, 19 per cent have cut down, 21 per cent smoke more and 33 per cent reported no change.

Personal health factors and displeasure with the habit were the most frequent reasons for quitting, the magazine said. The "possible relationship between smoking and cancer" was given as one factor in a change of smoking habits by 71 per cent of the general practitioners and 74 per cent of the resident physicians.

Some U.S. Scientists Doubt
Dog Will Come Down Alive

Small dog in special container used in Russian rocket tests. A Russian official said that three dogs had been passengers in rockets which were fired 62 miles high last June. Dogs parachuted back to earth in sealed cubicles or space suits without harm.

LAIKA IS NAME
OF DOG, MEANS
LITTLE BARKER

MOSCOW, Nov. 4 (AP)—A spokesman for the State Committee for cultural relations with foreign countries announced tonight the name of the dog aboard Sputnik II is Laika and that it is a female.

Laika also is the Russian word for a breed of dog native to the Far North which is similar in many ways to the Spitz or Pomeranian. It is small, has great endurance and is used in the north for hunting small animals and game birds. The Laika (the word means little Barker) is related to the much larger husky.

The mystery of the dog's name reached the height of absurdity in the last 36 hours. It had been called Kudryavka (Curly), Damka (Little Lady) and Limonchik (Little Lemon). Its sex also had been in dispute.

CODE HEARD ON 'MOON' BAND
TRANSLATES AS 'BOW-WOW'

WARREN, R.I., Nov. 4 (UP)—A ham radio operator reported code coming over the 20-megacycle broadcasting band used by the dog-carrying satellite, enthusiast Newton Kraus said the message came through as he was listening to the satellite's signal last night, but it was the work of a prankster.

The faked coded message: "Bow-wow!"

Woman Outlaw Sought.
PACHUCA, Mexico, Nov. 4 (AP)—Police in the state of Hidalgo are looking for a woman leader of an outlaw gang. They say the well-organized gang, headed by a woman identified as Eufemia Rios, has been raiding ranches and small towns.

Sputnik II Should Be Visible
To St. Louisans in a Few Days

Russia's Sputnik II should be visible in the St. Louis area on its early morning orbit "in a few days," the Smithsonian Astrophysical Observatory at Cambridge, Mass., said today in a telegram to Stuart L. O'Byrne of St. Louis.

O'Byrne is director of "Operation Moonwatch" observers organized here as part of the International Geophysical Year program. They have a battery of instruments atop the Seven-Up building at 1300 Delmar boulevard.

The Smithsonian observatory told O'Byrne that the second Red earth satellite, which has a dog aboard, would make its St. Louis area crossing too late in the morning for viewing tomorrow. It will be more than a week before the evening passage can be seen here, the observatory reported.

Like Sputnik I, Sputnik II can be seen from the earth only in the period of about two hours after sunset and before sunrise, when it reflects

NEW-TYPE FUEL
IN ROCKET OF
NEW DESIGN
IS ANNOUNCED

Americans Had Specu-
lated That Carrier
for Second Satellite
Had Used Improved
Propellant.

LONDON, Nov. 4 (AP)—The Russians announced tonight they used new and improved sources of power in launching their second earth satellite.

American scientists had speculated that a new type fuel was necessary to launch the half-ton satellite into its orbit around the earth.

A top Soviet scientist said in a Moscow broadcast "a multi-stage carrier rocket of a new design with foolproof precision controls had to be used for putting the satellite into its computed orbit."

The scientist, identified only as academician Dikushin, said the Russian launchers of Sputnik II had used "improved new instruments and sources of power."

The Moscow broadcast, based on a dispatch from the official Soviet news agency Tass, said: "The increase in the satellite's size to provide for a large number of measuring and telemetering instruments and even for an animal passenger necessitated the development of improved new instruments and sources of power."

"The new Soviet step into cosmic space is a tremendous contribution to world science."

DOG IN SATELLITE
IS REPORTED WELL

By ROY ESSOYAN
MOSCOW, Nov. 4 (AP)—The Soviet Union reported today that its space-traveling dog was faring well inside the half-ton rocket satellite circling the earth just over 1000 miles out in space.

The Moscow radio said the small, fluffy-haired passenger inside Sputnik II survived the shock of being blasted into space and her breathing, heartbeat and blood pressure were normal.

The Russians reported the dog's general condition seemed satisfactory.

Housed in an air-conditioned casing inside the rocket, the dog hurtled around the earth at a speed of 17,840 miles an hour.

The new satellite was scheduled to be on its 22nd lap around the earth by 5 p.m. today. Sputnik I has been around some 500 times since it was sent up just a month ago.

Signals From Two Radios.
Signals from two radios in the new satellite are sending scientific data about the dog's reactions and space conditions, the Russians said. Monitors around the world picked up the "beep, beep" on one frequency and a hissing sound from another.

As the spectacular achievement signaled the opening of the era of space travel, a Soviet scientist hinted that the dog may parachute back to earth.

Prof. Shevlyakov, a lecturer at Moscow Planetarium, also suggested cautiously that the Soviet Union may have solved the problem of bringing the earth satellite itself back to earth.

Indicative of Russian plans designed to lead to human travel into outer space, the Soviet Communist party newspaper Pravda said Soviet scientists may send apes up in future satellites to study biological effects of space travel.

Pravda added that such rapidly breeding small creatures as rodents, mollusks and insects also may be sent aloft. This, the article said, will give a "good possibility for genetic studies." Apparently it was assumed that by then the satellites could be brought back to earth.

The Russians first announced that Sputnik II, launched at about 7:38 a.m. yesterday (10:38 p.m. Saturday, St. Louis time) was in an orbit reaching 923 miles out. Later this maximum distance was revised to 1056 miles.

Weights 1120 Pounds.
The new satellite weighs 1120.29 pounds and circles the earth in 103.7 minutes, Moscow said. The first Soviet satellite, launched Oct. 4, weighs 184 pounds, has an orbit reaching out 560 miles, moves at 18,000 miles an hour and circles the earth every 96.2 minutes.

Sputnik I, still circling al-

EPPING'S TRIAL OFF UNTIL JAN. 6 BECAUSE HE HAS NEW COUNSEL

Prosecutor Opposes Delay — Move Apparently Surprises Original Lawyer, Who Appears in Court.

By ROBERT H. COLLINS
A Staff Correspondent of the Post-Dispatch.

SPRINGFIELD, Ill., Nov. 4 (AP)—Trial of Edward A. Epping on charges of forgery, confidence game and embezzlement, today was continued to Jan. 6 after Epping disclosed that he had employed new counsel last week.

Circuit Judge DeWitt S. Crow, who granted the continuance on motion of Epping's new lawyer, Robert H. Rice of East St. Louis, sent a total of 46 indictments pending against Epping, who formerly served as executive assistant to imprisoned state Auditor Orville E. Hodge.

The delay was vigorously opposed by State's Attorney J. Waldo Ackerman of Sangamon county. Ackerman told the court that he and his staff were ready for trial and that witnesses had been subpoenaed. There had been no advance warning that Epping, already serving a state sentence for thefts from the state, planned to change lawyers, he said.

Epping's decision apparently came as a complete surprise, also, to his original counsel, Hugh Dobbs of Springfield. Dobbs appeared in court with bundles of legal documents under his arm and later told reporters he had been prepared to try the case.

Switch Explained. Later, asked for an explanation of why he was replaced, Dobbs said: "Epping has the idea he should not have pleaded guilty a year ago to conspiracy. At that time he was acquainted with all the facts and the decision was his."

Epping, an inmate of Menard Penitentiary since September 1956, looked thinner than when he was sentenced to a term of four to five years. He presented a different face to the public than he did during the first days of his involvement in the \$2,500,000 Hodge scandal, a stern mask replacing his former friendly, boyish smile.

Formerly active when talking with reporters, he had only one curt reply to all questions today. It was: "I have nothing to say to the press."

Dobbs, Rice and Epping continued behind closed doors for an hour after Epping was escorted into the courthouse by penitentiary guards. Afterward Hodge's former aid talked long and earnestly in the back of the courtroom with his wife and Rice.

As court convened, Dobbs appeared before Judge Crow and announced his withdrawal. Epping, questioned by the judge, said: "I would like to make it clear I have requested Mr. Dobbs to withdraw. As of Saturday afternoon I sought the assistance of Mr. Rice."

Asks 90-Day Delay. Rice, addressing the bench, asked for a continuance of at least 90 days to prepare for trial.

After unsuccessfully opposing postponement of the two cases set for today, Ackerman requested that 44 other cases, scheduled to be tried next Friday, also be continued.

Judge Crow managed this postponement by first calling the 44 cases for trial Friday. When Rice objected, he ordered the continuance to January.

Epping was remanded to prison and subpoenas for 43 witnesses were continued. Among the witnesses are Hodge, serving a 12-to-15 year sentence at Menard, and Edward A. Hintz, former president of the Southmoor Bank and Trust Co., Chicago, who was sentenced to a lesser term for his part in the conspiracy.

Epping has been described as an agent for Hodge in carrying out a scheme of issuing and cashing fraudulent state warrants at Hintz's Southmoor Bank. The scheme was exposed in July 1956 after persons to whom the warrants were issued revealed they never received the proceeds.

U.S. AUTO SHADES SPUTNIK

MOSCOW, Nov. 4 (AP)—A new American car drew more attention on Moscow's Gorky street yesterday than Sputnik II. The car was parked and about 20 Russians gathered around it for a half hour before it drove off.

Few Russians in downtown Moscow had even heard that Sputnik II had been launched. The announcement came too late for the Sunday newspapers.

Missouri-Illinois Forecasts

Missouri: Cloudy and continued rather cool through tomorrow with occasional light rain or drizzle. Low tonight 33 to 40 in north and in 40s elsewhere; high tomorrow in 40s in north and 45 to 55 in south.

Illinois: Mostly cloudy tonight and tomorrow with chance of some light rain or drizzle in extreme south; a little colder in most sections tonight; low tonight 34 to 42 in north to 40 to 45 in south; high tomorrow 44 to 52.

Conferring on Collector's Office Inquiry

CIRCUIT ATTORNEY THOMAS F. EAGLETON (seated right) at conference with assistants concerning investigation of city license collector's office. They are from left, WILLIAM RUND, JEROME McLAUGHLIN and HENRY J. FREDERICKS, standing behind Eagleton.

Bribe Inquiry

Continued From Page One.

plays who have long police records, or convictions for major offenses. He declared, however, he would fire "any employee mixed up in any of this alleged misconduct."

He said he had questioned all persons employed by him as inspectors and auditors, asking them if they had ever solicited or received bribes. None admitted that they had, Hayden reported.

The license collector said he knew that Daniel McDermott, an auditor in his office, had pleaded guilty in 1946 of embezzling state automobile license funds, but declared "I didn't think he was guilty then, and I don't now."

McDermott, who has been employed by Hayden for about five years, was sentenced in circuit court to serve 30 days in the Workhouse after pleading guilty to a reduced charge of having embezzled less than \$30 in state funds while working as a cashier and clerk in the St. Louis office of the state automobile registration department. He originally was accused of taking \$1288.

Hayden said he put McDermott on his payroll at the request of William Clark, former Democratic Committeeman of the Twenty-first Ward.

Before leaving St. Louis, Eagleton conferred at his office this morning with First Assistant Circuit Attorney Henry J. Fredericks, who is directing the inquiry, and Assistant Circuit Attorneys Jerome M. McLaughlin and William D. Rund, who have been assigned to full-time duty in the inquiry.

The Circuit Attorney said important "new leads" developed by his staff are being investigated fully. He said he is not ready at this time to disclose the nature of this evidence or name any persons involved.

The preliminary investigation, he added, indicates there are a substantial number of cases involving irregularities in the handling of merchants and manufacturers taxes, and that more than one employee in Hayden's office is implicated.

Returns Being Checked. The circuit attorney's office has begun a check of tax returns filed this year by business men and firms. These returns are being compared with returns filed in previous years and with city earnings tax returns.

When any of the returns are questioned, the person filing it and the employee in the license collector's office who handled the matter will be interviewed by an investigator. It was learned that several of Hayden's employees already have been questioned under the procedure.

Eagleton said he discussed the matter yesterday with Gov. Blair, who reached him by telephone in Chicago. The circuit attorney said he reported on his inquiry, and told Blair that he did not think a complete audit of the License Collector's record was necessary, as far as his investigation is concerned.

He said he pointed out that he is concerned with possible violations of the state bribery laws, and not the basic administration and enforcement of the tax law.

Tells of Bribe Attempt.

A former St. Louis business man, now manager of a store in St. Louis county, told the

Post-Dispatch today that he had been approached for a bribe by several Hayden employees about five years ago. He said these employees attempted to "shake me down in a roundabout way."

The man, Erwin S. Lerner, former partner in the old Schneider Clothing Co., said: "My partner and I had an interest in a New York clothing manufacturing firm which paid New York taxes on its product," Lerner related. "We objected when the St. Louis license collector attempted to levy taxes on the same goods."

"Two or three license men visited our store several times to discuss the matter. We explained our position and finally the license men suggested they could save us a lot of aggravation if we wanted them to handle the problem for us."

Lerner said there was no specific talk of a pay-off, but every indication was given that this was what the license inspectors wanted. It was generally known among merchants and manufacturers, he said, that reduction of city taxes was handled in this way by the license collector's office.

Can't Recall Names. Lerner said he could not now recall the names of the men who approached him and that he probably could not recognize them at this late date. Not a great amount of money was involved in the controversy, he said, only about \$400 or \$500.

"I finally settled the trouble by going directly to Mr. Hayden with proof that taxes already had been paid on the clothing we handled. Mr. Hayden, who is the easiest guy in the world to get along with, agreed that I should not pay taxes here."

Lerner said he did not inform Hayden of the attempted shakedown.

In addition to the circuit attorney's inquiry, the Internal Revenue Service will make an investigation of income tax returns filed by employees of the License Collector's office.

This is the usual procedure when the service has any reason to believe that anyone may not have reported all of his income.

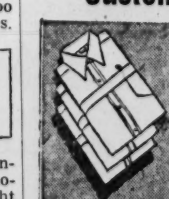

License Collector Hayden, who was elected to the office in 1950 and re-elected in 1954, told the Post-Dispatch that he had hired many of his employees on recommendation of Democratic ward politicians and organizations.

Hayden, Democratic committeeman of the Third Ward, said he did not accept all those recommended by his political allies, but that he did not check the backgrounds of those he appointed.

'Fault Lies With Law.' Hayden's predecessor in office was the late Frank A. Britton, a Republican. At the time of his death, March 20, 1952, Britton was awaiting trial in United States district court on a charge of failure to file federal income tax returns in 1948 and 1949, during which years the Government contended his income totaled \$51,205.

Meanwhile, John M. Bowlin, a real estate dealer who was chairman of the Merchants and Manufacturers Tax Equalization Board in 1955 but declined to serve on it last year because he felt efforts of board members to bring about equal application of the tax law were frustrated, said "the whole fault lies with the law."

5 YOUTHS SAID TO ADMIT PART IN 40 CRIMES

Attacks on V.P. Parade Spectators, Purse Snatchings, Other Thefts Cleared Up.

Five youths, ranging from 15 to 17 years old, have admitted participation in about 40 cases of strongarming, theft from automobiles, purse snatching, as well as attacks on Valedictorian parade spectators last Oct. 2, police said today.

Three of the five arrested are 17 years old. They gave their names as Fred and Ed Jackson, brothers, and Clifton Latson, all of the 4900 block of Maple avenue. The other two boys are 16 and 15 years old. The Jackson brothers denied participating in attacks on the parade spectators.

Their arrests followed the capture by police Saturday night of Roland Lovings, 17, of the 1400 block of Cora avenue. Lovings, fleeing with three companions after a newsboy had been robbed of \$3.45 near Taylor and Fairfax avenues, was carrying a clipping of a newspaper account of the attacks on the parade viewers.

Questioning of Lovings and the other boys, two of them 16 and one 15 years old, resulted in the roundup of the second group.

Police said the 15-year-old boy arrested Saturday admitted that he and companions had robbed 20 newsboys snatched five purses from women and stole articles from six automobiles during the last 12 months.

Lovings was released nine months ago from Missouri Hills training school, where he had been sent on charges of burglary and incorrigibility, police said.

He and his three companions were caught by Patrolmen Leo Schonhoff and Vernell Fuller who saw the youths running and commandeering a passing car to overtake them. The newsboy who had been robbed a few minutes earlier, Leonard Weathersby, 1223A Walton avenue, identified the four as his assailants. Weathersby said one youth held him while the 15-year-old boy took his money.

Police continued questioning of the nine youths today. Those under 17 were booked suspected of violating the juvenile code through strongarming.

A warrant charging Lovings with larceny, based on the robbery of the Weathersby boy Saturday, was issued by the Circuit Attorney's office yesterday.

In another case six holdups or attempted holdups were solved after an 18-year-old youth was caught by two alert policemen in an attempted

Flying Object, 'Lit Up, Shaped Like Egg,' Frightens Texans

Passed By With 'Great Sound and Rush of Wind,' and Stopped Auto Engines, Some Say.

LEVELLAND, Tex., Nov. 4 (AP)—Reports of an unidentified object which witnesses said flew around with a "great sound and rush of wind" and stopped automobile engines had officials and the public puzzled today.

Peace officers checking areas where landings were reported were unable to find any trace. Reese Air Force Base officials here declined to say whether an investigation was being made.

Pedro Saucedo, a farm hand here, told officers and newsmen: "I was driving out to a farm near the Pettit community (west of here, Saturday night) with a friend, Joe Salaz, when we first saw the thing. We first saw a flash of light in a field to our right, and we didn't think much about it at first."

"When it got near, the lights of my truck went out and the motor died. I jumped out of the truck and hit the dirt because I was afraid. I called to Joe, but he didn't get out. The thing passed directly over my truck with a great sound and a rush of wind. It sounded like thunder and my truck rocked from the blast. I felt a lot of heat. Then I got up and watched it go out of sight toward Levelland."

Saucedo, a Korean war veteran, said it was "torpedo shaped" or like "a rocket," but much larger.

Ronald Martin, a Levelland robbery of a service station early today, police reported.

The robber, who identified himself as George Davis, living in the 2900 block of Lawton boulevard, was arrested in the station, at 4216W Natural Bridge avenue, after the attendant saw the officers outside, ran to them and shouted for help.

Patrolmen Edward A. Thorne and Glennon F. Johnson, cruising near Clarence avenue and Natural Bridge, saw Davis in an outside telephone booth and decided he would bear watching. They drove around the block and on returning noted he had gone.

Searching the area, they saw him in the filling station and pulled in front of the building. The attendant, Otto Aton, said the man first ordered brake fluid and paid \$1.97 for it, then put his hand in his pocket as if holding a weapon and demanded money.

The officers, searching

truck driver, said his truck engine died and the lights went out "when a big ball of fire dropped on the highway" east of here early yesterday. Martin said the object changed to a bluish green color when it settled on the highway, then changed to a fireball again when it rose straight up and disappeared.

Newell Wright, a Texas Tech student from here, reported a similar occurrence also east of Levelland.

Police Patrolman A. J. Fowler said Saucedo and about 14 others who called in reports of the object sounded upset and in some cases terrified.

"They seemed to agree that this something was 200 feet long, shaped like an egg and was lit up like a big fire, but looked more like neon lights," he said. "They said it was about 200 feet in the air, and when it got close car motors and lights would go off."

Sheriff Weir Clem said he saw a brilliant light in the distance but did not get close enough for a good look. Highway patrolman Lee Hargrove and Floyd Cavin reported seeing similar flashes in the sky in about the same area and at the same time as Clem. All were riding in separate cars.

There also were reports of an unexplained light in the sky far across the state between Sherman and McKinney. Other sightings were reported around Amarillo, far to the north.

In Washington the Air Force said it has sent an investigating team to question witnesses who reported seeing the object.

Davis, found he had a toothbrush holder in his pocket. He at first denied the attempted robbery, then admitted it and six others, all since Oct. 23, police said.

They were service stations at 3900 Natural Bridge, 2901 Natural Bridge, 3002 North Florissant avenue, Thirteenth street and Cass avenue and 2700 Union boulevard and a sandwich shop at 1927 North Grand boulevard.

The jurist, who has two dogs of his own and says he cannot accommodate another, later found a friend willing to accept the puppy.

\$1000 FIRE AT ARENA RINK

Fire resulting from an overheated basement oil burner caused damage estimated at \$1000 early today in a bowling alley and roller rink in a building adjoining the Arena, at 5740 Oakland avenue.

The fire was discovered by a night watchman who saw smoke coming from a boiler room.

BOMB HOAX CLEARS LEMAY HIGH SCHOOL

600 Students Evacuated After Telephone Caller Gives Warning.

About 600 students were evacuated from Hancock High School, 223 West Ripa avenue, Lemay, today after St. Louis county police received a tip that a time bomb had been placed somewhere in the school building.

The tip, which county police classified as a probable hoax from the beginning, was received by Mrs. Dora Mahoney, police switchboard operator, shortly after 1 p.m. Police notified the school principal, Arthur F. Langehennig, and sent six officers to investigate.

A routine fire drill was called at the school and the students filed out in perfect order, Hancock Superintendent James Lindhurst told the Post-Dispatch.

Lindhurst estimated the students were outside their classrooms about 25 minutes while a search of the premises was made. A master key was used to open all lockers, but nothing resembling a bomb was found.

Mrs. Mahoney described the voice of the bomb-scare caller as that of an adult male person. He said the bomb was set to explode at 1:45 p.m.

DOG HAS DAY IN COURT, GETS A NEW HOME

A fan and white mongrel puppy, apparently homeless, had the good fortune to end up, not in putnik, but in Judge David W. FitzGibbon's Court of Criminal Correction today, and it shortly had a new home.

Percy Grandberry, the judge's messenger, discovered the animal in the courtroom in the Municipal Courts building before the judge arrived. Judge FitzGibbon said he did not know whether the pup had wandered in by itself, or had been put there by someone aware of the judge's love for dogs.

The puppy was taken to the judge's office, fed a meal of hamburger and permitted to sleep on a couch while Judge FitzGibbon presided in court. The jurist, who has two dogs of his own and says he cannot accommodate another, later found a friend willing to accept the puppy.

U.S. Reaction

Continued From Page One.

begin making morning passes over the United States "in a few days."

Like Sputnik I, it will be observable to the naked eye only during morning and evening twilight hours, scientists said.

Scientists and radio amateurs began picking up the now-familiar beep-beeps shortly after Sputnik II was launched. The new satellite was transmitting on the same frequencies as Sputnik I did—20 and 40 megacycles.

Sputnik I still is circling the earth on a lower and faster orbit. The batteries in the original satellite died about three weeks after it went up.

Headquarters of Operation Vanguard, the United States satellite program, said it was getting reports of strong, clear radio signals from the new satellite.

In London, British scientists Kenneth Gatlund, vice chairman of the British Interplanetary Society, called the Russians' accomplishment "simply fantastic."

"It must mean the Russians could land a rocket with a sizeable payload on the moon tomorrow," he said.

Since the satellite itself weighs half a ton, he added, the rocket that launched it must weigh at least 500 tons.

"There is no way of cheating on that, unless the Russians have developed some new chemical fuel or a nuclear propulsion system. In any case they must be even farther ahead than we thought," he said.

Dr. John P. Hagen, director of the United States earth satellite program, found the weight of the half-ton satellite less astonishing than some of his colleagues did.

"It doesn't surprise me," Hagen said, "that they were able to put that weight into orbit since they must have done the same thing before with their first satellite and the

easing and the satellite were

Hagen said "the thing is, we don't know how much of all their weight represents the third stage rocket casing alone and how much of it represents the satellite and its scientific equipment."

Dr. Hagen, director of Project Vanguard, the United States satellite program, said he saw no immediate likelihood of a change in United States plans which call for launching the first American space satellite next spring.

"I think," Hagen said, "we should pursue our own program which is a thorough and well-thought-out project. Then at the end of the International Geophysical Year (Dec. 31, 1958), we can take stock and see just which country has achieved the most scientific results."

Scientists Satisfied.

Hagen said American scientists are quite satisfied with their own progress in the satellite field and are confident they can get their own satellites into orbit on schedule.

That schedule calls for launching a series of six-inch globes next month, which may be the first to assume orbits.

The first fully instrumented satellite is expected to be sent into an orbit in March.

Dr. Homer Newell, a satellite expert for the Navy, when asked about the significance of the experiments with a dog in the latest satellite, said "apparently they are designed to see whether the dog can live or not."

He said that while the chamber in which the dog is riding is described as air-tight, cosmic rays "would go right through the material of a satellite."

Some Heat in Interior.

He also said that meteorites could get right through the satellite, but the large ones are known to be very rare.

The scientist added that the sun's rays would heat up the surface of the satellite—and that there would be some conduction of heat into the interior.

He said the Russians know that a dog could not live under heat and other conditions that will prevail on the outside of the satellite in space.

"The question to be answered by the experiments," he said, "is this: Can you build a chamber so that conditions that the dog requires (for life) will remain in a reasonable range (inside the chamber)."

He said that apparently one of the key studies would be to "study the physiological and psychological effects of 'weightlessness' on the dog"—that is, the effect of being removed from the earth's gravitational pull for a time.

Sputnik II

Continued From Page One.

though its radio now is dead, is a globe sent aloft by a three-stage rocket. Two pieces of the rocket apparently still are orbiting with the satellite.

The second satellite, described by the Russians as "the last stage of the carrier rocket," apparently is shaped like a rocket. Moscow said no other parts of the rocket trail it.

Both baby moons travel at an angle of 65 degrees to the equator.

One Moscow broadcast said the new satellite was built to orbit longer than its predecessor.

The second satellite was given a greater velocity in its flight at the time of reaching its orbit, with a view to prolonging its life," the broadcast said.

Frequencies of Signals.

The two radios send on frequencies of 40,002 and 20,005 kilocycles with wave lengths of about 7.5 and 15 meters respectively. Beeps on one of the frequencies were heard in Tokyo 23 minutes after the first Moscow announcement.

The beep lasts three tenths of a second and is followed by a pause of the same length.

A. A. Blagonravov, one of the Soviet Union's top scientists, said the hissing sound on the second frequency provides information about the dog's condition.

The scientist hinted that the dog eventually may be ejected from the satellite to parachute back to earth. Blagonravov indicated a means might have been devised to assure the dog's safety in dropping.

The dog is being fed artificially and has instruments attached to her body to record and transmit information about breathing, heart action and blood pressure, the scientist said.

He added that the dog is housed in a separate, air-conditioned container inside the satellite.

The official announcement of the second satellite launching said in part:

"The second artificial satellite carries instruments for studying solar radiation in the short wave ultra violet and X-ray regions of the spectrum, instruments for cosmic ray studies, instruments for studying the temperature and pressure, an airtight container with an experimental animal (a dog), an air-conditioning system, food and instruments for studying life processes in the conditions of cosmic space, measuring instruments for transmitting the results of scientific

measurements to the earth, two radio transmitters operating on frequencies of 40,002 and 20,005 kilocycles (wave length of about 7.5 and 15 meters respectively) and the necessary power sources."

Dog Has Been Trained.

The first living space traveler is believed to be one of several dogs which had been sent up in rockets and parachuted to earth in training for the satellite launching.

The Moscow broadcasts said information gathered by the new baby moon will make more understandable to man "the unfathomable natural processes going on in the cosmos."

The studies are being made in conformity with the International Geophysical Year program, an announcement said.

But the Moscow radio also declared that the dramatic assertion of Soviet scientific and technical progress was dedicated to the fortieth anniversary of the Bolshevik revolution, to be celebrated here Thursday.

A Soviet scientist, Prof. G. A. Chebotarev, said in a radio interview that there is a real prospect that man will reach the moon "in our time."

This can be accomplished, he said, if the speed of the two earth satellites can be increased from five miles a second to seven miles, which would enable an object to escape the pull of the earth's gravity.

Labor Racket

Continued From Page One.

hiring experts in the labor field," McClellan commented, "but what has developed here is a pattern of payoffs to union officials without regard for the rights of the workers."

It is apparent that is what Kamenov was employed to do for these companies.

He added that the employers might have gone into the deals with Kamenov innocently, as they claimed, but they could not have been in them very long and remain innocent of what was taking place.

Chester Shagane, operator of a wholesale electrical supply firm at Flint, testified that in

1954 when Teamsters started picketing his company he called in Kamenov and made a deal for his services for which he and another Teamster-thrashed firm, the Royale Co., agreed to pay \$100 a month each with the understanding that Kamenov would get \$2000 more if he was successful in removing the pickets.

Pickets Disappeared.

The witness said that Kamenov reported he needed the \$2000 to "take the boys to the Rose Bowl game." He said that shortly after he hired Kamenov and agreed to pay the \$2000 the Teamsters pickets disappeared.

Donald Skaff, officer of a rug company at Flint, told the Senators he contacted Kamenov after Kierdorf demanded that he sign a contract with Local 332 and refused to agree to an election to determine whether the teamsters actually represented the employees.

Rough Treatment.

Before hiring Kamenov, however, the Skaff company endured some rough treatment at the hands of unknown parties, including stench bombings, smashed windows, a fire, and other violence.

With union Teamsters refusing to make deliveries at his plant because of the pickets, Skaff said he started using his own trucks to pick up his merchandise at the railroad station. The result of this strategy, he said, was that five men beat one of his drivers and tried to run over him with an automobile owned by Local 332.

Skaff said he placed in the gasoline tanks of six of his trucks, immobilizing them.

Skaff said neither the police nor the Michigan State Mediation Board would help him and he was about to go out of business when he made a deal with Kamenov in July 1956, at the rate of \$75 to \$100 a month plus \$2000 a year expenses. He said he never heard from the Teamsters again.

Skaff testified that Kamenov collected the expense money as a check for \$1998 made out by Skaff to Trans-World Airlines. He said that Kamenov told him he was using the money "to take some people on a trip."

He said he still is making

monthly payments to Kamenov, though they seldom confer.

Snyder Fails to Appear.

By the Associated Press.

Zigmund (Ziggy) Snyder, Detroit Teamsters officer, failed again to appear before the committee.

Chairman John L. McClellan (Dem.), Arkansas, called Snyder's name three times but Snyder was not in the hearing room.

"Let the record show that he did not appear," said McClellan. "The matter will receive the further attention of the committee in due course."

McClellan said Saturday that contempt proceedings would be brought against Snyder if he failed to respond to the subpoena. The subpoena was served on Snyder last Thursday with instructions to report "forthwith."

Committee agents had sought Snyder for weeks for questioning in connection with the investigation of the affairs of Hoffa, Teamster president-elect.

McClellan said that Shefferman and his son, Shelton Shefferman, have been called to testify tomorrow in the windup of the inquiry into their activities. He said he hoped to conclude their testimony not later than Wednesday.

Then the committee, investigating improper practices in the labor-management field, plans to recess until Nov. 12 when it will start hearings involving what McClellan called management-union "collusion" in the New York City garbage collection business.

Abe Schrieber, president of the Royale Co., testified that he paid Kamenov \$100 a month through 1954, 1955 and 1956 and part of this year, but in addition, gave him \$2000 in 1954 and 1955 "to take the boys to the Rose Bowl game."

He said that in 1956 he balked at another \$2000 payment for the football game and settled with Kamenov for \$500.

Denies Using Term 'Blackmail.'

He denied that he ever had used the term "blackmail" in discussing the payments with committee investigators and insisted the payments were for "services."

"I can't understand you business people telling us things

like that," Senator McClellan commented. "You paid \$2000 twice to send teamsters officials to the football game and you paid it to keep the union away from your plant."

Emil Salay, head of a sausage company at Flint, told Senators that after he hired Kamenov for about \$2500 to \$3000, pickets assigned to his plant disappeared and he got a "good contract" with wage scales of just what he proposed paying. He said he engaged Kamenov during negotiations with the union at a time when he considered the union demands too high.

In 1956, the witness went on, just after the watered down wage scale was agreed on, Kamenov presented him with a bill for \$2177.42 which, he said, was "for the boys' entertainment on a yachting and fishing trip over the July 4 weekend."

BOY, 16, KILLS TROOPER, DISARMS TWO, SURRENDERS

READING, Pa. Nov. 4 (AP)—State police said a 16-year-old boy disarmed and handcuffed two troopers and killed a third when they attempted to arrest him in a wooded area near here yesterday.

Killed by a shotgun blast in the forehead fired at point blank range was trooper Philip Melley, a plainclothesman who was to retire next month after 20 years with the state police.

State Police Capt. Reese L. Davis said the boy, William Clayton Henderson, ran into woods near his home after a dispute with his parents. He was carrying the shotgun. The parents called police. Henderson maneuvered around two of them, disarmed them and bound them with their handcuffs. After he shot Melley Henderson ran home, where he surrendered a short time later.

HOW SPUTNIK II COMPARES WITH FIRST SATELLITE

By the Associated Press.

Here is a comparison of the Soviet Union's two satellites—Sputnik I and Sputnik II:

SPUTNIK I

Launched—Oct. 4.
Size—23 inches in diameter.
Weight—184 pounds.
Altitude—560 miles.
Speed—18,000 m.p.h.
Time for one circuit—96.2 minutes.

Shape—Round.
Angle to Equator—65 degrees.
Visibility—Naked eye and telescopes.

Radio—Now silent.

SPUTNIK II

Launched—Nov. 3.
Size—Unstated.
Weight—1120.29 pounds.
Altitude—1056 miles.
Speed—17,840 m.p.h.
Time for one circuit—103.7 minutes.

Shape—Unstated, but apparently rocket shaped.
Angle to Equator—65 degrees.
Visibility—Method unspecified, but Russians say easier to see than Sputnik I.

Radio—Beeps at 3 second intervals.

FILM LIBRARY FLIGHT GROUP MOVING ITS HEADQUARTERS

The 1356th Film Library Headquarters and its detachments, located at different air bases, began their move today to their new location at 8800 South Broadway.

Headquarters and one detachment will move from Orlando Air Force Base, Fla. One detachment will be moved from Olmstead Air Force Base, Pa., one from Kelly Air Force Base, Texas, and one from McClellan Air Force Base, Calif.

BLAIR URGES DRIVE TO KNOCK OUT POLIO

By the Post-Dispatch Jefferson City Correspondent.
JEFFERSON CITY, Nov. 4.—A concerted drive in Missouri to strike a "knockout blow" to poliomyelitis was urged today by Gov. James T. Blair.
The Governor said an effort

would be made this month and next to offer free polio clinics through public schools in all of the 114 counties in Missouri.
He said the state division of health had received an additional 600,000 cubic centimeters of polio vaccine.
The vaccine supply now available in Missouri, through federal funds, is sufficient to give three injections to 85 per cent of young people under 20 years of age, it was said.
Surveys have indicated, the Health Division reported, that many pre-school children, and

teen-agers from 15 years of age through 19, have not received polio vaccinations.
"Responsibility rests not only with parents," Gov. Blair said, "but with all of us. I entreat every Missourian to do his part to see this program through."
"If your child has not been immunized against polio, now is the time to have it done."
Two-Seat Passenger.

U. S. DROPS BRIBE CHARGES AGAINST HOFFA'S LAWYER

WASHINGTON, Nov. 4 (AP)—A federal bribery-conspiracy indictment against Hyman I. Fischbach, Miami attorney, was dismissed today on request of the Department of Justice.
He had been accused along with James R. Hoffa, now president-elect of the Teamsters Union, of planting a spy on the staff of the Senate committee investigating labor-management racketeering. Hoffa won acquittal.
United States District Judge F. Dickinson Letts granted the dismissal as requested by Assistant United States Attorney Edward P. Troxell.
Hoffa and Fischbach were accused of conspiring to bribe John C. Cheasty, an investigator for the Senate committee, to feed Hoffa committee secrets.
Fischbach and Hoffa were called for trial together but Fischbach later was granted a

separate trial before the case went to the jury.
Troxell told Judge Letts today that with Hoffa acquitted as a principal, the government did not have a case left against Fischbach as an alleged accessory.

TWO PLEAD GUILTY, FAILED TO PAY PROPER OVERTIME

Louis L. Kunin and Allen Keyser, operators of United Poultry Co., pleaded guilty today of falsifying employees' records. The plea was entered in the court of United States District Judge Randolph H. Weber. They are subject to a \$10,000 fine each.
Kunin and Keyser were charged by the Department of Labor with not paying proper overtime to employees between May 1955 and November 1956.
Rex Culley, a Department of Labor attorney, told the court 12 employees and former employees of the company were in the process of being paid \$1595. Sentence was deferred by Judge Weber until Nov. 15.

Now your Delta Super Convair Captain "sees" 150 miles ahead with Weather-Eye Radar

"Velvet Ride"
gives you a
...quieter and more comfortable than ever before!

Here's what your captain sees in Delta's Radar Weather Eye: As far ahead as 150 miles, radar reveals the precise location of turbulent air. With radar's electronic eyes your captain selects the smoothest course around these areas. Changes in course are made so gently, far in advance, that you quickly agree, the term "Velvet Ride" fits like a glove.

While you relax in the new quiet of your Super Convair cabin, Delta's Radar Weather Eyes search ahead through any clouds en route, revealing to your Delta captain the smoothest, surest course to your destination... bringing you the Velvet Ride.

This is the "Get up and Go-liner" the hurry-up's built in: carries its own landing steps for instant availability—carry-on luggage racks so you may bring your bag on board, take it off with you, be on your way immediately!

Each mighty engine delivers 2400 hp, the same type of engines as used in round-the-world and overocean service. Delta's Super Convairs zip along at 270 miles per hour—give you the gift of more time at your destination!

Dog's Fate

Continued From Page One.

This would indicate that the space-traveling dog is doomed to stay aloft for at least four or five months since this satellite is expected to remain up just as long as the first one.

Theories on Feeding.

By the Associated Press.
The dog may be getting her food on a rotating machine and her drinking water through a nipple tube. Otherwise, said a government physiologist in Washington, the weightlessness of everything that wasn't pinned down in the essentially gravity-free satellite would cause the food and water to float in mid-air, as it were—and the dog would be hungry and thirsty.

Dr. Heinz Specht of the National Institute of Health said it is possible, on the other hand, that the satellite might be spinning. And in that event, he said, food and water would be held to the walls of the satellite by centrifugal force. But even under such conditions, he said, food and water left in more or less free form might be impracticable.

So, he told a reporter, he figures that the dog may be fed periodically by means of a rotating device that would serve up food in biscuit form and present it in such a way the dog could bite it off the machine.

"And she may be educated in advance," he said, "to nurse water out of a plastic container."

Specht said he believes a dog could live indefinitely on a survival ration of about 300 calories a day, which would weigh about two ounces. The animal would also need a pint of water daily.

Specht said that if a dog had sufficient food and water, it could survive in a sealed chamber as long as the oxygen lasted—and as long as adequate provision were made for absorbing the carbon dioxide the dog would exhale.

He said 50 pounds of oxygen would last a dog about 80 days, but he indicated that that amount of oxygen would require at least 100 pounds of sodium hydroxide or some other alkaline chemical to absorb the exhaled carbon dioxide.

He estimates that a dog could go about 10 days without any food, but would have to have water and oxygen during even a brief period.

Other Scientists' Comment.
Some scientists thought it would be possible to bring the dog back to earth alive.

Dr. J. Allen Hynek, associate director of the Smithsonian Astrophysical Observatory at Cambridge, Mass., said the dog might be parachuted to earth alive in a capsule, by using radio devices in regular use in this country.

He said the problem would be to trigger the capsule off with enough force in the opposite direction from which the satellite is orbiting so that gravity would take over and pull the capsule earthward.

Dr. Hynek added that some automatic device could trip the parachute and permit it to float to earth and that it could be tracked by radar instruments.

Dr. John B. Rinehart, assistant director of the observatory, said: "I don't see why they can't bring the dog back down. The technique to do this has been pretty well solved."

Dr. Fred L. Whipple, the observatory's director, said three problems are involved in returning the dog to earth. He listed them as:

1. Slowing her down quickly at a high altitude.
2. Carrying her safely

through the heating period when her container hits denser atmosphere near the earth.

3. The final parachute descent to the ground.
Dr. Whipple said also that "it doesn't look like it would require much equipment to keep the dog up in space for several weeks."

Smithsonian scientists said the value of having the dog aboard the satellite is to measure the effect of cosmic rays, tiny particles from outer space, on animals unprotected by the earth's atmosphere.

It is vital also, they said, that before any human beings venture into space more is known about the effect of "free falling" over a prolonged period

on the circulatory and digestive system.

Dr. Whipple estimated the new satellite would continue circling the globe for a period "greater than a couple of weeks and less than several months," and possibly come down before Sputnik I.

The Moscow newspaper Soviet Aviation described a pressure space suit which it said "flying dogs" of the future will wear. The article appeared several hours before the launching of Sputnik II.

Johnson
Continued From Page One.

tary, told reporters that so far as she knew, "there are no plans for a special session of Congress."

She issued a White House statement concerning the launching of the second Soviet satellite, carrying a dog. It said:

"The executive branch is analyzing this very carefully, both as to what it means in terms of rocketry and also as to its scientific significance."

She declined to elaborate.

The statement made it clear, however, that the Government is impressed and attaches great significance to the powerful thrust of Russian rockets in putting a half-ton satellite into an orbit more than 900 miles above the earth's surface.

The White House reference to scientific significance of the new satellite underscored, too, the deep interest in the fact that the new Sputnik is carrying a dog.

As she did yesterday, Mrs. Wheaton said the new launching came as no surprise to this Government. The White House said shortly after the Oct. 4 launching of the first satellite that it looked for the Russians to put up another soon.

In reply to questions, Mrs. Wheaton said Mr. Eisenhower conferred yesterday with several advisers regarding the new Soviet satellite.

She added that President carried on most of those conferences by telephone from the White House, but that he did meet with one or two staff members who could be considered as advisers in the fields of science and national security.

The President also held additional conferences at the White House this morning, Mrs. Wheaton said. She declined to name any of those he saw either at that time or yesterday.

Senator Henry M. Jackson (Dem., Washington), said the flight of Sputnik II shows that Moscow is "taking away America's historic trump card—its industrial and scientific supremacy."

"We have it in our power to catch up," he said in a statement, "if we have national humility and national leadership."

Senator Stuart Symington (Dem., Missouri), said in Missouri the second launching indicated that Russia can develop the power thrust to deliver an intercontinental ballistic missile.

Symington, a frequent critic of cuts in the defense budget, said the first satellite "gave conclusive proof that the Russians had enough thrust for an intermediate ballistic missile."

He said the second Sputnik "gave credence" to the Russian statement that they also have an I.C.B.M.

In Belleville, Ill., Representative Melvin Price (Dem., Illinois), said that Russian launching of a second satellite "indicates the scientific achievement of the Russians is tremendous."

"Russia's ability to fire over

a half ton of weight into space is an alarming thing," Price said in a statement.

He added Sputnik II shows Russia is "considerably ahead of the United States in the intercontinental missile race."

The survival of civilization is threatened, the Congressman said, unless "the United States can pick up the slack and restore confidence to our own scientific fraternity and to the peoples of the free world."

Calls for Czar.

Senator Clinton P. Anderson (Dem., New Mexico), called for immediate appointment of a missile czar "who is not connected with an airplane company."

Defense Secretary McElroy said the new Russian satellite will have no great effect on the United States program.

He said "we already are in a pressure program. Our program is in very good shape right now."

'Threat to Security.'

Anderson, who is alternate chairman of the Joint Congressional Committee on Atomic Energy, said at Albuquerque, N.M., that in June 1955 the United States knew that Russia had learned how to build a 1500-mile missile. With that knowledge, he said, "it also knew how to make an intercontinental ballistic missile and required only time to do it."

"Now it is using that knowledge to propel satellites far above the earth. More time—and maybe not much more—will enable Russia to man its satellites and threaten destruction to selected cities as the device circles the earth."

"I think it poses a serious threat to our security," he said.

American Plans.

The United States plans to launch an experimental basketball-size moon satellite next month but it is not expected to orbit around the earth. A 20-inch satellite—apparently much smaller than Russia's Sputniks—is expected to be launched next March. It will carry scientific instruments.

The Russian missile program has been on a crash basis since 1945. The United States program was practically non-existent until 1953 and even now is generally on a five-day week.

Missile Investigators Checking on Los Angeles Plant.

LOS ANGELES, Nov. 4 (AP)—A congressional committee investigating what it calls the "lag in the missile program" today conferred with top of-

ficials of the United States missile program at the key Ramo-Woolridge plant here.

Representative George Mahon (Dem.), Texas, chairman of the House subcommittee on defense appropriations, said his group is getting details of the controversy between the services on development of missiles.

After the Moscow announcement of Sputnik II, Mahon told a reporter:

"It's been my observation that our missile programs are not off the ground. We're tied up in red tape and indecision."

He added that he feels the United States program "is very badly co-ordinated, which is the reason for our being behind."

"It's the same old story," he said, "of the unwholesome jealousies which exist among the services—particularly between the Army and the Air Force."

Today Mahon and the subcommittee are spending the day with Maj. Gen. Bernard A. Schriever, boss of the Air Force ballistic missile program. His headquarters are at Ramo-Woolridge, which is co-ordinating the Air Force ballistic missile program.

Mahon said the subcommittee will go to San Diego tomorrow in connection with the I.C.B.M. program at Convair and then on Wednesday to Sacramento for a look at the Aerojet firm's operations there.

The Congressman said the group also will visit the missile firing center in Florida and on Nov. 20 will conduct a hearing in Washington with the Secretary of Defense and other key officials.

POLICEMAN IN A CHASE DIES

Edmund K. Carson, a part-time Ferguson policeman and a guard at McDonnell Aircraft Corp., collapsed and died Saturday night at the Ferguson police station after he chased a suspected mental patient for a block on foot.

Carson, with other Ferguson policemen, ran after the man and returned to the police station, where Carson collapsed. He was 51 years old and lived at 40 Lee avenue, Ferguson.

**LESTER PEARSON
URGES PEACE
TALKS WITH REDS**

© New York Times News Service
MINNEAPOLIS, Nov. 4 — Lester B. Pearson, winner of the 1957 Nobel peace prize, urged the West yesterday to seize every opportunity to negotiate a peaceful co-existence with Russia. He said it should be done without sacrifice of principle and from a position of non-aggressive strength. The alternative, he declared, is a peace "balanced precariously on the knife-edge of terror," followed by nuclear war and total annihilation.

In his first major speech since he won the peace prize three weeks ago, he warned that the Soviet Union was forging swiftly forward in the science of destruction.

"We had better awaken from our illusion of easy technical and material superiority which we have been cherishing be-

cause we have a car in every garage," he said.

In his address, one of a lecture series sponsored by the University of Minnesota, he told 4500 listeners that the "continual and implacable struggle for power" in the Kremlin augured well for peace in the long run. He said there is a "ferment of freedom" at work in Russia that gives reason for hope of East-West settlements on stronger foundations than are possible now.

PLEAS FOR EUROPEAN UNITY ARE RENEWED BY POPE PIUS

CASTEL GANDOLFO, Italy, Nov. 4 (AP)—Pope Pius XII today renewed his pleas for European unity, saying such association was "a vital economic necessity" for states of average power.

Such countries, the Pope told delegates to the six-nation European Coal and Steel Community assembly, must associate "if they wish to follow the scientific, industrial and cultural activities which condition their prosperity, their true liberty and their cultural expansion."

WORLD'S DOG LOVERS ANGRY, ASSAIL RUSSIA

NEW YORK, Nov. 4 (AP)—Animal lovers around the world are protesting against Russia's use of a dog as a passenger in its new earth satellite.

Warren W. McSpadden, general manager of the American Society for the Prevention of Cruelty to Animals, said here yesterday a protest to the Soviet Union would be sent through the State Department.

McSpadden said the dog is faced with "unnecessary sacrifice" or with "great pain and suffering should it survive."

In another protest, telegraphed to the Soviet embassy in Washington, Mrs. D. Kibbe Riddell, president of Bide-A-Wee Association, Inc., condemned "this atrocity."

Mrs. Riddell said the Russian Government "has once again proved its inhumanity."

Her association maintains an adoption center for animals in Manhattan.

The Soviet embassy in London told outraged British dog lovers many human beings had volunteered to travel aboard Sputnik II, but a dog was sent instead because "the sacrifice could not be accepted."

First Secretary Yuri I. Modin told a deputation from the National Canine Defense League that human beings would be sent up only when it is known what the risks are.

The league's leaders presented a letter addressed to Ambassador Jacob Malik in which they argued there was no justification for submitting the dog to such an ordeal.

Modin told the deputation the dog has been sent on its journey through space "for the ultimate benefit of humanity."

He said it had been specially trained and every care had been taken to make it comfortable in its hermetically sealed kennel aboard the satellite.

The Royal Society for the Prevention of Cruelty to Animals said at Liverpool it was being flooded with protest calls.

In Oslo, the Norwegian Society for the Prevention of

Cruelty to Animals called a meeting to discuss the space dog.

Singapore canine welfare authorities asked Moscow to "insure safe return of the dog."

Their cable was addressed to Communist party boss Nikita Khrushchev.

The executive vice president of the Dallas (Tex.) Society for Prevention of Cruelty to Animals said she also had sent a protest cablegram to Khrushchev.

Indignation Voiced Here.
Spokesmen for animal protective organizations in St. Louis today protested against the hurling of a dog into space by Russian scientists but said the action was not surprising, in view of Soviet callousness.

"They certainly would not be expected to give any consideration to an animal's suffering," remarked Fritz K. Grolock, president and managing director of the Humane Society of Missouri.

Much the same view was taken by James Ray, supervisor of the Animal Protective Association in St. Louis county. He said he saw no point in sending the dog up, adding, "We are always against any cruelty to an animal."

B-58 BUICK

Now you can Switch the Pitch a Million Ways

MAYBE you've felt smooth transmissions before.
Maybe you've had obedient response before.

But take it from us—you have never in all your born days known anything like this Buick's Flight Pitch Dynaflo!

This one switches the pitch a million ways—automatically, smoothly, thrillingly.

Thanks to a new infinite-pitch stator, you get the most efficient ratio of engine power to rear-wheel turning on the American scene today.

The result: an exuberant feeling of aliveness of response—a new sense of command unlike anything you've known before.

But there's far more than brilliant performance in this '58 Buick. It embodies more aircraft principles than any other car yet built. It carries a new excitement in styling—a joyous new comfort in travel—a new nimbleness to handling—and the solid satisfaction of a new standard of Buick quality.

Want to hear more? See more? Do more?

Drop in and guest-drive the glamorous B-58 Buick today.

*Flight Pitch Dynaflo standard on LIMITED and ROADMASTER 75, optional at extra cost on other Series. Air-Poise Suspension optional at extra cost on all Series.

When better automobiles are built Buick will build them

FLIGHT PITCH DYNAFLOW*
—last word in travel with your wheels on the ground

New Face of Fashion—From the new Dynastar Grille to the exciting rear tail towers, this is the freshest style fashion in years—the look of flight on wheels.

New Air-Cooled Aluminum Front Brakes—"Air conditioned" by 45 radial fins, these extra-powerful aluminum brakes give smoother, more positive stopping and longer lining-life. (Standard on most models.)

New B-12000 Engine—As advanced as today's fuels will let auto engineering go—with Buick's new Quadrajet carburetion, up to 10 to 1 compression, new brilliantly responsive power.

New Miracle Ride Plus Buick Air-Poise Suspension—To the outstanding Buick ride-engineering comes the new marvel of a ride on 4 columns of air. Levellest, smoothest, most luxurious ride you've ever known.

RUSSIA GIVEN EDGE OVER U.S. IN BIRTH RATE

By JAMES DEAKIN
A Washington Correspondent
of the Post-Dispatch.

WASHINGTON, Nov. 4.—Latest available figures give Russia a slight edge over the United States in rate of births, an important factor in long-range cold war planning, the Population Reference Bureau reported today.

In terms of total population, the Soviet Union leads this country, with an estimated 205,000,000 people, compared with 172,000,000 in the United States, the bureau said. It added that the population of both countries apparently are growing at a "steady" rather than an "explosive" rate.

Upward in the West. Another report, by the United States Census Bureau, showed that the 11 states of the Rocky Mountain and Pacific Coast region have registered a population increase of nearly one-fourth since the last official nationwide census in 1950.

Population of the 11 Western states went from 19,600,000 in 1950 to an estimated 24,100,000 as of July 1, 1956, an increase of 23.1 per cent, the Census Bureau said.

The average increase for the nation as a whole was 11 per cent in the same period.

Missouri had a 6.1 per cent increase in the six-year period; from 3,954,653 persons in 1950 to an estimated 4,197,000 as of July 1, 1956, the report said. The Illinois increase was 8.8 percent, also below the national average.

Data on Russian Births. Although emphasizing that its figures for the Soviet Union were tentative, the Population Reference Bureau said Russia's birth rate in 1955 was 25.6 births per 1000 population, compared with 24.9 births per 1000 in the United States.

Between 1950 and 1955, Russia's rate of "natural increase"—the difference between birth rate and death rate—also was higher than the natural increase in the population of the United States, the report added.

The natural increase rate in Russia in 1955 was 17.2 per 1000 population; in the United States it was 15.6. The Russian rates from 1950 through 1954 were 16.9, 17.2, 17.1, 15.9 and 17.6 respectively. In the same years, the United States rates were 14.5, 15.2, 15.4 and 16.1.

The birth rate in the Soviet Union fell drastically between 1926 and 1950, however. The rate in 1926 was 44; the figure in 1950 was 26.5. One factor in this probably was the intensive birth control program instituted by the Communist regime. Since 1950, Russia's birth rate has stabilized in the range of 24 to 26 per 1000, while the United States birth rate has remained relatively constant at between 24 and 25 per 1000, the report pointed out. The United States birth rate in 1926, 24.2 per 1000, was almost the same as in 1955, 24.9.

Suspects Political Twist. Russia's death rate of 8.4 per 1000 in 1955 was lower than that of the United States, 9.3 in 1955. Robert C. Cook, director of the Bureau, said the Soviet Union's death rate figures "may have a political twist to them," however.

Similarly, Russia may have understated its total population, Cook said. The Russians gave a figure of 200,200,000 as of April 1, 1956, and this "came as quite a shock" to western experts, who had estimated there were about 216,000,000 Russians. The Population Reference Bureau settled on about 205,000,000.

The Russians could gain a propaganda advantage by underestimating their population when total Soviet economic output was projected on a per capita basis, Cook pointed out. A smaller population would give a larger per capita production.

"The rapid strides the U.S.S.R. has made in technical education emphasize that in the

years ahead quality of population, rather than quantity, will be the determining factor," Cook declared.

School Population Rise. He added, however, that "in the battle for technical supremacy, an over-rapid population increase could put the United States at a disadvantage with respect to the Soviet Union... even in the United States. The rapid increase in school population since 1950 is posing serious problems."

The census bureau report on United States population growth showed that although the western states had the greatest population gain percentage, the north central states had the largest numerical increase, with about 5,000,000.

Among the states, Nevada had the largest percentage of population growth, 60.1 per cent since 1950.

How to Hold DENTAL PLATES More Firmly in Place

Do your false teeth annoy and embarrass by slipping, dropping or wobbling when you eat, laugh or talk? Just sprinkle a little FASTEETH on your plates. This alkaline (non-acid) powder holds false teeth more firmly and more comfortably. No gums, nasty taste or feeling. Checks "plate odor" (denture breath). Get FASTEETH today at any drug counter.

GAMBLING RAID IN WELLSTON FAILS; DAY EARLY

St. Louis county police, acting on a tip that a high-stakes poker game was operating in a Wellston apartment, raided the place yesterday but found none of the big money players around.

A search warrant had been obtained by Lt. F. J. Vasek of the county police last Friday, but a close watch indicated the game was not in session Friday

or Saturday nights. The raid was ordered following a report that the players had assembled for a Sunday afternoon session.

The squad of county police, joined by Wellston officers, broke into the second-floor apartment in the 6200 block of Easton avenue and found new furnishings which indicated it had been set up for poker games.

There were five new kitchen-type tables, 15 new chairs and ceiling hooks for droplights. A rack for 36 coats had been placed in the front hall. New wall-to-wall carpeting covered the floor.

Heavy drapes were nailed to frames of windows overlooking Easton avenue, rear and side windows were barred and a rear door had been barred and covered with screen mesh.

Lt. Vasek said he and fellow

officers kept the apartment under surveillance last week. Well-known St. Louis area gamblers were seen entering and leaving the place. Many of the visitors came in automobiles bearing Illinois license plates.

The warrant was issued late Friday by Circuit Judge Douglas L. C. Jones at Clayton.

Lt. Vasek said he had received

information that players were charged a \$50 entrance fee and that a \$50 limit was placed on the game.

Somebody telephoned the apartment while the raid was in progress and asked if the game would be in session Monday night, indicating that the raid may have been ordered

one day too soon. Vasek took the call.

Nothing newer in the world

A TRUE AIR RIDE

WITH FORD-AIRE SUSPENSION

THE NEWEST ADVANCE IN DRIVING COMFORT...A CONTROLLED AIR-CUSHION RIDE

Air cylinders at each rear wheel replace conventional steel springs. Your ride is softer, quieter, more comfortable.

Air compressor, driven by engine, supplies air at a pressure of 300 pounds per square inch to operate new Ford-Aire Suspension.

Air reserve tank provides a reservoir of high pressure air to keep the system operative whether engine is running or not.

Leveling valves, one at each front wheel, operate automatically to keep car's front-end height constant regardless of amount or location of load.

Leveling valve at rear axle operates automatically to maintain constant height at rear of car. Now, a trunk full of luggage no longer leaves you riding front-end high, rear-end low.

Door switches at all doors operate leveling valves whenever a door is opened. Car returns to level instantly when passengers get in or out.

Air cylinders at each front wheel replace coil springs. You literally ride on air—and what a difference it makes. It's like riding on a cloud!

New Ford-Aire Suspension gives you smooth sailing with any load... in any going! That's because the shock of every bump is smothered in an automatically controlled cushion of air before it reaches you.

With new Ford-Aire Suspension, "spring action" is uniform under all road and load conditions. A power-operated self-leveling system always keeps the frame the same height above the center of the wheels. This means there's less chance of "bottoming" even with a heavy load because your wheels always have full freedom of action to skim smoothly over the bumps.

Levels in seconds when you open a door! Load an All-American tackle in the left rear seat and fill up the trunk with luggage. Naturally the body tilts to the left,

sinks in the rear... but only for a moment! With the door open, Ford-Aire's quick-action, self-leveling mechanism goes to work. Before you've even closed the door, the body rises smoothly to level.

Ford-Aire Suspension will be available at modest extra cost in all new Fairlane 500, Fairlane and Station Wagon models with V-8 engines and automatic drive.

And for 58, Ford's standard ride is anything but standard. Ford's famous 4-way Ball-Joint front suspension has smoother, more uniform action. Variable-rate rear springs have softer action. Result: a far better ride!

Action Test a 58 Ford at your Ford Dealer's on Thursday, November 7th. You're in for the ride of your life!

'It Looks Like Christmas,' Says 'Lost' Taxpayer Getting \$173

"It looks like Christmas," was the comment of Mrs. John Callahan, 712 O'Fallon street, as she filled out an application for a \$173 federal income tax refund at the Internal Revenue Service office today.

She was among the first applicants as the office began accepting identifications of about 2300 "lost" income taxpayers to whom refunds of 1956 taxes are due.

Mrs. Callahan said she and her husband had filed a joint return when living at 3725 North Twenty-fifth street but did not leave a forwarding address when they moved.

Largest refund for which an application was filed was \$259, owed to W. H. Thomas, 4232 W. Page boulevard.

Thomas said he had been expecting the payment and thought it was just late in arriving. He had given his address as 4232 instead of 4232 W. Page on his tax return.

On hand when the office opened was Alton J. Jolley, 3318 1/2 Sixty-second street, East St. Louis, who filed an application for a \$4.60 refund.

Jolley, a factory worker, said he lived at 3130 South Seventh street when he filed the return, but left no forwarding address when he moved across the river.

Like the others, Jolley learned of the refund from a list of about 200 names published in yesterday's Post-Dispatch. Similar lists will be printed daily except Saturday.

Refunds, in amounts ranging from \$1 to \$550, were mailed to the taxpayers last spring but because of address changes, or wrong addresses, the checks were not delivered.

Persons listed should write, or preferably go to the basement office of the revenue service in the Federal Building, Twelfth boulevard and Market street, with adequate identification such as a copy of last year's income tax return, a driver's license or birth certificate. Telephone inquiries will not be handled.

After establishing his identification the taxpayer will fill out an application and the check will be mailed to him in about two weeks.

Today's list of names follows:

3 EAST ST. LOUISANS SEIZED ON LIQUOR SALE CHARGES

East St. Louis police arrested three men on suspicion of selling liquor without a city tavern license early yesterday after raiding their residences and confiscating quantities of beer, whisky and wine. They were released on bond and will appear Nov. 15 before Justice of the Peace Howard F. Langford.

Police booked the men as Brooks Lewis, 44 years old, who was arrested at his home in the 1800 block of Mississippi avenue; Thomas Mason, 48, 1600 block of Lawrence avenue, and Henry Poole, 45, 1800 block of Wilford avenue.

WESTERN BASES ARE OUTDATED, RUSSIA WARNS

LONDON, Nov. 4 (AP)—The Moscow radio broadcast a warning by Nikita S. Khrushchev yesterday that Western military bases ringing the Soviet Union have been outdated by Russia's intercontinental missiles. He said, however, he did not think there was an imminent danger of war.

The broadcast said the Soviet Communist party boss sounded the warning in a recent exchange of notes with Peter Dempson of the Toronto Telegram. Dempson, chief of the Telegram's Ottawa bureau, made the contact through the Soviet embassy in Ottawa.

"The intercontinental rocket has solved the problem of delivering hydrogen bomb warheads to any point of the globe," the broadcast said. "As for the military bases in Europe, Africa and Asia, rockets have long since been available which could reach any point of these continents."

But, he added: "Conditions now prevail in the world which do not bode an early war. It may be said that the people are striving for peace and that the current situation is not of a sort that prevailed before World War II."

"But of course no one can categorically state that there will be no war. It is a matter of common knowledge that there are statesmen in some capitalist countries, statesmen holding important government posts, who advocate war."

The Moscow broadcast said the interview was published in the Soviet magazine International Affairs. In other replies to the interviewer, Khrushchev: 1. On disarmament—denounced the work of the five-

power United Nations disarmament subcommittee as "useless and absolutely fruitless." He said the Soviet government was ready to end nuclear weapon tests as soon as the West called off its dogs. If the western powers liquidated their military bases the Soviet Union would "immediately take steps toward further disarmament."

2. On the Middle East—"We are very much grieved and worried by what is happening in the Middle East area. When the Arab peoples fight against every form of political and economic enslavement the imperialists declare there is a threat of communism in these countries. This is the method used by the United States in preparing, through Turkey, an attack against Syria. The reason for the prevailing tension in the Middle East therefore lies in western, above all United States, interference in the domestic affairs of the Arab nations."

3. On the German problem—"We have always favored Germany's reunification. But there are actually two states with different social and political systems in Germany. Without recognizing the existence of these two states it is impossible to make a single step towards German reunification."

4 ARMY OFFICERS ACCUSED OF NICARAGUA BOMB PLOT

MANAGUA, Nov. 4 (UP)—Four Nicaraguan army officers were jailed over the weekend, accused of plotting to bomb the presidential house and overthrow the government.

A government announcement said the four, arrested Saturday, were Maj. Jose Luis Aguado, chief of the army law department; Capt. Victor Rivas and Lts. Ali Salomon and Carlos Ulloa.

The communiqué said the four planned to attempt their coup during the absence of army commander Gen. Anastasio Somoza who left yesterday on a visit to the United States.

HUMPHREY SAYS HIS FIRM WON'T CUT STEEL PRICE

WASHINGTON, Nov. 4 (AP)—George M. Humphrey, who sought to fight inflation as Secretary of the Treasury, rejected today any price cut for steel as board chairman of the National Steel Corp.

Humphrey told a Senate hearing that company earnings have fallen off, that the price of steel is fair and competitive, and:

"We will not change our prices now, so let's just let that one rest."

Like other major steel companies, National increased its prices \$6 a ton last July. Humphrey said National did so to keep abreast of its competitors, and "we don't propose to cut prices now."

The former Treasury head was appearing before the Senate anti-trust and monopoly subcommittee, which has been looking into the price increase in steel.

Time after time, Chairman Estes Kefauver (Dem., Tennessee), said higher wages didn't justify the \$6 increase, and prodded Humphrey for a price reduction. Humphrey joined National after the price boost went into effect.

Opinion Unchanged.

As architect of the Administration's financial policy, Kefauver said Humphrey's big effort was to hold down inflation.

"Wouldn't this be a good opportunity," the Senator asked, "for you to put into effect what you were talking about when you were Secretary?"

"I haven't changed my opinion one iota," Humphrey replied with a touch of heat.

He said that a strong economy is essential to the nation's welfare—even more important than a strong defense which relies on a strong economy.

Profits and wages must be high enough to keep the economy strong, he said. As for his own company and industry, he said:

"It isn't going to help the country or anybody else if we go down to the point that this industry doesn't make any money. And it will hurt the Government very seriously if that should occur."

National is the nation's biggest producer of cold rolled steel, used in the automotive and appliance industries. It also is a large producer of tin plate, which goes into tin cans.

Cites Other Factors.

Kefauver said higher wages accounted for only some \$3.15 of the \$6-a-ton price boost. Humphrey didn't dispute this but said other factors were also involved.

"What are these other costs, Mr. Humphrey, that explain the difference between the \$3.15 and the \$6?" Kefauver asked.

Humphrey mentioned prices of materials, freight rates and a reduction in the operating rate. He said these "have about doubled the amount of the wage advance."

Humphrey accepted Kefauver's statement that steel scrap is one of the principal raw materials and that the price of scrap is down.

By the United Press.

Kefauver said that his Senate anti-trust and monopoly subcommittee will investigate recent increases in auto prices. He was not specific as to when auto manufacturers would be asked to testify.

CUBAN DOCTORS REPORTED KILLED; TREATED REBELS

NEW YORK, Nov. 4.—The Cuban Medical Association is reported to have charged that two of its member physicians and another person were murdered for having ministered to insurgents wounded in fighting the government of President Fulgencio Batista.

According to information transmitted here from Havana, the association also has charged that on several occasions wounded insurgents have been dragged from hospitals by soldiers and put to death elsewhere.

The Havana account said the charges were made in a letter given to the president of Cuba's Supreme Court last Monday. The letter was signed by all 27 members of the medical association's executive committee.

POLICE FIND YOUTH HIDING BEHIND MATTRESS IN STORE

A youth who said he was Charles H. Andrews, 18 years old, of Detroit was arrested yesterday when he was found hiding behind a mattress at the Abbey Rents Co., a firm which sells and rents hospital furnishings. It is located at 3230 Washington boulevard.

Patrolman Vernon Ketcherside of the Lucas Avenue District discovered a broken rear window as he was checking the neighborhood after receiving a report that someone had been seen breaking a window in the area. Ketcherside and other officers searched the place and found Andrews hiding behind a mattress which was leaning against a wall on the second floor.

Andrews admitted ransacking a desk and taking some change, police said. He also admitted owning a .22 caliber blank revolver found behind the mattress. He told police he was wanted in Detroit for jail breaking. He had been arrested for breaking into automobiles, he said.

"Volcano Energy" Station.

LONDON, Nov. 4 (AP)—The Soviet Union has started building a "volcano energy" power station, the Moscow radio reported yesterday. It will work from the hot volcanic springs in the Kamchatka peninsula of eastern Siberia, the broadcast said.

CARRIES RADIUM, CREATES UPROAR IN DEFENSE DRILL

TORONTO, Nov. 4 (AP)—A German immigrant threw a civil defense drill into an uproar yesterday by pulling a vial of lethal radium from his pocket. He said he wanted it tested for potency.

A policeman a few feet away pointed his Geiger counter and the indicator gyrated wildly right off the dial.

The mild-mannered German, Gunder Kuhn, was searched and promptly arrested on a charge of carrying an unregistered revolver which was loaded. Then he was taken to the Don Jail and given a decontamination bath while police and civil defense agents spread out to run down the radioactivity in his wake.

Kuhn told police he brought the radium into Canada from West Germany eight months ago. He said he had been working with it for a year, applying it to the dials of wrist watches and various instruments to make them luminous. He works for a hospital equipment company as a mechanic.

Police noticed an open sore beside Kuhn's left eye. One expert said such sores are common in the later stages of radiation sickness.

Police said the vial contained about 20 grams of the powder, more than is kept on hand by a metropolitan hospital for radiation treatment.

G.O.P. COMMITTEE TO HEAR PRESIDENT

WASHINGTON, Nov. 4 (AP)—The Republican National Committee was called yesterday to meet here Dec. 6 for off-the-record conferences with President Eisenhower and Vice President Nixon on the party's future.

The President will make an informal talk to the 146-member group at a breakfast at Hotel Statler. Nixon will talk to the committee the same day at luncheon after a closed meeting. Their remarks will be private except for what may come out of press conferences and comments by members.

In announcing the committee call, Chairman Meade Alcorn said:

"Although we have a number of business matters to settle, the principal purpose of our National Committee meeting will be to obtain a frank appraisal of the status of the Republican party and its organization."

"For this reason, we have invited President Eisenhower to have a breakfast session with us and he has enthusiastically accepted. Following a forenoon executive session of the committee, Vice President Nixon will join us in a luncheon session."

Alcorn also has called the 27-member executive committee of the National Committee to an afternoon session the day before, Dec. 5. Reporters will be barred from this session too.

BIG URANIUM ORE DEPOSIT REPORTED FOUND IN OHIO

COLUMBUS, O., Nov. 4 (AP)—A vast deposit of uranium ore worth several billion dollars has been found in Ohio, the Columbus Dispatch reported yesterday.

The uranium-bearing soil borders Lake Erie along the northeastern section of Ohio, and runs in a north-south band

five to 20 miles wide and more than 200 miles long, almost directly through the center of the state, the newspaper said. The band also shoots off into West Virginia, Kentucky and Tennessee, the newspaper said.

The dispatch gave credit for the discovery to Laurence W. Huntington, a 77-year-old retired mining engineer-geologist. Hunting has developed and patented a process to separate the uranium from the waste material, the dispatch said. The newspaper said the ore is in a

non-radioactive sulfide form rather than in an oxide form, and that it has a low uranium content.

FEDERAL PAYROLL REDUCED BY 33,684 IN SEPTEMBER

WASHINGTON, Nov. 4 (UP)—The Federal Government payroll shrank by 33,684 persons in September to the lowest point since April 1956, Senator Harry F. Byrd (Dem.), Vir-

ginia, reported today.

In the monthly report from his Joint Committee on Reduction of Federal Spending, Byrd said the reduction was the greatest for any single month since June 1950.

His report placed the number of civilian employees in September at 2,366,398, including 1,130,380 in military departments and 1,236,018 in other Government agencies. The 33,684 reduction for September included 22,876 in the number of civilian employees in defense agencies.

Quick Clam

Continued From Page One.
experts of the American Spice Trade Association.

Quick Clam Chowder.
Ten and one-half ounce can beef broth.
One-fourth cup finely chopped celery.

One cup diced potatoes.
Two tablespoons minced green pepper.
Ten and one-half ounce can condensed vegetable beef soup.
One cup canned tomatoes.
Two seven-ounce cans minced clams.
One-eighth teaspoon ground black pepper.
Three-fourth teaspoon poultry seasoning.
One-half teaspoon salt.
Pilot or hard crackers.

Combine first four ingredients. Cover and cook over low heat until vegetables are tender, about 15 minutes. Add remaining ingredients. Heat to boiling point. Pour chowder over whole or crumbled crackers in serving bowls.

Fricassee Pork Chops.
Six medium pork chops.
One-half teaspoon poultry seasoning.
One and one-half teaspoons salt.

One-fourth teaspoon ground black pepper.
Two cups thinly sliced onions.

Two cups thinly sliced fresh tomatoes.
Brown chops on all sides in some of the fat trimmed from them. Place in a 10x6 1/2 x2-inch baking pan. Mix seasonings together and sprinkle half over the meat. Top with sliced onions and tomatoes. Sprinkle with remaining seasonings. Bake, covered, in a preheated moderate oven (350 degrees F.) 1 1/2 hours or until chops are tender.

Tuna Fish and Biscuit Pie.
Two seven-ounce cans tuna fish.

Ten and one-half ounce can cream of celery soup.
One-half teaspoon poultry seasoning.

Three-fourths teaspoon salt.
One-fourth teaspoon ground black pepper.
One cup mixed canned vegetables.

Three-fourths cup water

drained from vegetables.
Twelve one and one-half-inch unbaked biscuits.

Combine first seven ingredients. Turn into a one and one-half-quart oblong baking dish. Top with unbaked biscuits. Bake in a preheated hot oven (400 degrees F.) 25 minutes or until biscuits have thoroughly baked and are brown.

Gossip Party

Continued From Page One.

powder.
One-quarter teaspoon salt.
One cup firmly packed light brown sugar.
Two eggs, well beaten.
One-half teaspoon brandy flavoring.
One half cup chopped walnuts.

Rinse apricots and cover with water. Boil 10 minutes, then drain, cool and chop. Let butter or margarine stand at room temperature until soft. Mix with sugar and one cup of the flour until crumbly. Pack into greased eight-inch square pan. Bake in moderate oven, 350 degrees for 25 minutes. Sift remaining one-third cup flour, baking powder and salt. Beat brown sugar slowly into eggs, beating well after each addition. Stir in flour mixture, flavoring, walnuts and apricots. Spread over baked layer. Return to oven; bake 30 minutes longer. Cool in pan. Cut in bars or squares when cold.

Breakfast

Continued From Page One.

sliced apples. In a mixing bowl combine flour, baking powder, salt and the one-fourth cup sugar. With a pastry blender or two knives cut in shortening until it is broken into fine particles. Add milk mixed with the egg and stir gently to make a lumpy batter. Spoon the batter over the apples in the pan and sprinkle with the light brown sugar. Bake at 375 degrees F. for 25 to 30 minutes. These tempting freshly-baked hot breads are equally delicious for luncheon or supper.

Lime Peach Crumb Dessert Made With Diet Foods

There are two types of diets—those who need to lose weight for health reasons and who are doing so under a physician's direction, and those who just want to take off a few pounds for appearance's sake. This latter group accounts for much of the increased consumption of diet foods. And members of both groups will enjoy this dessert made with diet foods, which contains only 95 calories per serving.

Lime Peach Crumb Dessert.
One-half cup graham cracker crumbs.

One and one-half tablespoons melted butter or margarine.
One-eighth teaspoon cinnamon.

*One can (eight and one-fourth ounces) diet sliced yellow cling peaches.
One envelope diet lime flavor gelatin dessert.

Six maraschino cherries, drained.

Combine cracker crumbs, butter, and cinnamon; set aside. Drain peaches, reserving liquid; add water to make one and one-half cups liquid. Heat liquid and add gelatin dessert powder, stirring to dissolve thoroughly. Chill until mixture is slightly thickened; whip until fluffy. Fold in peaches. Turn into eight-inch square pan. Sprinkle crumbs on top evenly. Arrange cherries so that each serving will have one cherry in center. Chill until

firm. Cut into six servings.
*For variety in place of sliced peaches, one (eight and one-fourth ounce) can of diet fruits for salad, apricot halves, or fruit cocktail can be used. . . . with negligible difference in caloric values.

Serve Creamy Cauliflower.
Creamy white cauliflower with a tangy cheese sauce will hit the spot these crisp fall days. Two good reasons for serving it: this is Cheese Festival time, and cauliflower is such a good buy. Cheddar cheese is the most popular choice for sauces, and you can vary the flavor of the sauce just by the flavor of the Cheddar you choose—mild, medium, or sharp. In making the sauce, it's best to make a white sauce base and add the cheese last, so the cheese doesn't get a chance to overcook.

TURKEY-OYSTER CHOWDER COMPLEMENTARY DISH

Turkey and oysters complement each other deliciously. You'll like the celery flavor and the hearty, creaminess the milk gives the chowder. Add more turkey if you wish, but the chowder is a meal in itself as it is.

Ingredients:
Turkey or chicken-bones if available.
One small onion.
Five cups chicken broth or use chicken bouillon cubes.
Two-thirds cup uncooked white rice.
One cup finely diced celery.
Two and one-half teaspoons salt.
One-fourth teaspoon black pepper.
One and one-half cups milk.
Two tablespoons all-purpose flour.
One and one-half cups diced cooked turkey (more if desired).
One-half pint oysters.
One-fourth cup butter or margarine.
Salt and pepper to taste.
Paprika or parsley for garnish.

Make turkey stock or broth by packing bones in a large kettle and covering with cold water. Add the onion. Cover. Simmer for about three hours. Strain. Cool. Remove any remaining meat from the bones. Refrigerate.
About an hour before serving the chowder, place five cups of the broth in a large soup kettle. Add the rice, celery, salt and pepper. Cover and simmer 30 minutes. Stir the milk into the flour. Stir into the hot mixture. Add the turkey, oysters, butter or margarine and salt and pepper to taste. Heat. Thin with additional stock if desired.
Serve hot, sprinkled with paprika or chopped parsley.
This recipe makes about two and one-fourth quarts of chowder.

SOME WINES KEEP

In contrast to California table wines which must be used within a few days after being opened, California appetizer wines such as Sherry and Vermouth, and dessert wines, such as Port and Muscatel, keep indefinitely after being opened.

Mystery in Casserole

Now that the new apple crop is here, here is a good casserole idea — combining macaroni, cheese, frankfurters and Staymans or Grimes Golden apples. The flavors are superb. The whole casserole so decorative that you'll want to save it for guest dinners instead of treating the family to

the surprise. Here's the recipe for this new dish.
APPLE CASSEROLE MEDLEY
One eight-ounce package elbow macaroni.
Three cups well-seasoned medium white sauce.
Eight frankfurters.
Two cups grated sharp cheddar cheese.
Three large or four medium apples.
Cook and drain macaroni. Combine white sauce and cheese; stir until cheese melts. Core, pare and dice two large apples; add. Spoon half the mixture into large casserole. Slice two or three frankfurters, scatter on top. Add remaining macaroni mixture. Top with buttered crumbs, bake at 350 degrees 15 minutes. Cut remaining frankfurters in half; score. Arrange in a wheel on top of casserole with unpeeled apple wedges between. Bake 15 minutes longer. Makes eight to 10 servings.

PORK FOR A PARTY

Pork roast for a party is a wonderful idea, for such now are attractively priced, and a pork roast makes an easy-to-prepare main dish. Why not buy a whole or half pork loin — it's less per pound than way — and then cut it into the size roasts or chops you want saving the center cut roast for a "partied" roast. Roast it to perfection, then "pretty up" the roast with well-chosen garnishes.

Supper

Continued From Page One.

five minutes. Rinse spaghetti with warm water and pat dry well. Remove browned patties and brown onion lightly in drippings. Add all remaining ingredients to onion and mix well. Simmer about five minutes. Place spaghetti in greased two-quart casserole. Pour all but about one-half cup sauce over spaghetti. Arrange patties on top of spaghetti and pour remaining sauce over them. Cover and bake in moderate oven (350 degrees) about 30 minutes. Makes six servings.

Takes Four Franks.
All it takes is four franks to make hearty Macaroni-Stuffed Frankfurters. This dish is good in combination with baked acorn squash and an assortment of crisp finger relishes:

Macaroni-Stuffed Frankfurters.

Four ounces small shell macaroni.
Four frankfurters.
Two tablespoons butter or margarine.
Three tablespoons enriched flour.
One teaspoon salt.
One-eighth teaspoon pepper.
One and one-fourth cups milk.
One teaspoon prepared horseradish.
Two tablespoons prepared mustard.
Two tablespoons India relish.
Two tablespoons chili sauce.
One-third cup buttered enriched bread crumbs.
Add two tablespoons salt and macaroni to three cups boiling water. Boil rapidly, stirring constantly, for two minutes. Cover, remove from heat and let stand 10 minutes. Meanwhile, pour boiling water over frankfurters, cover and steam five to 10 minutes. Melt butter or margarine in saucepan. Blend in flour, salt and pepper. Add milk gradually and cook until thickened, stirring constantly. Stir in horseradish, mustard, relish and chili sauce. Rinse macaroni with warm water and drain well. Fold macaroni into sauce. Slice frankfurters lengthwise and fill with some of macaroni mixture. Place in greased nine-inch square baking pan. Spoon remaining macaroni mixture around frankfurters. Sprinkle top with buttered crumbs. Place under broiler and broil

until crumbs are browned. Serve immediately. Make four servings.

But How Different.
Frankfurters again—but how different they taste with noodles and cheese in Frankfurt Schnitzel.

Frankfurt Schnitzel.
Four ounces medium noodles.
Three tablespoons butter or margarine.
Three tablespoons enriched flour.
One teaspoon salt.
One-eighth teaspoon pepper.
Two cups milk.
One cup shredded American cheese (four ounces).
One-half teaspoon Worcestershire sauce.
Three tablespoons chili sauce.
One-half pound frankfurters.
Add two teaspoons salt and noodles to three cups boiling water. Boil rapidly, stirring constantly, for two minutes. Cover, remove from heat and let stand 10 minutes. Meanwhile, melt butter or margarine in saucepan. Blend in flour, salt and pepper. Add milk and cook until thickened, stirring constantly. Add cheese and stir until melted. Rinse noodles with warm water and drain well. Stir Worcestershire sauce and chili sauce into cheese sauce. Cut two frankfurters into halves lengthwise. Cut remaining frankfurters into crosswise slices. Fold noodles and frankfurter slices into sauce. Turn into greased one and one-half quart casserole. Arrange frankfurter halves on top. Bake in moderate oven (350 degrees F.) about 25 minutes. Makes four servings.

Tuna-Tomato Macaroni
(Makes four servings)
One seven-ounce can solid-pack tuna.
One-fourth cup finely chopped onion.
One clove garlic, finely chopped.
One one-pound 13-ounce can tomatoes.
One six-ounce can tomato paste.
One tablespoon sugar.
One teaspoon salt.
One-fourth teaspoon pepper.
One-fourth teaspoon oregano.
One tablespoon salt.
Three quarts boiling water.
Two cups elbow macaroni (eight ounces).
Drain; tuna; reserve two tablespoons oil. Break tuna into pieces. Heat two tablespoons tuna oil; add onion and garlic and cook until onion is tender. Add tuna, tomatoes, tomato paste, sugar, one teaspoon salt, pepper and oregano. Cover and cook over low heat 45 minutes stirring occasionally.
Meanwhile, add one tablespoon salt to rapidly boiling water. Gradually add macaroni so that water continues to boil. Cook uncovered, stirring occasionally, until tender. Drain in colander. Serve macaroni topped with tuna-tomato sauce.

American Blue Cheese and Pear Salad.
(Makes four servings)
Eight canned pear halves.
One-half cup French dressing.
Three-fourths cups crumbled American Blue cheese (about four ounces).
Two tablespoons canned pear sirup.
Crisp escarole or lettuce.
Combine pear halves and French dressing. Chill one hour. Drain; reserve dressing. Combine cheese and pear sirup; blend. Shape into eight balls. Arrange pear halves and cheese balls on escarole or lettuce. Sprinkle cheese balls with paprika, as desired. Serve topped with reserved dressing.

SHORE FOOD TREATS CAN BE REMEMBERED
Remember those days at the shore last summer? Lots of good fresh fish and seafood, early morning clamming and crab digging too. Now as colder days begin, we can still taste the freshness of the sea, with conveniently canned foods.
Combine canned spaghetti in tomato sauce with cheese and canned clams for a supper dish. It will remind you of the shore and rightfully so. Both foods are flavor fresh and marry well in this dish. Set the table with a seaside feel... shells, coral, etc. Heat up long thin bread sticks, flavor butter with garlic or celery salt, for spreading, toss a crisp salad and serve steaming cups of coffee.
For dessert... pumpkin chiffon tarts.
This menu will be a recipe box favorite for it's tasty, warming and quick. Good for the busy holiday time. Here's the recipe:

Spaghetti 'n Clams.
One can (15 1/4 ounces) spaghetti in tomato sauce with cheese.
One can (6 1/4 ounces) minced clams, drained.
Two tablespoons chopped parsley.
Two teaspoons lemon juice.
One-fourth teaspoon prepared mustard.
Cut garlic in half; rub inside of one-quart casserole with it. Discard. Combine remaining ingredients in casserole; blend. Bake in a hot oven (400 degrees Fahrenheit) about 20 minutes or until mixture bubbles. Makes two to three servings.

MIXED CLOSE TO STOCKS; DROP AS SPUTNIK UP

By ELMER C. WALZER
United Press Financial Editor
NEW YORK, Nov. 4 (AP)—Russia's new satellite, the USSR, aboard helped put stocks down early in the day and helped put them up later.

The recovery which began with the makers of missiles just about wiped out the wide losses in industrial issues with allowance is made for a cut in the figure caused by several stocks selling ex-dividend.

Dow-Jones average of 30 industrials was 434.04, off 17 points at a point at 107.34, the 15 utilities 64.94, off 60.

Railroads fared less favorably. They touched a new low since May 3, 1954 and also met support which brought some up slightly but left the group under the previous close.

Utilities had a wide loss for a time when two of the issues suffered substantial losses, part of which was regained.

Wall Street reasoned that the latest Soviet satellite venture would spur our defense effort to the point where a military might again become a serious factor.

Aircraft—The missile makers—registered gains ranging to more than 2 points in Douglas and Martin and more than a point in the Lockheed.

American Potash rose more than 3 in the fertilizer. Chemicals, hard hit for a time, made strong comebacks, notably Du Pont which rose more than 4 points from its low.

International Nickel jumped 2 points from its low on declaration of a \$1.15 year-end extra, same as ordered last year.

Missouri-Kansas-Texas preferred ran up 2 points, at one time to feature the senior rails.

New York Central and Pennsylvania Railroad which announced studies looking toward merger over the week-end ruled firm all day.

That merger plan brought relief to the railroads' situation with earnings in a decline and carloadings tending lower.

The Associated Press reported that the ticker tape was late briefly at the opening on a pile-up of overnight sellers which brokers said was caused by nervousness over sputnik II.

Depressed by a number of stocks selling ex-dividend, the Associated Press average of 60 stocks dipped 40 cents to \$135.50 with the industrials up 40 cents, the rails down \$1.20 and the utilities down 60 cents.

Of 1170 issues traded, declines outnumbered advances by 583 to 349. There were 116 new lows for the year and one new high, Pennick & Ford.

Volume totaled 2,380,000 shares compared with 2,060,000 Friday.

LONG-RANGE U.S. BONDS SHOW WIDER PRICE GAINS

NEW YORK, Nov. 4 (AP)—Risks and industrial declines to lead the bond market moderately lower in fair volume today. United States Government Bonds were higher late with strength particularly evident in long-range issues.

Intermediate United States Treasury obligations rose 6.32 to 8.32 while longer term Government advances 12.32 to 16.32. Dealers said the market was thin, however, and no great volume of bonds changed hands.

Most grade issues were all on Japan 5 1/2's of 1975 advanced 1 1/4 at 90 in a sluggish foreign market.

COMMODITY PRICES

NEW YORK, Nov. 4 (AP)—Associated Press weighted average price of 100 commodities 185.47, down 1.17, 100-year average, 185.47.

Commodity prices, close, Prev. Close.

Business Outlook

DETROIT NOT ITS BOISTEROUS NORMAL

By J. A. Livingston

“WHAT do you think of the business situation?” The question was put to an economist of one of the major auto companies. “I don’t know,” was the prompt answer, “tell me first what happened this morning.”

That’s Detroit at this time of the year. When the stock market goes up, Detroiters are optimistic; when it declines, Detroiters are down in the mouth. When a rumor comes from Washington that the Federal Reserve Board is thinking, perhaps, of loosening credit, Detroiters become cheerful. Then, when they reread the speech of Alfred Hayes, president of the Federal Reserve Bank of New York, in which he said it would be a mistake to relax credit, they go into the doldrums.

Detroit has become a credit-conscious town. No use fancying up cars, adding gadgets, or zinging horsepower if people can’t get credit. Tight money is as much a crown of thorns to Detroiters today as the rigid gold standard was to William Jennings Bryan in 1896. The Federal Reserve Board, therefore, becomes an enemy of the economy, the consumer, and, perhaps, a progenitor of unemployment.

Because Stocks Dip. And so Detroit isn’t its boisterous, optimistic normal—with every word and gesture a sales brochure.

Forecasts for 1958 are being held back. The industry, caught overoptimistic in 1957, doesn’t want to be wrong again.

The stock market, itself, is worrisome. Not only does it raise fears of bad times ahead, but it has a direct impact on automobiles sales.

When stocks go down, people feel poorer. Husband and wife powwow: “Ought we make our 1956 do for another year?” Jewelers, furriers, and furniture dealers go through similar merchandising tortures whenever the stock market dips.

It’s now accepted here, as in Washington and Wall Street, that the country is having another readjustment. It seems to happen every four years, like Presidential elections.

Immediately after the war, in 1945, there was the reconversion readjustment. America got over that quickly.

Then, in 1949 business slid off. Unemployment rose to more than 4,000,000 briefly in early 1950.

In 1953, right after President Eisenhower took over, business had another dip. This was blamed on the Federal Reserve Board-Treasury policy.

Now, in 1957, prosperity is moving sideways. Once again, money is blamed.

Americans Great Scrappers.

If credit were easier, Detroit would feel easier. Yet, a statistical case can be made for a 1958 as good as, if not better than 1957 with estimated sales of 6,000,000 cars.

First, Americans are great car scrappers. About 4,000,000 passenger cars a year are junked. That replacement demand props the market.

Second, an increasing number of car-owners are getting

CORPORATE REPORTS

NEW YORK, Nov. 4 (AP)—Only income per share as stated by corporations is given in following table. In some instances companies with preceding years may show wide swings (gains or losses) which may be explained in cases of loss or largely reduced income some extending or substantial non-recurring cost, or temporary influence. These facts should be sought in detailed reports issued by the corporation.

ILLINOIS MAN DIES OF AUTO INJURIES

Adam Carich, 2937 West Twentieth street, Granite City, died today at St. Elizabeth's Hospital in Granite City of injuries suffered last Monday when he was struck by an automobile.

Carich, a laborer for the Illinois State Highway Department, was struck as he was working in the 2300 block of Nameoki road, Granite City. He was 66 years old.

Driver of the car was Robert Herzog, 4704 Kirkpatrick Homes, Granite City, police reported.

Herman Juergens, 6731 Idaho avenue, pulled his wife to safety from their station wagon yesterday after it caught fire following a collision in Illinois State Route 3 in Dupo.

Both suffered minor injuries and were taken to St. Mary's Hospital, East St. Louis.

Juergens, 48 years old, was driving north when his car was hit from the rear by a machine driven by Lester LaCroix, East Carondelet. The station wagon's fuel tank was punctured in the collision and the gasoline caught fire, special officer D. K. Hamilton of Dupo reported.

Hamilton said Juergens was thrown from the machine by the impact, but scrambled to it to pull out his wife. Juergens suffered a head injury and Mrs. Juergens suffered burns on the left hip, arms and legs.

Gene R. Hoss, 25, a bakery truck driver, suffered serious head injuries and a fractured back early today when the automobile in which he was a passenger went out of control and struck a highway marker on Mehl avenue, near Lemay Ferry road, Lemay.

Daniel E. Jakle, 6719 Michigan avenue, driver of the machine, who was uninjured, told St. Louis county police he was westbound on Mehl avenue when Hoss, sitting beside him, said he was in a hurry to get home and put his foot on the accelerator.

They were approaching a curve at the time, Jakle said, and the car lurched ahead, ran off the pavement and skidded 355 feet before crashing into the heavy post supporting a curve warning sign. Hoss was thrown from the automobile by the impact.

Bank Clearings. St. Louis bank clearings for Nov. 4 were \$119,400,000 compared with \$106,700,000 a year ago.

7 KILLED IN CRASH OF CHARTER PLANE IN DUESSELDORF

DUESSELDORF, Germany, Nov. 4 (UP)—A four-engined German charter aircraft en route to New York sideswiped a building and crashed in flames in a Duesseeldorf garden yesterday, killing seven persons and injuring six others.

The Karl Herfurter Airline DC-4 struck the roof of a building shortly after taking off from Duesseeldorf airport.

The dead included six of the 10 persons aboard the cargo aircraft and a woman whose hut was struck by the falling aircraft.

Among those killed was Karl Herfurter, owner of the small private airline; his daughter Resi, who was acting as stewardess, and chief airline pilot Karl-Heinz Stahnke. Stahnke's daughter, co-stewardess Doris Stahnke, was burned seriously.

65 ALGERIAN REBELS KILLED. ALGIERS, Nov. 4 (AP)—The French claimed yesterday that 65 Nationalist rebels were killed in four military engagements in rebellious Algeria in a 24-hour weekend period.

There was no estimate of French losses but 12 civilians, including two Europeans, were reported hurt in rebel attacks.

chinese, who was uninjured, told St. Louis county police he was westbound on Mehl avenue when Hoss, sitting beside him, said he was in a hurry to get home and put his foot on the accelerator.

They were approaching a curve at the time, Jakle said, and the car lurched ahead, ran off the pavement and skidded 355 feet before crashing into the heavy post supporting a curve warning sign. Hoss was thrown from the automobile by the impact.

ENGINE AFIRE, DC-4 LANDS SAFE IN WATER OFF BRAZIL

SAO PAULO, Brazil, Nov. 4 (AP)—With one of its four engines flaming, a Real Airlines passenger plane made a perfect belly landing in shallow water off the coast near here today. Thirty passengers and the crew waded ashore unhurt.

The plane, a DC-4 bound for Miami from Sao Paulo, caught fire 15 minutes after taking to the air.

Officials credited the pilot with preventing a tragedy by bringing the plane down into the water as close to the shore as possible. They said the water extinguished a fire that could have spread to the rest of the plane.

What's the difference between appetite and hunger?

What makes some people crave more food than their bodies can use up?

Are they really hungry—or do their appetites fool them?

How can you train your appetite to suit your body needs?

New facts about dieting—and how sugar helps control your weight

Q. Is it possible to eat only as much as you should, and still be satisfied?

A. Yes, it is. Sometimes people confuse appetite with hunger. Hunger has been defined as a need for food, appetite as a desire. The big difference is you can train your appetite, and re-educate it to match your real needs.

Q. Can you do it without starvation diets or drugs?

A. Doctors warn that drugs and drastic diets are advisable only in certain cases, and can be dangerous without proper medical supervision. Training your appetite is the natural way to control weight.

Q. What is the best way to start?

A. The leading nutritionists suggest this: Eat the same foods you are accustomed to, in good variety. Simply go light on portions. This plan includes sugar for several reasons. Most people like sugar, it supplies energy, and it helps in cutting down.

Q. How can sugar help you eat less?

A. You may remember, when you were small, your mother wouldn't let you have a cookie or a piece of

candy before a meal because you wouldn't eat all your dinner. Mother may not have known the scientific reason, but it is a fact that no other food stems the appetite faster than sugar. If you are trying to cut down on portions, a nibble of something sweet shortly before a meal may keep you from eating, at mealtime, far more calories than you need.

Q. What happens if you cut down too far?

A. You must remember that carbohydrate foods, such as sugar, are used primarily for energy—the kind of energy your body needs for every action, every heartbeat, every breath. When these foods are trimmed too drastically, nature sends out warning signals to slow down. You have a feeling of tiredness, of brain fatigue, even irritability.

Q. How can you help prevent this letdown?

A. Nutritionists have found that an Energy Break helps in mid-morning or afternoon—perhaps a piece of candy, cookie or a beverage with sugar in it. This is what is meant by “The Scientific Nibble.” Sugar is the quickest source of energy there is. Ounce for ounce, no other food supplies energy as fast, with so few calories.

Q. Would an artificial sweetener have the same effect?

A. No. Artificial sweeteners have no energy value whatsoever. What's more, they have little or no effect in weight reduction. In a 3-year study of overweight people at one of the nation's leading universities, it was found that people who gave up sugar and used artificial sweeteners lost no more weight than those who used sugar.

Q. How can I keep my weight down after I reduce?

A. Simply eat foods you like, in enough variety to provide a balanced diet. If you start to gain, eat a little less. Again, nutritionists say, don't cut out any one food. Enjoy sugar and the foods that make meals a pleasure. This way, you can live all your life with smaller portions, learn to feel satisfied with them, and actually improve your health!

WASHINGTON, Nov. 4 (UP)—Some influential congressional Republicans have warned the White House that President Eisenhower can expect less support from G.O.P. Congressmen next session unless he charts a more conservative course.

As a starter, informants said yesterday, these Republicans have urged that the President:

Abandon his proposed federal school aid program which the House has rejected twice.

Curtail proposals for other new federal spending programs.

Hold the size of his new budget below the peacetime record high of \$71,800,000,000 he proposed last January.

Unless these recommendations are heeded, G.O.P. sources said, some Republican leaders may be ready to make a strong protest, where they will meet at the White House next month to get a secret preview of the President's 1958 legislative program.

Some congressional leaders were targeted for considerable grumbling last session from conservative members who felt their views were not being presented to the president.

"There's dissatisfaction," one of them said, "but the majority, which remained below the surface last session—shows signs of increasing, rather than abating."

"It's a safe bet," one inside source said, "that the Republican congressional leaders are going to be more demanding where they hold their weekly meetings on legislation with the president next month."

"There'll be less 'yes, yes, yes' and more 'no, no, no,'"

from the leaders next year than there was this year," Representative Richard M. Simpson of Pennsylvania, chairman of the G.O.P. congressional campaign committee, has become a central figure in the drive by conservative Republicans to remold the party closer to their principles.

Simpson recently called on Republican candidates for Congress to drop President Eisenhower's coat-tails and "make known" their opposition to administration policies with which they disagree.

Simpson, a conservative, is regarded by many House Republicans as a leading candidate for the post of Republican House leader when Representative Joseph W. Martin Jr. (Mass.) retires.

The White House was known to be concerned over the stand taken by Simpson and has arranged to keep posted on the views he expresses in speeches throughout the country.

Red Arms Deliveries to Syria Indicate Elaborate Soviet Plot For Another Mideast Gamble

Turkey Has Simple, Logical Answer to Reason for Staggering Totals: Russians Themselves Mean to Use Supplies if They Dare.

By JOSEPH ALSOP

ANKARA.

THE DUST CLOUD Nikita Khrushchev raised over Turkey is rapidly subsiding, presumably as one result of the Kremlin's inner turmoil. Unfortunately, the end of this artificial crisis does not in the least alter the ugly evidence that the Soviets have been making elaborate preparations for another Middle Eastern gamble.

In brief, the Soviet deliveries of military supplies to Syria staggeringly exceed the utmost imaginable requirements of the Syrian armed forces. Thus the question arises, "Who is going to use these vast stockpiles?" The simple Turkish answer is that the Russians themselves mean to use them if they dare. The Red Army has about 20 airborne brigades. They can be put down in Syria in a matter of hours. A ready-made base now exists for them there. They can easily be called in by the Soviet's Syrian puppets, when the time is ripe, to "aid in repelling aggression."

The only logical purpose of the dust cloud raised around Turkey is to give a little color of justification to this kind of Syrian call for help. The dust cloud is there. The ready-made base that can only be useful to Soviet forces is there too, organized at lavish expense. Anyone who wishes to reject the Turkish explanation as too lurid, at least has the duty of finding another explanation that fits the facts equally well.

Facts in Figures. This is not easy to do, as the figures of supply deliveries to Syria clearly prove. Here, one must add, most people at home seem to have been studying the wrong statistics. The Soviets have indeed given the Syrians a hundred or more jet fighters, probably MIG-17s, a couple of hundred T-34 tanks, and an undetermined number of heavy Stalin tanks. In the context of the Middle Eastern situation, these are important quantities of advanced weapons. But they are not much beyond reason if the Soviet aim were merely to please their Syrian army friends with plenty of glamorous military toys.

What is really beyond reason is the bulk movement of military equipment into Syria in the last months. The movement began in March and gathered momentum in April and May. It has been going on ever since.

By Turkish estimates, two to three shiploads of supplies are now being unloaded every day at the Syrian port of Latakia. Certainly these estimates are conceivably correct, since they would account for only one third of the heavy movement of Soviet freighters through the Bosporus that has been going on all spring and summer.

Western estimates are more conservative than those given

WARNS LIVES ARE AT STAKE IN REFUGEE PROGRAM

BEIRUT, Nov. 4 (AP)—Arab oilmen meeting in Baghdad are considering a plan for a joint stock company to finance future Middle Eastern pipelines with the Arab governments as the only stockholders.

Saudi Arabia has been studying this proposal since May, when a report was made by an American technical adviser and the Saudi director of petroleum affairs. The text of their recommendations became available from a private source here yesterday.

Basically their idea is that the transport of oil by pipeline instead of tanker produces huge profits and that these profits should be made or shared by the countries through which the pipelines pass rather than by outsiders.

The Arab oilmen called attention to the meeting in London May 13 to 16 in which eight leading United States, British and French oil companies and other lesser considered plans for a network of pipelines to terminate at some Turkish seaport. It would be planned to carry 1,400,000 barrels daily to handle the increased European demand expected by about 1960.

OPPOSES ARABS PAYING UNEF

CAIRO, Nov. 4 (UP)—The Arab League political committee rejected United Nations Secretary Dag Hammarskjöld's proposal that Arab countries help pay for maintaining the U.N. Emergency Force in the Gaza strip.

The committee approved a resolution forming a united Arab economic front to "combat European economic unity in its aggressive intentions in relation to the Arab economy."

PRESIDENT TO SEE KNIGHT, POSSIBLY ON SENATE RACE

WASHINGTON, Nov. 4 (AP)—

The White House announced today that President Eisenhower will confer tomorrow with Gov. Goodwin J. Knight of California. Arrangements were completed amid reports Knight will pull out of the race for re-election as governor and run instead for the Senate.

Anne Wheaton, associate presidential press secretary, told a press conference that Knight had asked to see the President. She said in reply to a question that she had no idea of the purpose of the conference. She said there are no plans for Vice President Richard M. Nixon, also a Californian, to sit in at the Knight conference with Mr. Eisenhower.

In Sacramento, Calif., it was reported the White House meeting will be followed by an announcement that Knight will run for Senator instead of governor in next June's primary election.

A switch by Knight would leave Senator William F. Knowland alone on the Republican side of the ticket. Attorney General Edmund G. Brown is the only entry on the Democratic side. There has been no comment from Knight's office on the reports.

CYPRUS GREEK-TURK CLASH

NICOSIA, Cyprus, Nov. 4 (AP)—

Turkish Cypriot police clashed with stone-throwing Greek Cypriots in the village of Pano Arodhes yesterday. Officials said at least three Greeks were injured, but there were no casualties among the security forces.

Headquarters here said the clash occurred when about 300 villagers attempted to parade from a church to the cemetery for a ceremony at the graves of some Eoka rebels. Ordered to disperse, the villagers answered by stoning the police.

AMERICAN MARRIES RUSSIAN WITH OFFICIAL APPROVAL

MOSCOW, Nov. 4 (AP)—

John N. Sandor, a 42-year-old former United States Navy fighter pilot from Pueblo, Colo., married his Russian sweetheart, Victoria Katsarova, Saturday night after appealing to Communist party chief Nikita Khrushchev and Marshal Georgi K. Zhukov.

The pair rushed into the ceremonies after receiving word from Soviet officials that their wedding plans had been approved.

Sandor met Victoria, a Soviet hotel employee, in July 1956, when he came to Moscow with a visiting group. After Sandor returned to the United States they wrote letters and talked by trans-Atlantic telephone. Sandor tried to return to Russia in October 1956 but the

Hungarian uprising intervened and he could not get a visa. Finally, Sandor wrote to Khrushchev and Zhukov. Six days later, the Soviet embassy notified him his visa had been granted and Sandor returned to Moscow.

SPANISH-LEBANESE ACCORD

MADRID, Nov. 4 (AP)—

President Camille Chamoun of Lebanon and Gen. Francisco Franco reached complete agreement on Middle Eastern problems in recent talks in Madrid, the foreign ministry said last night.

The talks took place during Chamoun's state visit to the Spanish capital Oct. 28-31. The announcement said the two chiefs of state agreed to strengthen their collaboration for peace in the Arab nations and the Mediterranean area.

FLEESON

White House Shows Signs Of Concern

Democrats, Once Ignored, Getting Warm Welcome in Capital.

By DORIS FLEESON

WASHINGTON, Nov. 4

In various ways the White House now is conceding that the President's fabulous luck has begun to turn, that the problems confronting him will not be solved by the old Milken approach and that his relations with the Democratic congressional majorities will be difficult.

Disagreeable situations are being acknowledged even when they cast doubt on the Administration's management of affairs. The President himself is going on the road in an effort to reassure the country about its security, its foreign policy and its domestic stability.

Democrats returning to the Capital find themselves being welcomed politely by government departments, including State, which once ignored their travels and treated their proffered views as the height of presumption. This change is so pronounced that some Democrats believe it must be the result of a White House order.

Senator Alarmed

One Senator confesses that for the first 24 hours he felt quite set up over the prospect that he would no longer be treated like an upstart child.

It occurred to him, he explained, that the Administration must be really worried and that since it has superior sources of information, perhaps there was even more to be learned than was generally realized.

Another sign that improvement in White House relations with Congress appears now desirable is that some of the men to whom the Democrats are most allergic are being shifted to other posts or have retired. This group includes Attorney General Herbert Brownell Jr. and Arthur Larson, leading exponent of modern Republicanism. Both had played at the McCarthy game of pinning the Communist tail on the Democratic donkey.

Two cabinet members remain, however, whose departure would set many Republicans

Some Think Marshal's Prestige Would Have Soared and He Could Not Have Been Demoted.

By DREW PEARSON

STATE DEPARTMENT officials who know the inside of how John Foster Dulles persuaded President Eisenhower not to invite Marshal Zhukov to Washington last summer, figure that history might be different today if Dulles's persuasion had not prevailed.

A trip by Zhukov to Washington would have so enhanced his prestige with his people that he could not have been demoted.

What happened was that last summer the President wanted to invite Zhukov to Washington for a talk aimed at improving Russian-American relations. This was confirmed by the President at a press conference. But Dulles talked the President out of the meeting.

At that time both Chancellor Adenauer of Germany and the British were worried about any moves which looked like too much friendship between the United States and the U.S.S.R.

Harold Stassen in London had been talking disarmament with the Russians privately, and the British and Germans protested to Dulles. So the Secretary persuaded President Eisenhower not to issue the invitation.

Allen Dulles, head of Central Intelligence, was caught off base in the showdown between Zhukov and Nikita Khrushchev.

About two days before Zhukov was relieved, Allen Dulles sent a report to the White House expressing the view that Zhukov was coming up fast and might head a new military dictatorship in six months. He had grabbed the secret police, Allen Dulles said, and seemed sure to take over Khrushchev's job.

Last month, furthermore, speaking in San Francisco, he said that Russia was disrupted by political cross-currents and that Khrushchev seemed headed for trouble.

On one basic point, of course, Allen Dulles was right. Zhukov was grasping for power. But what Dulles underestimated was Khrushchev's ability to cope with this.

As far as can be pieced together from various sources, here are the events which

President Eisenhower's bridge and business partner, George Allen, is quite upset over the President's sagging popularity. Allen is a professional presidential crony, who has been a White House intimate of Presidents Roosevelt, Truman and Eisenhower.

Lately, Allen has been complaining to friends that Mr. Eisenhower takes too much of his time. Always alert for the future, Allen has placed a big, new picture in his office—an autographed photo of Vice President Nixon.

WHAT DO YOU NEED FROM Central Hardware

PEG-BOARD SALE

Space-Stretching, Clutter-Ending Pegboard Can Be Used In the Kitchen, Den, Playroom, Basement, Work-Room! Keeps Everything Orderly and At Your Fingertips!

COMPLETE ASSORTMENT PEG-BOARD HOOKS

To hang everything from scoop to nuts! COME IN PICK 'EM OUT!

LETTERS FROM THE PEOPLE

Not Federal Business

To the Editor of the Post-Dispatch:

The Census Bureau seems determined to include a question on religious affiliation in the 1960 census.

The Bureau contends that the question is proper because the information is "confidential" and would be used only for "statistical purposes"; is no worse an invasion of privacy than inquiring about age, income or education; and that the statistics "are needed by Government for developing and administering its various programs."

Undoubtedly information about religious preference would be helpful to churches; but the short answer is that our Government is prohibited from being helpful to churches.

Nor can the Census Bureau find any competency to enter the religious field by balancing of degrees of noisiness. A religious category of statistics is outside the business of government. The First Amendment prohibits the administration of any governmental program concerned with religion.

So why should the Census Bureau spend the taxpayers' money gathering information the Government can't use?

James Madison, who wrote the First Amendment, repeatedly pointed out that our Government has no jurisdiction whatsoever over religion. Our fourth President's concept was not designed to handicap religion.

On the contrary it represented a deeply religious view held by such devout Christians as Roger Williams, Jonathan Edwards, George Whitfield, John Leland, Samuel Stayer and Isaac Backus.

Leland said that "Government has no more to do with religious opinions of man than with the principles of mathematics."

When the Constitution was submitted it was criticized because it not only prohibited religious inquiries of candidates for public office, but deliberately omitted any invocation to God.

Oliver Ellsworth, later to be Chief Justice of the United States, replied to this criticism: "Civil government has no business meddling with the private opinion of the people."

In the face of this, what difference does it make whether a religious census would be of value to the churches?

VICTOR B. HARRIS.

They Sure Did

To the Editor of the Post-Dispatch:

Lucky little beavers, don't you think?

Stayed out of the doghouse by NOT being me!

LILLIAN L. BODINE.
Kirkwood.

Allies at Any Price

To the Editor of the Post-Dispatch:

Hanson Baldwin's article on Spain's armed forces fails to answer some very basic questions implicit in any discussion of the military strength of Spain.

A great deal of pride is taken in the fact that American guns, boats, jets and tanks are doing a good job of "modernizing" Spain's forces. But there is little room for pride when we ask against whom these weapons are to be used; the only enemy Spain's government has is its people.

Mr. Baldwin neglected to mention that these arms have very recently been used to put down strikes in northern Spain and to disperse University of Madrid students who were demonstrating during the Hungarian revolt. Spain wants no arms, it wants freedom.

Mr. Baldwin might have reported that only several weeks ago Dictator Franco said of Sputnik—that in order to do great things a nation needs "political unity and discipline," such as in Russia, and must "not be divided and without order."

PEDRO CUATRECASAS,
EDWARD TRUJILLO,
Washington University.

It is not comforting to consider that the United States has, in effect, taken the place of Nazi Germany and Fascist Italy as the bulwark of Falangist oppression in Spain by supplying the arms and encouragement by which Franco's "land of enchantment" is held together.

To me this action reveals the frantic and panic stricken efforts of our State Department to win allies at any price.

Such a posture certainly discredits President Eisenhower and Secretary of State Dulles as "moral crusaders."

The point to be made is that Spain is not threatened by any power but that of the wrath of the Spanish people, and their target is not Spain but 18 years of Franco, his functionaries, and the Falange.

BERNARD BORTNICK.

Washington University.

'The Innocent are Dead'

To the Editor of the Post-Dispatch:

Dr. Werner von Braun has been given the highest decoration the United States Army can confer on a civilian. This Von Braun is the same man who made the most deadly weapon of World War II for Germany and was personally responsible for the deaths of thousands of our allies and American soldiers.

The innocent are dead. Their executioner lives in luxury, honored and feted by the country which sent them to their death.

B. H. COHEN.
Richmond Heights.

Second Chapter

Russia's second earth satellite opens a new chapter of Western society's agonizing reappraisal before the first has been finished. It is a painful experience to descend from assumed superiority to the level of the second-best. Yet if the experience induces a greater candor of self-examination it will have its rewards.

The military implications of Sputnik II, carrying a living creature a thousand miles aloft, are staggering. The half-ton weight of this satellite, and its more distant orbit, argue powerfully that Soviet missile technology is highly advanced, even may have achieved some spectacular breakthrough in the problem of fuels.

But there is a deeper meaning beyond the military, one that challenges us to re-examine our whole scale of values and the very bases of our society. It has long been assumed that a totalitarian society could not climb the pinnacles of scientific and industrial achievement. Now we know that certain pinnacles can be climbed by such a society. Soviet scientists evidently have been granted the freedom necessary to great creative endeavor within a framework of political autocracy.

What is it our own society lacks that enabled the Soviets to march ahead? To say that we do not respect science is manifestly untrue. Science has been a demi-god in this country for 50 years. Public interest in it, however, has been diffuse and undiscriminating—almost as much impressed by the research for a new toothpaste as by the exploration of the nucleus.

At bottom it is not science, not technology and certainly not industrial power that American society lacks, but the habit of directing these skills toward national ends. We so dedicate them in war and other great emergencies, but in peacetime the demands on productive and creative energy are allocated not according to a national plan based on social objectives but according to the random claims of unorganized individuals.

This is only another way of saying that ours is a free-enterprise society. Breasts are being beaten because the Russians build satellites while the United States builds new models of automobiles trying to look like rockets. It is fair to recognize, however, that we build new cars because our society and economy are organized to fill such personal demands first and collective or national demands second. It is also imperative to admit that new cars are one expression of the high standard of living we rightfully take pride in. A society that goes hungry and ill clothed in order to build satellites has a challenge of its own to face.

What is the answer? Some voices inevitably will be raised for the adoption of totalitarian techniques in order to duplicate totalitarian achievements. America has proved over and over again that we need not accept that defeat. What we need is a proper balance between individual and general purposes. We need to recognize that private enterprise cannot supply all our wants—cannot produce satellites, for example. We need a determination to engage in that degree of national planning which is essential to great national achievement.

Let us grant freely that the Soviets are making a most impressive demonstration of their ability to organize scientific and industrial skills, and to direct them into national channels. Our task is to organize our resources for social ends without sacrificing political freedom or individual welfare—and to do so, not in order to "beat the Russians," but to elevate the lot of man.

The Key to the Treasure

A young undergraduate once wrote to the Post-Dispatch that the colleges were teaching their students everything except how to express themselves. We imagine he would be gratified by the announcement that Rutgers University has made it a requisite of graduation from its college of arts and sciences that a student must be able to write clearly, as demonstrated by passing a basic course in the fundamental principles of composition. A graduate who is unable to communicate his learning clearly to others is like a locked treasure-house without a key. Articulate for college graduates can be expected to lead not only to more successful and happy living, but also to better teaching when they take it up, which in turn will produce better students in a benevolent circle.

Tragedy of France

The machine-gunning of a French senator in the streets of Paris is but one indication of the gravity of the current governmental crisis. The man was attacked by partisans of the rebels in Algeria, where he had large holdings. These pro-Algerian gangsters already have perpetrated 589 killings in Paris this year. While the victims generally were members of rival North African factions, the murders indicate nevertheless how colonial terrorism is spreading to France itself.

Directly or indirectly, the Algerian struggle is at the root of most other French difficulties. To the expense of three years of this war—not to mention Indochina and other troubles which preceded it—can be traced the lack of enough francs to pay internal bills and enough gold to meet international obligations.

These fiscal stringencies, in turn, are related to the inflated cost of living which has led to serious strikes in the capital and other parts of France. And these strikes mean not only garbage in the streets and interruptions of local transit, but also industrial tie-ups and stoppages of government services which might alleviate the crisis.

The French press as well as foreign diplomats regard the situation as the most critical faced by France since World War II. In some quarters there have been open appeals for a virtual dictatorship under Gen. Charles de Gaulle. While the General has returned to Paris from his self-imposed exile, he has been discreetly silent. Whether he is holding himself aloof from temptation or biding his time only he can say.

Meanwhile former Premier Mollet, regarded as the most likely man to form at least a caretaker government, has been unable to do so. President Coty has persuaded former Finance Minister Felix Gaillard to try to put together an acceptable cabinet. He accepted the mission a few days before his thirty-eighth birthday, saying that he would insist on stringent economic reforms. Whether he succeeds where more experienced men have failed remains to be seen.

French political theorists frequently have said that Americans and Britons exaggerate the rise and fall of cabinets in Paris. They have pointed to the vast, able and highly centralized French civil service, which is supposed to carry on, premier or no premier. But how can this bureaucracy meet, for example, the appeal of the

Algerians to the United Nations? Can this splintered situation continue for another three years, the remainder of the life of this Assembly? Yet new national elections cannot be decreed—legally. Nor does it help to have Frenchmen grumbling about "revolution." Political France must "pull itself together." Under the constitution of the Fourth Republic—which centers no positive power anywhere in the government lest somebody be victimized—this effort calls for a resurgence of disinterested patriotism.

The tragedy of the worsening disorder is that it stems from no serious material shortcoming, but from an excess of self-centered politics. This has favored short-sighted policies, and then frustrated even them.

Behind the License Tax Scandal

That License Collector Joseph T. Hayden handed out jobs in his office to faithful Democrats bearing notes from influential ward bosses is not at all surprising. As a matter of self-preservation, he had to. In effect those jobs purchased ward support in the Democratic primaries for Mr. Hayden himself. Without such support he would be just another politician out of work.

Undoubtedly Mr. Hayden's employment practices are far from unique among the Democratic ward chieftains who control others of the city's so-called "county offices." We refer specifically to Sheriff Martin Tozer, Collector of Revenue Del L. Bannister, Recorder of Deeds Anthony J. Denny and City Treasurer John J. Dwyer, as well as the various Magistrates and Constables, among others. They supply the patronage that Mr. Dwyer once called the "life blood" of the Democratic party apparatus.

A similar situation exists among these same administrative offices in St. Louis county, with the exception that there it is mostly the life blood of Republican party patronage that is enriched.

Nor is it at all surprising that several of Mr. Hayden's employees suffer the stigma of police records. Quite apart from the fact that in times of full employment these are hardly the most attractive jobs to the ambitious, Mr. Hayden plainly had to hire those applicants who had the right connections, regardless of qualifications. To do otherwise would be to jeopardize his own scalp, and no politician ever is going to do that.

Mr. Hayden's office and most of the others in the city's "county" or state-controlled layer obviously ought to be merged with the municipal corporation under the Mayor, and their workers hired on the basis of merit. These independent administrative offices in St. Louis county ought to be made appointive under the Supervisor and the workers placed under a merit system.

In St. Louis's case legislative action is necessary. That is an objective easier to talk about than to attain—especially since most of the city's State Senators and Representatives are political cronies of Mr. Hayden and may even be recommending workers to him from time to time. But until it is attained the taxpayers can fear scandals in these offices.

Chance for the Railroads

The estimated cost of relocating the riverfront railroad tracks to make way for the sky-scraping memorial arch has been cut by roughly two-thirds. A Terminal railroad study fixes the cost under the recently revised plan at \$5,610,000, and conceivably this may be "shaved" a bit. The estimated cost under the old plan was about \$14,000,000. The slash should be a very effective stimulant for the completion of the national memorial.

In view of the existing agreement that the cost will be shared by the railroads and the federal and municipal governments, the amount to be paid by each now must be determined. Congress has stipulated that not more than \$1,875,000 of the currently available federal appropriation of \$2,640,000 shall be used for this purpose. Since this represents more than one-third of the total, and since it seems desirable that all further federal funds should go toward completing the project rather than for preliminaries, the figure should stand as a ceiling over Washington's share.

That leaves at least \$3,735,000 to be met by the railroads and the city. It does not seem unfair to expect the Terminal and the Missouri Pacific to meet the greater part of this. After all, their tracks are on public property. Meeting the greater part of the cost would be a relatively modest "fee" for this convenience. It is less than the relocation expenses to which some railroads have been put in connection with redevelopment projects in other cities. And if it is true that the roads contribute to the city's economic welfare, it is equally true that the commerce and industry of St. Louis provide the backbone of the roads' earnings.

The main thing is to get the work under way so that the National Park Service can meet its target date: 1964, the two-hundredth anniversary of St. Louis. To this the railroads can make a fair contribution at the Nov. 15 meeting with Mayor Tucker and National Park Service representatives by coming to a quick and satisfactory agreement as to their share of the bill.

Army Reserves Should Be Ready

It has been abundantly apparent for a long time that the training program of the Army Reserves is not all it should be. And one of the principal reasons is that the program is almost entirely based on World War II concepts. It is to the credit of Assistant Secretary of the Army Hugh M. Milton that he brought this deficiency into the open before the Association of the Army convention last week in Washington.

He urged that the Army Reserves be reorganized and trained for atomic age warfare, adding that it would take several years for them to attain the desired state. That is far too long a time. The Reserves have been cited as a "ready" force and their members advertised as "minute men." But now a high ranking civilian member of the Defense Department admits publicly that they cannot carry out their role.

Secretary of the Army Wilber Brucker and his chief of staff, Gen. Maxwell Taylor, should follow through on Mr. Milton's review of the plight of the Reserves. The Army has a National Guard bureau and a Reserve bureau headed by high ranking officers. Why have they not seen that the training has been proper for an atomic age which dawned more than 10 years ago?

The Army Reserves are now getting plenty of recruits with six months of active duty under the 1955 Reserve Forces Act. They are sufficiently trained so that, as Mr. Milton says, their commanders could go ahead with a hard-hitting program to fit them for atomic warfare. Somebody is grievously at fault and the taxpayers' money is being wasted until these men get the advanced training they should have.

SOMETHING SMELLS IN RAT ALLEY

Mr. Nixon Steps Out

With 1960 campaign growing closer, Vice President has begun to speak his own mind, writer says; until now he has been spokesman for others; first tentative statements suggest he will not be 'modern Republican'; more conservative.

The Mirror
of
Public Opinion

Vermont Royster in The Wall Street Journal

Vice President Nixon is beginning to stretch—if not to sever—the ties that bind him to the political policies of the Eisenhower Administration. Mr. Nixon, quite evidently, is ready to step out on his own.

There have been two striking illustrations of this recently. One was his private appearance before the National Conference of Editorial Writers in Oklahoma City. The other was his public address on foreign economic policy before the International Industrial Development Conference in San Francisco.

On both occasions Mr. Nixon was careful to stress the continuity of the framework of present Administration policies; the Vice President is too loyal to the President—and too shrewd politically—to say anything that would "clash" openly with Administration policy. Yet within those bounds Mr. Nixon on both occasions stepped out independently.

The political significance of this move ought to be plain. As everyone knows, Mr. Nixon has already put an end to the picture of the Vice President as a dim figure in government, almost a nonentity.

With an Eye on 1960

But up to now his role has been that of spokesman for policies set by others; his own ideas have been submerged. No one knew what Mr. Nixon himself thought. This is an obvious political weakness for a man who has his eye on 1960. So what he is now clearly setting out to do is to slip out from under the shadow of President Eisenhower, demonstrate that he is a man of independent mind and become a national political figure in his own right.

This is at best a difficult political maneuver, requiring the finest of judgments, for he must put his own stamp on things without marring the record of the team of which he is a part.

Mr. Nixon's appearance before the editorial writers' conference was informal. As a piece of showmanship, it was a virtuoso performance. For more than two hours the Vice President answered questions on a variety of subjects, and his answers were not perfunctory. Whether the question was about Little Rock or Sputnik, Mr. Nixon had at his fingertips an incredible array of background information, which moved one listener to remark that he must have a punch-card memory. Few men in public life—if any—could have made such an impression on such a group of a man who knew exactly what he was talking about on so many matters.

'Good Political Salesmanship'

That alone made it good political salesmanship; and that, doubtless, is what Mr. Nixon intended. Since he did not indulge in the press conference type of over-simplified answers, the picture he offered of himself was that of the well-informed man with thoughtful replies to serious questions.

But there was more to be noted about the performance than its showmanship. Before long his listeners had the feeling that he was often putting a somewhat different emphasis on things than might have been expected if he were simply parroting a "party line."

The Vice President gave the impression, for instance, that he has been ahead of the Administration in thinking about labor legislation. At any

rate he was more outspoken than any other executive official has been on the need for legislative restrictions on unions. He did not appear frightened by the myth that touching the power of union leaders is political suicide. There was also a suggestion that he thought the defense program needed a more agonizing reappraisal than it has yet received. His view of the Russian missile developments, while by no means alarmist, is definitely a more serious one than that suggested by the official statements in Washington. By implication at least he suggested there should be some changes in the allocation of funds and efforts of the defense program toward more research and development of new weapons, always with an eye on the Government's fiscal integrity.

As to a Cut in Taxes

The Nixon emphasis on federal fiscal integrity, in turn, seemed heavier than that placed there by some others in the Administration. Other Republicans may be talking hopefully about tax cuts—Mr. Nixon made it plain he would not favor them if they increased the Government's financial difficulties.

His approach is different too on foreign aid. This point of view was expressly put in his more formal speech in San Francisco. Mr. Nixon there said all the expected things about the virtues of the Government's wholesale foreign aid program. But having paid his obeisance to this necessity, the whole of the rest of his speech was devoted to ways and means of encouraging a flow of private capital from the United States to the underdeveloped nations and of seeing that even the United States Government money is channeled into private enterprise abroad.

All these thoughts were expressed with the utmost diplomacy. There was no overt criticism of any Administration policy or any Administration official. Emphasis is the only word that describes the difference. But that could well be a very great difference. And the fact that he has begun to make such differences suggests that he is speaking his own mind.

Away From Catchphrases

It is perhaps too early to discern just what his own mind is on all of these matters. But it is interesting that he has begun to use such phrases as: "Government capital is in a sense crisis capital." The only source of investment funds that can be greatly expanded is private capital. . . . There are limits to what government can do. . . . The limit (is) imposed by budgetary problems. . . . The most productive source of progress is private rather than government enterprise. . . . These are definitely not the catchphrases of what has come to be called modern Republicanism, with which the Administration has been identified and, up to now, Mr. Nixon also. So does it mean that he has begun to make such differences suggests that he is speaking his own mind.

NOTE FOR ORATORS

From the Des Moines Register.

Aneurin Bevan, Labor member of the British House of Commons: "When I consider all the things I ought not to say and all the ground I should not put my awkward feet on I am not quite certain what territory is open to me at all."

Between Book Ends

Newly Patented Eden

NO DOWN PAYMENT, by John McPartland. (Simon and Schuster, 312 pgs., \$3.95.)

John McPartland rigged and planted a fictional bomb entitled "No Down Payment." It went off recently somewhere in a mountainous stack of newly-published American novels and left at least one reader shaken and incredulous.

Four homes lie back to back in a giant, sprawling housing development called Sunrise Hills, California. Their owners are a miscellaneous and unnatural assortment of neighbors. The surface interlock and interplay between these couples is of a casual nature, but bears the unmistakable seeds of violence.

Each couple has a personal as well as a community problem. These are dramatized in a thorough and well-insightful manner. Jean Martin is too nearly perfect, too beautiful, too full of pride. Her husband, David, has more talent than drive. Jerry Flagg, "who never smiled deeper than his face," demands only the sensual satisfactions of life. His wife Isabel has been torn to her husband's level.

Betty Kreitzer believes the teachings of her church implicitly. Her husband Herman is a religious man in his living practices, but has rejected church observance. Troy Noon has a will-to-cruelty which has been nourished in the Army. His wife, Leola, is an unhappy child who does not "belong."

The author invests the inhabitants of this newly-patented Eden with an outsize measure of love, hate, jealousy and fatalistic contentment. Beneath the surface of the story (and possibly that of McPartland's consciousness) Troy Noon represents totalitarian man (insofar as there is such a person) while the other three men appear as different aspects of Democratic Man.

McPartland takes time out mid-book for a couple of vigorous pokes at historian Arnold Toynbee. David Martin calls Toynbee "a nice, old scholar without any understanding of history at all." He adds that such elements as coal, oil and hydro-power have "poor Toynbee" entirely befuddled. From this one might gather that the author has a hidden urge to interpret history himself, as indeed he does in "No Down Payment." He confines himself, however, to that segment of history which relates to the Here and the Now. He exposes the evils inherent in a society paid for on the installment plan and rooted in mass conformity. He strips away the veil of false virtue from ivory-towered trellises from Levittown to Glasgovo Village.

"No Down Payment" is often overcharged with drama and ends with a bloody, bare-knuckle brawl which permits church, sex and business virtue to emerge victorious. These shortcomings do not appreciably diminish the novel's considerable head-on impact.

ROBERT FRIEDMAN.

Reminders of Home

TWELVE AROUND THE WORLD, by Maureen Daly. (Dodd, Mead, 239 pgs., \$3.50.)

This is a book about 12 youngsters in their teens whom the author visited in as many countries, from Nigeria to Iceland. Formerly a newspaper and magazine staffer, Miss Daly has a knack for including the pertinent detail and the illuminating sidelight, and her subjects emerge as appealing human beings, living in real places.

Everywhere, for the American author, there were reminders of home—in Ibadan, Nigeria, the largest all-Negro town in the world, there is a shop called Hollywood Starlet Dress-makers; in Portugal, the favorite movie star is Gregory Peck; in Iceland, the teen-aged host drove his father's Oldsmobile.

An up-to-date report, in the children-of-other-lands genre, for teenagers. ETHEL STRAINCHAMPS.

WALTER LIPPMANN

Dulles Should Face Mideast Facts

WASHINGTON. WHEN KHRUSHCHEV WENT to that cocktail party at the Turkish embassy, he toasted peace exuberantly and repeatedly. So it looks as if, for the time being, the heat has been let out of the Turkish-Syrian crisis.

This will confirm the opinion of those who have been planning to make war on any one else, and that it was a misreading of the game of power politics to suppose that Turkey or Syria, that Russia or the United States, was getting ready to move. It would, however, be a serious mistake to conclude from this that because war is not impending, the Syrian situation is not a very serious one.

Syria is a dangerous place for the world because so much is at stake for all the great powers at a time when the Syrian government is weak, unstable, and not the master in its own house.

The controlling fact is that the Syrian government cannot be depended upon to maintain its independence and to hold to a policy of neutrality.

Problem of Weakness.

If it could be depended upon to do this, Syria would break out of the vicious circle of great power politics. Because the government is weak, the great powers have all concluded that Syria will fall either into the orbit of the Soviet Union or into the orbit of the United States.

This being the basic problem, the Syrian plots and counterplots, abroad and at home, are full of dynamite. They should not be monkeyed with by anyone who is not sure that he can control the consequences.

For a New Start.

If, as Khrushchev's gestures at the Turkish embassy indicate, there is to be a lull in the cold war over Syria, would it not be the part of wisdom to regard it as an opportunity to attempt a fresh start in the Middle East?

If this is to be done, Mr. Dulles will have to overcome his own obsession, which is reflected in the Eisenhower Doctrine that most of the Arab countries can be, or at least should be, aligned in a com-

mon military front against the Soviet Union. Mr. Dulles will have to open his mind to the idea that most, if not all of the Arab countries, do not wish to expel either Russia or the United States from the Middle East.

It is evident to them that they have much more to gain from the two great powers competing than from the exclusive influence of either one of them. If this is correct, and I have no doubt it is, Mr. Dulles has no chance to succeed in the Middle East if he refuses to accept the fact that the Soviet Union is a principal power—a power which cannot be expelled and excluded, which must be balanced and negotiated with.

Change in Oil Deals.

We should, it seems to me, have it clearly in mind that we are on the threshold of a new situation in regard to the oil in the Middle East.

This is often taken to mean that the Arab countries, infiltrated by the Soviet Union, may attempt to ruin Western Europe by depriving it of access to the oil.

Theoretically, that could happen if we take the simple view that Russia may conquer and occupy the oil countries. But in fact, this is not likely to happen since it would precipitate a world war.

What is likely to happen is that the Arab countries, using Soviet influence as a lever, will attempt to force the Western oil companies to a radical revision of the existing contracts.

Seeking More Profit.

The Middle Eastern countries have no interest in cutting off the export of oil to Europe. On the contrary, it is their vital interest that the trade should continue. They will seek, both the oil-bearing countries around the Persian Gulf, and the transit countries like Syria and Egypt, is a bigger share of the profits of the oil business. The time is not far distant when we should be well prepared, first intellectually and then in our diplomacy, for what lies not far behind the current events.

NAMING OF BOARD
URGED FOR CITY'S
200TH BIRTHDAY

Mayor Raymond R. Tucker was urged by a Missouri Historical Society committee today to appoint a bicentennial planning commission for observance of the city's 200th anniversary in 1964. It was on Feb. 15, 1764, that Auguste Chouteau came upriver with a party of workmen to establish a trading post here.

A committee of the historical society's board of directors, headed by Robert W. Otto, called at the Mayor's office to present a resolution asking that studies be started now toward observing "an anniversary of major importance" in the development of the Mississippi valley and the Far West.

"It is also to be hoped," the resolution said, "that the year 1964 can become a target date for completion of the Jefferson National Expansion Memorial project, as well as other current projects for improvement and beautification of the city."

The committee, which included Charles van Ravenswaay, director of the historical society, pointed out to the Mayor that the observance might appropriately call attention not only to the city's past but to its success "in meeting the needs and challenges of our own time."

TALK ON POSTAL PROBLEMS

Paul A. Nagle, president of the National Postal Transport Association, will speak at a meeting of the St. Louis branch of that organization tonight at 7:30 o'clock at the Gallagher Veterans of Foreign Wars Post, 3437 Henrietta street.

Nagle is making a nationwide tour of N.P.T.A. branches. He will speak on "Declining postal service and postal salaries."

SCIENCE TEACHER

SHORTAGE ANALYZED

Report Says Poor Counseling in School Is Partly Responsible.

A New York Times News Service WASHINGTON, Nov. 4.—The continuing acute shortage of science and mathematics teachers was attributed in part to inadequate vocational advice in a study published yesterday by the National Education Association.

This 28-page pamphlet, titled "The Postwar Struggle to Provide Competent Teachers," said future teachers are not told of the comparative demands in various subject fields and at comparative grade levels.

Cited as an example of poor counseling was the oversupply of physical education teachers in 1950.

"With the return of millions of men from the military service, where physical fitness was constantly stressed, the number of men preparing to teach physical education zoomed sensationally," the report said. "More than 10,000 were graduated in 1950, despite the fact that at no time have the schools provided openings for more than 3000 new entrants in this field."

This field, it was pointed out, "contained only 4320 newly qualified science teachers, a drop of 52.5 per cent from the 9096 produced by the class of 1950." Only 59.4 per cent of them entered teaching. In 1957, the number rose to 5044.

"If the same percentage of the 1957 graduates fail to enter the classroom as failed last year, the school will lose over 40 per cent, or more than 2000, to other occupations," the N.E.A. said.

The total of 4618 mathematics teachers graduated in 1950 had been cut to 2544 or 44.9 per cent in 1956. Only 66.3 per cent of the 1956 graduates entered teaching last September.

Higher Pay and Draft Exemption for Science Teachers.

NEW YORK, Nov. 4 (AP)—William Benton, former Democratic Senator from Connecticut, yesterday urged higher pay and draft exemption for science teachers as a means of stimulating technological advance in this country. Benton, publisher of the Encyclopedia Britannica, appeared on the NBC television program "Open Mind."

He also advocated expanded scholarship programs and more compulsory science courses at the secondary school level to insure a steady flow of talent into the science fields.

By 1960 in Russia, Benton said, compulsory education for all boys and girls through age 17 will be in force. Their curriculum will include five years of physics, five years of chemistry, mathematics through trigonometry, a year of astronomy and a year of biology or psychology, he said.

FUNERAL OF DAVID W. WARD

Funeral services for David W. Ward, a retired contractor, will be tomorrow at 2 p.m. at the Morrow-Quinn undertaking establishment, 603 Henry street, Alton, with burial in Upper Alton Cemetery. He was 83 years old and died Saturday of a heart ailment.

Mr. Ward retired five years ago after 40 years in the construction business. He lived at 5189 Cabanne avenue. Surviving are his wife, Mrs. Eula Rice Ward; two sons, Paul and Robert Ward, of St. Louis, and three daughters, Mrs. Virginia Wade of Roanoke, Va., Mrs. Erwin Bartleson, and Miss Alice Ward of Richmond, Va.

Tomorrow's Events

Film: "The Drawings of Leonardo da Vinci," Washington University Fine Arts Council series Givens Hall 116; Washington University campus; 12:10 p.m.

Book Review: "Extinct Languages" translated by Frank Gaynor, reviewer, William Korfmaier; Central Public Library, 1301 Olive street; 12:15 p.m.

Meeting: Young adult creative writers; young adult department, Central Public Library, 1301 Olive street; 7:45 p.m.

Lecture: "Renaissance Bronzes" by Mary Powell; City Art Museum, Forest Park; 11 a.m.

At Library Dedication

BING CROSBY in serious mood while awaiting his introduction at yesterday's dedication ceremonies for new \$700,000 Crosby Memorial Library at Gonzaga University, Spokane, Wash. Crosby, an alumnus of the university, donated the sum. With him is his wife, KATHY.

MRS. ROBERT J. LUCAS

DIES, FUNERAL TOMORROW

Funeral services for Mrs. Robert J. Lucas, member of an old St. Louis family and widow of a retired salesman, will be at 10 a.m. tomorrow at Immaculate Conception Catholic Church, 2912 Lafayette avenue. Burial will be in Calvary Cemetery.

Mrs. Lucas, 77 years old, died yesterday of after a long illness at her home, 3137 Longfellow boulevard. A graduate of the old Hosmer Hall, she was the daughter of the late Jesse B. Mellor and Clara Christy Mellor. Her husband, who died Oct. 4, 1947, was a great-grandson of Jean Baptiste Charles Lucas, pioneer St. Louisan.

Surviving are a daughter, Mrs. Victor B. Harris, with whom she lived; a brother, Jesse C. Mellor, St. Louis, and two sisters, Miss Margaret W. Mellor, St. Louis, and Mrs. Homer H. Clark, St. Clemente, Calif.

FUNERAL ON WEDNESDAY

FOR MRS. W. M. C. BRYAN

Funeral services for Mrs. Helen Louise Kimlin Bryan, widow of Dr. W. M. C. Bryan, will be at 10 a.m. tomorrow at the Lupton undertaking establishment, 7233 Delmar boulevard, University City, with burial in Oak Grove Cemetery.

Mrs. Bryan, who was 81 years old, died Saturday in Milwaukee, Wis. Her husband was an ear, nose and throat specialist here for many years and was on the Washington University Medical School staff at the time of his death in 1925.

Surviving are three sons, Dr. James H. Bryan and Dr. W. T. K. Bryan of St. Louis and the Rev. Richard A. Bryan of New Providence, N.J., and a daughter, Mrs. Helen Johnson, with whom she lived in Milwaukee.

PSYCHIATRIST YOUNG DIES

OMAHA, Neb., Nov. 4 (AP)—Dr. G. Alexander Young, dean of Omaha neurologists and pioneer in the field of modern analytic psychiatry, died yesterday at the age of 81. He had been ill three weeks.

\$36,887 FUND GIFTS

BY FIRM'S EMPLOYEES

Average Pledge at General American Life Insurance Is \$27.

Executives and employees of General American Life Insurance Co. have donated \$36,887 to the United Fund campaign. Hugh A. Logan, chairman of the drive, announced today. Ninety-six per cent of the employees contributed, making the average gift \$27.

Missouri-Kansas-Texas (Katy) Railroad and its employees, including members of railway brotherhood unions, gave \$13,946, an increase of 108 per cent over last year's donation, it was reported.

Selb Manufacturing Co. employees contributed \$2665. This figure includes pledges from members of the International Association of Machinists.

Percentage increases in gifts this year compared with last year were reported by Home Insurance Co. of New York, 61 per cent; Public Finance Corp., 52 per cent; Chase Bag Co., including members of the Textile Workers Union of America, 31 per cent; Ninth Civil Service Region, 24 per cent.

Midwest Piping Co., including members of Steamfitters Local 562, Machinists Local 9 and electrical, fabricators and custodians unions, 10 per cent, and Transit Casualty Co., 10 per cent.

BROTHER JULIUS MORTON

FUNERAL TO BE TOMORROW

Funeral services for Brother Julius Morton, C.F.A., a member of the Alexian Brothers order for more than 30 years, will be at 9 a.m. tomorrow in the chapel of Alexian Brothers Hospital. Burial will be in St. Peter and Paul Cemetery.

Brother Julius, 70 years old, died of a cerebral hemorrhage Saturday at the hospital, where he had been stationed since 1951. He was a stationary engineer. He served for six years as rector of Alexian Brothers Sanitarium at Oshkosh, Wis., before coming to St. Louis.

He entered the Alexian Brothers community in Chicago in January 1924 and made his final vows Dec. 8, 1931. He had no immediate survivors.

CATHOLIC SPEECH CONTESTS

AT FONTBONNE SATURDAY

About 200 students from 16 Catholic high schools in the St. Louis area will compete Saturday in the Catholic Inter-Scholastic Speech League elimination contests at Fontbonne College.

Speaking categories are extemporaneous, original, non-original, radio, humorous and serious. Brother John Rollins S. M., a teacher at McBride High school, is president of the league.

Alert at 101

By a Post-Dispatch Photographer. PRISCILLA C. CORLEY

WOMAN ON 101ST

BIRTHDAY PROVES

LIFE OF PARTY

Mrs. Priscilla Catherine Corley was the life of the party at an open house to celebrate her 101st birthday yesterday at her home, 2853 Indiana avenue.

Active and alert except for a knee injury which makes her a little lame, Mrs. Corley received congratulations calmly from descendants and friends who called on her in the modest home.

"All I can say is that I thank God that He has let me live so long," she said.

Born on a farm near Jonesboro, Ark., she picked cotton as a child — "250 pounds a day," she reminisced — and married William Corley, a railroad conductor, when she was 21. They had a son and daughter who died many years ago. Her husband died in 1908 in Denison, Tex., and she has lived most of the time since with a daughter-in-law, Mrs. Charlotte Robinson.

She has three grandchildren, five great-grandchildren and three great-great-grandchildren.

ROBERT L. MOOK FUNERAL

ONONDAGA CAVE MANAGER

Funeral services for Robert Lee Mook, retired mining engineer and manager of the Onondaga Cave near Leasburg, Mo., will be at 11 a.m. tomorrow at the Kriegerhauser undertaking establishment, 4228 South Kingshighway, with burial in Bellefontaine Cemetery.

Mr. Mook, who was 74 years old, died of a heart ailment Saturday at St. Luke's Hospital. He was the brother of the late Dr. William Mook, St. Louis dermatologist and owner of the cave.

Mr. Mook, a widower, is survived by a sister, Miss Frances J. Mook of St. Louis. He lived in Leasburg.

SYMPHONY SERIES

FOR COUNTY PUPILS

First Concert Tomorrow Afternoon at University City High.

The first of the concerts for St. Louis county high schools will be given by the St. Louis Symphony Orchestra tomorrow at 2 p.m. at University City High School.

Harry Farberman, the orchestra's concertmaster and assistant conductor, will conduct as he will in other concerts in the series to be given at University City High School on Dec. 3 and Feb. 4.

Soloists tomorrow will be violinist Melvin Ritter and Herbert Van den Burg, principal violinist, who will play the first movement of Beethoven's Concerto for Violin and Viola.

Completing the program will be the overture to "The Bartered Bride" by Smetana, the first movement of Beethoven's Third Symphony, Richard Strauss's "Till Eulenspiegel's Merry Pranks," Slavonic Dance No. 1 by Dvorak and the march from "Caucasian Sketches" by Tchaikovsky.

This is the second season of concerts for county public high school students. Students may attend all three of the concerts for \$1.50.

The orchestra is also giving concerts for elementary school children at Kiel Auditorium, concerts at St. Louis public high schools under auspices of the Board of Education and a series for Catholic high schools here. There also will be a series for high schools on the East Side.

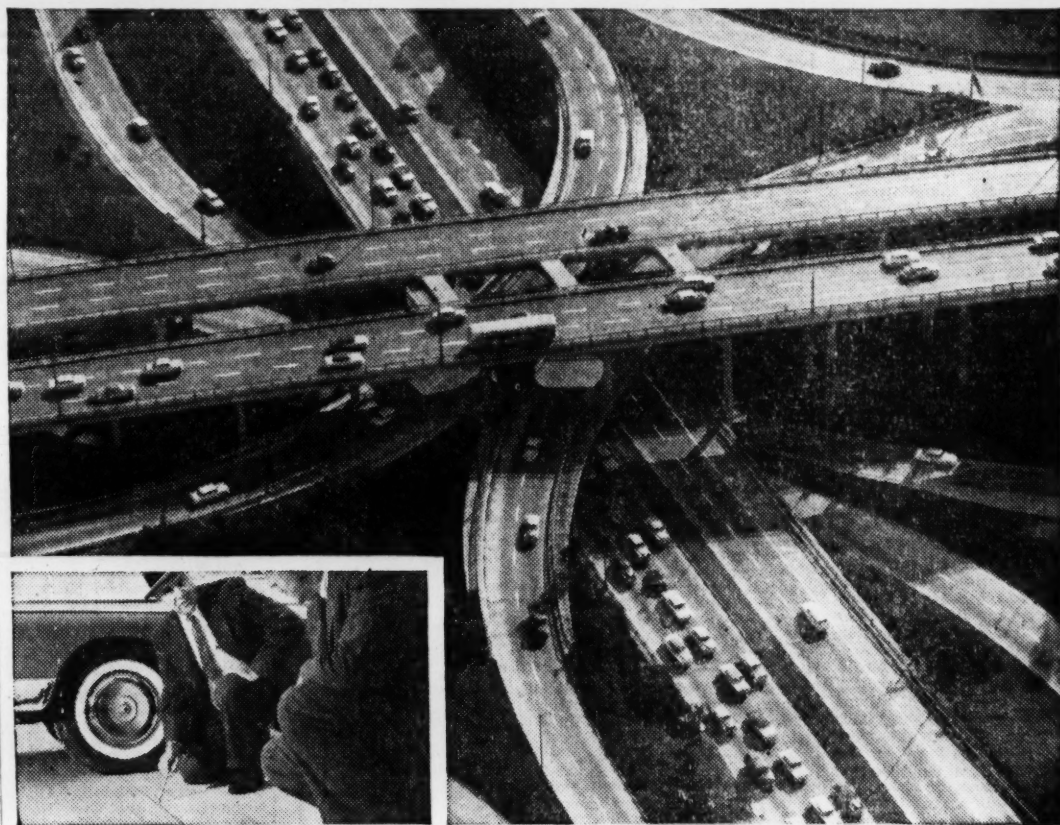

BARNARD HOSPITAL GRANT

FOR SPECIAL MICROSCOPE

A grant of about \$5000 for purchase of a special microscope for use in cancer research has been made to the cancer research laboratory at Barnard Free Skin & Cancer Hospital, it was announced today.

The grant was made by a board which serves as trustee of a research fund established by benefactors of the hospital. The microscope, which is being made by the Leitz Co. in Germany, will enable researchers to view angles of cells which cannot be seen through conventional microscopes. Dr. Glover H. Copher, who is in charge of the laboratory, said:

Called a phase microscope, the device will take at least four months to build. It is believed to be the first of its type in the United States. Another feature of the microscope is that photographs can be taken of cells it magnifies, Dr. Copher said.

Instead of joints there are only tiny cushion spaces... the highway look of the future calls for concrete.

The highway ride of 1975 is here!

New-type, sound-conditioned concrete
for your new Interstate System of super-roads

There's not a "thump" to be heard when you drive this continuous-laid concrete. It has been developed to meet the 1975 standards set for America's greatest highway building program—41,000 miles—now under way.

Almost like riding above the pavement, instead of on it. You'll say this new-type concrete gives you the smoothest, most quiet ride ever.

Don't waste time listening for the "thumps." There simply aren't any. This new pavement is laid without interrupting joints. Then only the tiniest cushion spaces are sawed into the surface. You never feel or hear them.

Roughening or flaking of the surface due to freezing, thawing

and de-icers can't happen—due to a modern process called "air entrainment." A special granular base under the concrete makes permanent that new smoothness... that good, flat, solid feel under you. Studies show you save up to 4% on car expenses—gas, oil, brakes, steering—for you don't have asphalt's surface "drag."

Sound reasons why new-type concrete is the preferred pavement for the new Interstate System

Built to cost Missouri taxpayers less

Only concrete can be engineered to match expected traffic loads, serve 50 years and more. First cost is moderate. New-type concrete roads also save taxpayers dollars on maintenance... which will be up to 60% less than for asphalt.

Musial-Led C.B.C. Jolts St. Louis U. High, 18-12

Dick Scores All 3 TDs; Junior Bills First Loss

C.B.C. Coach John King wasn't fooling in a pre-game report when he said the Cadets would be at top strength for St. Louis U., for his team sprang one of the season's biggest surprises yesterday when it handed the Junior Billikens their first loss, 18-12.

Playing before some 6000 attracted by St. Louis U. High's homecoming and an unbeaten, once-tied campaign seemed especially inspiring to the opposition, the Man of Steel Musial, who scored all three of the C.B.C. touchdowns. Lee Pelligreen accounted for the two Junior Billikens tallies.

Musial, who averaged about five yards with 112 gained in 21 attempts, led King's athletes to pay dirt the first time they got the ball and after that they were never headed. In its drive to this first touchdown, C.B.C. covered 60 yards in 10 ground plays, Musial figuring five and gaining 28 yards. He carried the ball twice the last two advances to the Blue and White goal line, the final rush covering six yards.

Cadets Lead, 12-6, at Half. A 17-year-old senior and son of Stan, the Man of Steel Musial, Dick sparked the Cadets to their next touchdown in the second period to make the score 12-0. The Cadets took over at the St. Louis 35, after the Junior Bills were forced to punt their first drive. The plays later Musial was over, having carried the ball four times for 21 yards.

Gene Hart's St. Louis U. High team fought back on the throwing arm of Greg Hiler. He pitched 12 yards to Frank Weyforth and 12 to Joe Kennedy and after Pelligreen went around right end for the final nine yards, the Bills trailed by 12-6 at half time.

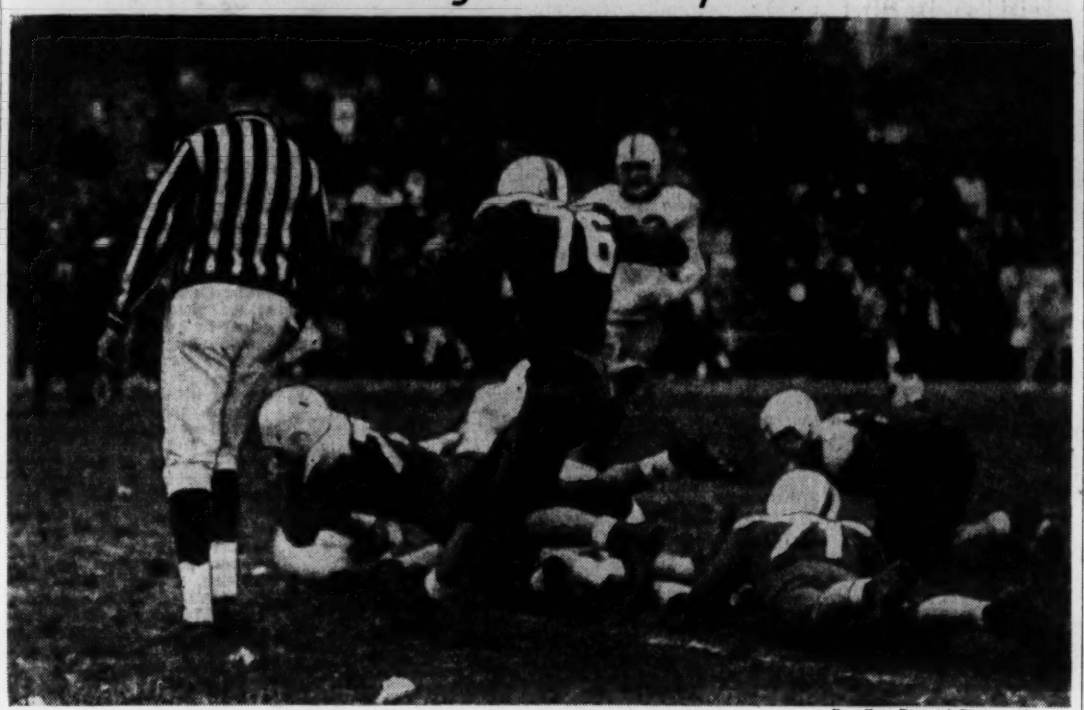

C.B.C. scored its final TD in the third quarter on an advance of 55 yards, 25 of which Musial gained in five carries. The Cadets used 11 plays to score, the last being so well masked that four St. Louis U. High athletes tackled Charles Sapiaza only to find he didn't have the ball. Musial trailed on a three-yard smash.

Junior Bills Score Again. St. Louis took to the air for its second touchdown midway in the last quarter. After Hiler passed 13 yards to Wally Cammarata, Pelligreen took over and carried the ball three times, the last being good for three yards and a TD.

C.B.C. had 15 first downs, St. Louis 7. The Junior Bills connected on five of 12 passes for 87 yards, while C.B.C. tried just one pass which was incomplete. Sapiaza helped out Musial with 84 yards gained in 24 carries.

St. Louis, now showing four victories, a defeat and a tie, plays East St. Louis Lincoln at Parsons Field Saturday night. C.B.C., three victories, three defeats and a tie, also visits

A Green Dragon Hits Pay Dirt

JIM REHG, senior halfback on the St. Mary's High football team, scores his first of three touchdowns in the opening quarter against Mercy on the Bulldogs' gridiron. No. 76 of St. Mary's is TONY ROLLI and No. 71 on the ground is JERRY GUELKER. The Green Dragons won, 25-6.

Rehg's 3 TDs Help St. Mary's Tie for Lead

By Harold Tuthill

The stage is set for the climax of the Catholic Athletic Conference, the meeting next Sunday between both co-leaders, St. Mary's and Du Bourg.

St. Mary's yesterday completed the preparations when Floyd Lohay's Green Dragons bowled over Mercy, 25-6, their last league opponent before the season-ending engagement with the Cavaliers. Now St. Mary's has a 4-0 record in C.A.C. competition, the same as Du Bourg, so Sunday's winner will qualify for the annual Thanksgiving Accident Benefit game with the Public High representative.

Arrangements were being made today to ring the C.A.C. curtain down with a Sunday doubleheader at the Public Schools Stadium, McBride meeting De Andreis at noon and St. Mary's opposing Du Bourg at 2:30. The original schedule called for the McBride-De Andreis game to be played at Mercy and the championship game at Roosevelt, but interest in the St. Mary's-Du Bourg meeting has grown so great that league officials decided to consolidate their efforts in a grand roundup.

In winning their fifth successive contest and their seventh in eight games this fall, the Dragons got a big lift from co-captain Jim Rehg, who made three touchdowns, one on an 84-yard gallop. The senior halfback scored in the first, second and final periods.

St. Mary's covered 80 yards in its steady move to Mercy's goal in the opening quarter, Rehg going over from six yards out. In the early part of the second period, Mercy made a stout goal-line stand, halting four rushes from the one-yard line by the Dragons.

With only 20 seconds to go before the quarter ended, Rehg broke loose for a 26-yard TD run. In addition to Rehg's counter in the fourth quarter, the Dragons picked up another after Bob Roemeran recovered a blocked punt a yard from Mercy's goal. Larry McInturf carried the ball across

Most Ideal Weather Forecast for Missouri
JEFFERSON CITY, Nov. 4 (AP)—Thousands of hunters began moving into Missouri's woodlands under cloudy skies today for the opening tomorrow of the five-day gun season on deer. Shooting hours are from 6:30 a.m. to 5 p.m. daily.

Weather conditions will be close to ideal, according to the forecast. There'll be intermittent rain and general cloudiness through much of the five days, with temperature in the cool but not uncomfortable range from freezing to 50 degrees.

Somewhere between 50,000 and 55,000 hunters, including for the first time residents of other states, will take a whirl at hunting Missouri's biggest game animal. Between 8000 and 9000 of them are expected to be successful.

The bow and arrow season on deer has been open since Oct. 1 and runs through Nov. 30.

Trojans Elect Lesinski.
Trojan A.C. has elected the following officers: President Stanley Lesinski; Vice President Bill Malon; Secretary Joe Kosciulek; Treasurer Otto Phannanbecker; Sergeant-at-Arms Leo Frost.

Benson in Israel.
JERUSALEM, Israel, Nov. 4 (AP)—Secretary Ezra Taft Benson arrived in Israel from Jordan today on his round-the-world trip.

Letts found in the injunction part of the case that Hoffa, retiring teamster President Dave Beck and other union bosses had agreed to or at least acquiesced in the illegal delegates to rig Hoffa's election.

The appeals court said Letts' findings of fact and conclusions of law in granting the injunction may have gone "farther" than the law permits, for the purposes of said order.

But the appeals court said Letts' findings so far are tentative only and that Letts had acted in a proper exercise of his discretion.

The appeals court said the trial of the case should be expedited. It said the teamsters union could apply either to Letts or the appeals court for further modification of the injunction if the rank and file members are not prosecuting the action with due diligence.

The injunction, as approved by the appeals court, bars Hoffa and other new officers elected with him from taking office, or from receiving salary, or in any way threatening the 13 plaintiff teamsters members. The appeals court added the bar prohibiting convention-voted constitutional changes from going into effect.

A date for trial of the basic case has yet been set.

Hoffa Perjury Trial Put Off Until Wednesday.
NEW YORK, Nov. 4 (UP)—The trial of James R. Hoffa on perjury charges was postponed Wednesday by a decision by United States District Judge William B. Herlands on a motion to dismiss the indictment.

Hoffa, president-elect of the Teamsters union, appeared briefly in court today for a scheduled opening of his trial on charges of lying to a federal racketeer grand jury. Judge Frederick Van Pelt ordered that the trial be held to wait for Herlands' decision, scheduled to be announced Wednesday.

Judge Herlands reserved decision on motions by Hoffa's attorney to dismiss the perjury indictment and to suppress evidence of wiretapping.

AUTO DEATH RATE OFF 60 PER CENT IN 20 YEARS
DETROIT, Nov. 4 (AP)—The odds on living through a highway journey are more than twice as good as they were 20 years ago, the Automotive Safety Foundation said today.

The accident fatality rate in 1937 was 14.7 deaths for 100,000 vehicle miles, said Gen. Levin H. Campbell Jr., chairman of the foundation's board of trustees. Today the accident fatality rate is 6 deaths for 100,000 vehicle miles, a drop of more than 60 percent, he said.

can't dancing in the streets with most Democratic leaders are Secretary of State John Foster Dulles and Secretary of Agriculture Earl Bunker Ford. Both move with majestic self-confidence amid the brickbats and dead cats which come their way frequently, but which probably help to keep the President from doubts regarding them.

Adams a Target.
The most controversial figure in the White House, the assistant President, here again Republican complaints at times go higher than those of Democrats. But Adams or someone very much like him is "indispensable" to the President, who delegates all detail and most political decisions.

Even if Adams were less powerful, he would be an object of suspicion; the gray eminences of Presidents always have been. As the careers of Harry Hopkins with Franklin Roosevelt and Col. Henry Woodrow Wilson prove, the White House problems in the changed climate with which Washington faces the New Year is not Adams, but the President himself. He is being asked for the first time to accept direct responsibility and to display aggressive and creative talents.

PROPOSED OZARK ROUTE DEBATED

The route of the proposed Ozark Expressway, which has been recommended by the State Highway Commission was defended as the most practical and economical and assailed as unnecessary and costly at a public hearing today at Kiel Auditorium.

Myers Ableman, urban engineer for the Missouri State Highway Commission, which conducted the hearing, said the present proposed route would provide the greatest amount of traffic relief at the least cost, compared with other routes that have been suggested.

The route recommended by the Highway Commission would begin at Tenth street and Lafayette avenue and continue south and southwest through the intersections of Thirtieth and Wyoming streets, DeKalb and Potomac streets, Broadway and Mount Pleasant street, Michigan avenue and Bates street, Colorado and Holly Hills avenues, Idaho and Robert streets, Wadell avenue and Primm street and leave the city at Weber road and Avenue H.

Riverfront Route.
Ableman said a route along the riverfront which most opponents of the Highway Commission route advocate would not permit traffic interchanges, would not serve as many motorists and would cost more.

The riverfront route would involve raising about 350 less homes than would be required by the Highway Commission's route, he said.

Another route that has been suggested, along Third street, would cost \$12,000,000 to \$15,000,000 a mile compared with \$6,000,000 to \$7,000,000 a mile for the Highway Commission's proposed six-mile route, he said.

Such a route would not permit a connection with a planned twenty-first street expressway, he added.

Speaking in opposition to the proposed route, Louis W. Buckworth, Tenth Ward Democratic Committee chairman, said that the route would take 1750 homes and business would be razed by the highway, depriving the city of needed tax income and damaging operators of small businesses.

"When you take someone's home you might as well take his life," Buckworth declared. He said interested citizens should discuss the matter further with the Highway Commission engineers to see if another route can be worked out.

The state made some concessions on the Mark Twain and Daniel Boone routes to avoid taking some homes, he claimed, and the same consideration should be given south St. Louis residents.

The Highway Commission will conduct another public hearing tomorrow at 9:30 a.m. at the Clayton Court House on the portion of the route that will run through St. Louis county. About 50 persons attended today's hearing with many of them speaking.

FILM OF GIBBONS INTERVIEW WITH ZECKENDORF ON KTVI
William Zeckendorf, New York real estate developer, said redevelopment of the Mill Creek and Plaza areas in St. Louis would intensify interest here in slum improvements, during a filmed interview in a television program shown yesterday over station KTVI.

Zeckendorf was interviewed by Harold J. Gibbons, St. Louis Teamsters Union official and a national union leader, who told Zeckendorf St. Louis labor wants to co-operate with business men in improving the city.

Gibbons said there presently is lacking a communications channel between labor and business which would help to avert unfavorable publicity describing St. Louis as a city with labor troubles. Zeckendorf said there was a need in many cities for more co-operation between labor and business interests. The television program was sponsored by Teamsters Joint Council 13.

AREA COUNCILS OPPOSE EASING ROOMING CONTROLS
The proposed ordinance to weaken the city's control over rooming houses is unanimously opposed by the Inter Association of Area Councils, Mrs. Carl W. Myers, 5848 Barmen avenue, council chairman announced today. The council is comprised of representatives from various neighborhood improvement associations.

Mrs. Myers said the council voted a resolution voicing its opposition to the bill now pending in the Board of Aldermen. Similar resolutions had been voted by directors of the Rosedale-Skinner Neighborhood, Lindell Park, Flora Place and North Pointe improvement associations, and by the West End Community Conference, she said.

Alderman DeWitte T. Lawson (Dem.), Nineteenth ward, introduced the bill, which would end city licensing and inspection of rooming houses in which three or fewer rooms were rented, and place no restriction on the number of persons in the rooms.

BROTHERS DIE HOURS APART
OLNEY, Ill., Nov. 4 (AP)—Alvin Wagner, 66 years old, an Olney barber, died of a heart ailment here at 9 a.m. Sunday. Four hours later, his brother Vern, 71, an Indianapolis barber, died at his home of undetermined causes.

Indianapolis is about 200 miles from Olney. Vern Wagner did not know of his brother's death, friends said.

Benson in Israel.

How many steps to your telephone when it rings at night?

Wouldn't a bedside telephone make *your* life a lot easier?

No more groping your way through the house—just *reach* when it rings at night. You'll save countless daytime steps, too.

A bedroom phone gives you privacy when you want it. It's a great comfort in case of illness. And when you're alone in the house, you'll sleep better just knowing it's there.

How to end your "one-phone" problems for only a few cents a day

Do as so many modern families are doing today . . . make yours a *well-telephoned* home. Add telephones where they serve you best—where you live, work, play, and sleep. The cost is low—and the phone is always handy.

The answer to "one-phone" problems is more telephones, of course.

Homes with only one telephone are no longer in step with today's busy scheme of living.

Most families need *several* telephones—to end the room-to-room race to answer the phone, to give you the privacy you want, to give the teen-agers a phone of their own.

Give yourself and your family the best. Arrange today for more telephones in your bedroom, kitchen throughout your home.

Take your choice of additional phones in black, red, yellow, ivory, green, white, pink, blue, beige, gray. There's a once-only charge for colors other than black.

ADDITIONAL TELEPHONES . . .

ONLY \$1⁰⁰ A MONTH

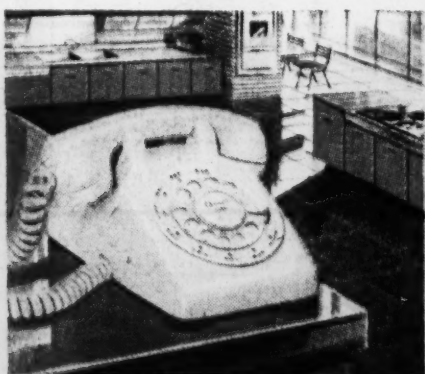

(plus tax and a one-time installation charge)

HERALDING APPROACH OF WINTER

BOUQUET FOR FOREIGN MINISTER

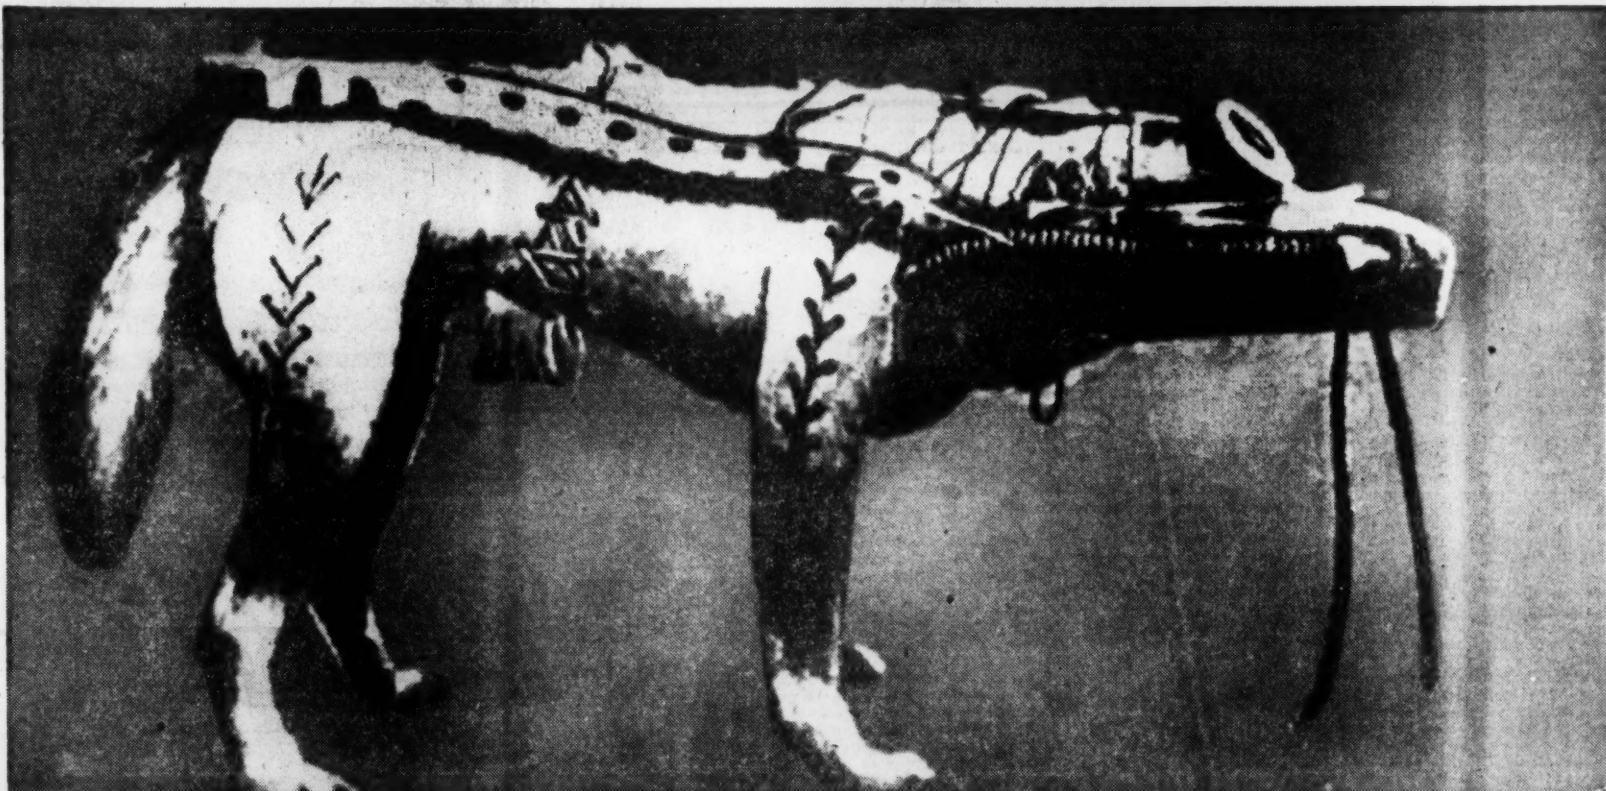

Student nurse presenting bouquet to Israeli Foreign Minister Mrs. Golda Meir being wheeled out of Hadassah Hospital in Tel Aviv Friday on her way home for convalescence. Mrs. Meir was one of five persons wounded by a grenade tossed at Parliament session last Tuesday.

—United Press Telephoto.

Leadens skies and trees stripped almost bare of foliage herald near approach of winter in Forest Park. Cool shade from trees enjoyed by thousands on warm summer days has been replaced by biting blasts of raw wind. Stream ripples past leaf-strewn deserted banks which in summer had resounded to happy laughter of children at play.

The Headliners --- Life Is a Song Now for Bing

By Walter Winchell

LIFE is a song again for Bing Crosby. The happy bridegroom has a lovely young bride—and happiness makes the most beautiful music. The love story was touched by fate's customary whimsical flair.

KATHY GRANT... THE HEART HAS NO CALENDAR.

It all began when Kathy Grant's parents, who hail from Texas, decided to vacation in Hollywood. While strolling in Movieville, an agent stopped her and suggested she try for a movie career. The result was a Paramount contract. For the next 18 months the studio practically ignored her. She had bit roles in several minor flickers. And then the studio dropped her. What appeared to be a period of failure now represents the most successful time of her life. While at Paramount, she met King Bing. Friendship turned into an on-and-off romance—then came love and marriage.

The papers stressed the difference in ages between the groom and his bride. Of course, the heart has no calendar and Cupid is indifferent to birth certificates. Incidentally, before she met Bing, the following prophetic comment was made by Kathy Grant during an interview: "I prefer older men. My Aunt Mary says men are at their worst from 20 to 40, then they mellow. And I think she's right."

THE MAN who ruled women with a needle and thread, Christian Dior, has passed. As so often happens, his success story emerged from the blackest tragedy. When he was a young man—within a few months—his brother was struck down by an incurable disease, his mother died, his father went bankrupt and Dior was stricken with a lung ailment. During the months of convalescence he became interested in fashions as a hobby and began making sketches. Dior, who headed a booming bid, often consulted fortune-tellers before making decisions in his personal and professional life. And he had a poetic view of his profession: I think of my work as ephemeral architecture glorifying the proportions of the female body.

ALBERT CAMUS, the great French novelist-essayist-playwright, has been crowned with a Nobel Prize. The man who has authored thousands of brilliant words once said he can sum up his philosophy with a single word: Freedom... Freedom has always been more than a word to him. Camus's pen has been a sword. During World War II, he was an active member of the underground and wrote for the underground paper.

Camus, who is now being showered with honors, knows that success works in strange ways. It secures the adulation of millions of strangers and often makes enemies of envious friends. Which helps explain why Monsieur Camus informed reporters: "One has to know how to make people forgive success."

MARTHA RAYE is having a ball at the Copa—and so are audiences. Her rollicky-frollicky style was never better... Ironically, much agony and heartbreak has gone into making her a superior clown. A part of show biz (since she was three years young) Martha struggled for many years. She has known the horror of constant rejections and the terror of near starvation. Her gay spirit has endured despite unhappy marriages, ill health and setbacks to her career. Even the incident that made her a clown was a painful experience. She was a minor singer in a Broadway show when the star became ill one night and Martha replaced her. In one comedy skit she was supposed to stumble down the stairs. When doing the bit she tripped and took a header. When she landed—the audience, thinking it was part of the act, was hysterical with laughter. However, Martha had nothing to chuckle about. Her arm was fractured.

IN THE WONDERFUL REALM of show biz this is The Year of Sinatra. In almost every field of entertainment Frank is riding high—records, teevee and films. He scales another pinnacle in the "Pal Joey" flicker... Sinatra has known the roller-coaster aspects of success. His words on the subject are thoughtful as well as authoritative: "People often remark that I'm pretty lucky. I don't think luck as such has much to do with it. You've got to have something more substantial. The competition is too fierce. Luck is only important in so far as getting the chance to sell yourself at the right moment. After that you've got to have talent and learn how to make the best use of it."

JOHN OSBORNE, the British playwright who penned "Look Back in Anger," has been the season's most-written-about dramatist. In common with all playwrights, he plays cat-and-mouse with critics. Mr. Osborne recently observed: "My play ran for 18 months in London, in spite of an almost uniformly bad press. American critics like it—they're more responsible, I think." In other words he likes critics who like him. Hardly an uncommon attitude, of course.

MARGARET TRUMAN, a happy wife and mother, has announced that she will return to teevee... Once again greasepaint demonstrates it is a happy omen. The addition generally starts early in life. In her autobiography, Mrs. Daniel candidly confesses: "I have been stage-struck from earliest memory and am a natural-born ham."

Being stagestruck means you are in love with audiences. And the romance is usually a lifelong affair.

Social Problems

By Emily Post

DEAR MRS. POST: Will you please tell me how I can tactfully refuse to lend someone my comb? It seems unbelievable that anyone would ask to borrow anything so personal but there are people who do. I know, because it has happened to me on several occasions when I have been out with friends who have forgotten to bring along a comb. Needless to say, I dislike anyone using my comb but how can I refuse to lend it without offending the borrower?

Answer: The very fact that she does not mind using your comb shows that she will not understand why you object to lending it. My suggestion is to let her use it and then wash it at the first opportunity.

DEAR MRS. POST: My husband and I disagree on what he should call my mother. He refuses to call her Mom or Mother. He feels that his mother alone has the right to these titles. Is it not traditional for a son-in-law to call his wife's mother Mom or Mother? My mother feels slighted because he does not address her by either of these titles. I am very much interested in finding out who is right in this matter.

Answer: Your mother should not feel slighted because your husband refuses to bestow on her the name reserved for his own mother. The old-fashioned name for a mother-in-law was "Mother Brown," and "Mother-law" was sometimes used. A name that means Mother in another language like "Mater" would be a good solution.

Shepherd for Tourists in England

Charles Gray Soothes Way for Grosvenor House Guests—a St. Louis Visitor

By Clarissa Start

AN American staying at Grosvenor House in London left for the return voyage, forgetting his valuable camera in the cashier's safe. He immediately notified Charles Gray, hospitality officer for Grosvenor House who phoned London, had a special messenger bring the camera by train. Gray tried to intercept the train at one station, missed it, raced to the next station, retrieved the camera, dashed to the ship, tossed the camera into the cabin, and just managed to get off before the ship sailed.

Such special service is a regular part of his job. "The man with the red carnation," who always wears that badge of identification, meets everyone who is going to stay at Grosvenor House, not merely V.I.P.'s but everyone—sultans, rajahs, movie stars and Mr. and Mrs. John Jones of Mudville, Mo., who want to be sure to see that changing of the guard. During the busy season, he meets as many as 68 ships a month and what with lost cameras, unmatched luggage, and tourists' tastes ranging from alehouses to antiques, his is rather a full life.

"I take care of all the bits and pieces," Gray sums it up simply. "I go right on board ship, collect all my people together, sometimes as many as 70, get them through immigration officials, take care of their baggage, and get them safely on the train."

"They're always surprised that there are no checks for baggage and I must assure them that the next time they see their baggage it will be in their room. Then we sit down on the train and have a cup of tea."

"In London we're met by some of our uniformed staff, and I get them into taxis or private cars. Those who have never been to London I take on a quick tour of Westminster Bridge, Westminster Abbey, the House of Parliament, the Palace—occasionally we're lucky and the Queen is coming in or going out, or they're changing the guard—and then to the hotel."

"We also do the same thing in reverse. I collect my passengers, get them on the train to Southampton or Plymouth, again through immigration, collect baggage, take them on board, introduce them to the chief steward to see that they get a good table, and to the purser and the doctor. Not that they may need a doctor but he usually gives cocktail parties."

Gray's visit to this country is in the nature of a good will tour, calling on hotel men and business men. Here in St. Louis, he visited Harold Koplar at the Park Plaza and Chase Hotels, played golf with Jim Tom Blair, the Governor's son.

Golfing is one of Gray's talents, and indirectly it was his love of sports which led to his unique job. As a very young man he decided he would like to become proficient in languages, so he went to Paris, lived in the Montparnasse area where then—in 1925—you

—By a Post-Dispatch Photographer.

CHARLES GRAY WITH 500-YEAR-OLD KEY TO THE GATES OF SOUTHAMPTON, ENGLAND. THE RED CARNATION IS HIS BADGE OF IDENTIFICATION.

Following up with lost articles is one important part of Gray's job. One man left a large sum of money under his pillow and it had to be dispatched by the next ship. Occasionally, there is other special service such as taking care of a man celebrating his 100th birthday. In this case it was unnecessary to look after the man's luggage as his youthful son, age 75, was doing it quite nicely. During big events, such as a Coronation, there is royalty from all over, and what with flowing robes, swords and sashes and turbans, Gray says with a reminiscent sigh, "the lobby is quite a sight."

Gray's visit to this country is in the nature of a good will tour, calling on hotel men and business men. Here in St. Louis, he visited Harold Koplar at the Park Plaza and Chase Hotels, played golf with Jim Tom Blair, the Governor's son.

Golfing is one of Gray's talents, and indirectly it was his love of sports which led to his unique job. As a very young man he decided he would like to become proficient in languages, so he went to Paris, lived in the Montparnasse area where then—in 1925—you

could get a room for 14 cents a day and meals (with wine) for another 14 cents. Having mastered French, he went on to Switzerland for the winter sports.

He had learned to play golf when he was seven, was proficient on skis, so he put an advertisement in the paper, offering to stay with a family and teach their children English and any sports in return for lessons in German. Out of the 68 replies, he selected a German family who spoke no English and spent several agonizing months groping in a foreign language, until one day he woke up and found he was speaking it fluently. He stayed on in Europe, learning languages, teaching skiing by winter, tennis and golf by summer, and eventually got a sales job with a sports manufacturer.

"Then came 1929, we went off the gold standard and you couldn't sell anything," he recalls. "I had a friend in London who made an appointment with me with the director of 57 Varieties (I believe you call it Heinz). Before I kept it, he called back and said, 'I have another friend over at Grosvenor House. Be sure to see

him before you see 57 Varieties.'"

Gray found that the manager of Grosvenor House had nothing special in mind. He was fascinated by his linguistic abilities, tried him out on German, Italian, French and Swiss staff members, then told him he had an idea that someone ought to lend a personal touch to the meeting of Grosvenor guests, someone who could speak their language and show them around. Gray set to work creating his present job.

EXCEPT for wartime, when Government Intelligence made use of his linguistic talents, he has been at it ever since. He has become an authority on what to visit in England, and points out to would-be travelers that 65 per cent of the guests each year bemoan the fact that they didn't allow enough time for England on their itinerary. He considers a week a bare minimum with an extra weekend thrown in for Stratford-on-Avon and Windsor. A month is still better, since that allows for a drive through Scotland and the lake district.

Antique seekers—or approximately 75 per cent of all American women visiting England—he estimates—should plan their trip for June when an Antique Fair is held at Grosvenor. A \$12,000,000 show, at which all wares must be over 100 years old. It features royal possessions and a preview night visit by the royal family when the Queen Mother ("who has quite a flair for such things") goes around and shakes hands.

Gray long ago fell victim to antiquing, has 10 grandfathers' clocks including an Act of Parliament clock which goes back to the time when the 50-cent-a-year tax made timepieces prohibitive to Britons and a special Act provided that every place of business had to display a clock. His has a face two feet square, a single weight, and keeps perfect time. Here on his visit, he has a 500-year-old key to the city gates at Southampton, terribly heavy to carry but a good prop, he feels.

Gray and his wife, who is Dutch by descent, Bostonian by background, and their 11-year-old son, Charles, live in Winchester and when he's on the six-ships-a-day schedule he escapes to his home and works in the garden to relax. Now and then when he's not traveling to sell England and Grosvenor House, he takes a vacation on his own.

He usually goes to Switzerland.

The Bridge Deck

By Florence Osborn

HERE are four bidding questions for you to consider.

1. You are South and hold these cards:

North East South West
10 Pass ?
What call do you make?

1. South bids two hearts. If he replies one spade, he cannot safely raise hearts on the next round. Since he may be able to make only one bid, the raise of partner's major suit is preferred.

2. You are South and hold these cards:

South West North East
10 Pass ?
What call do you make?

2. South jumps to two spades, a game force. He does not say three hearts because he has only three trumps and because North might pass.

3. You are declarer of today's six-club hand and West opens the king of hearts. Study only the North-South cards and bidding; then plan your play.

Both sides vulnerable.

North East South West
10 Pass ?
What call do you make?

3. South makes his club slam by a squeeze on both defenders. There will be a simple

squeeze on West if he holds the long hearts along with the long spades. If not, declarer plays to squeeze West in spades and diamonds.

Declarer ducks the heart king, takes the heart continuation with the ace and trumps a heart. He draws trumps, finesse the spade queen, enters his hand with the diamond ace and plays his remaining clubs. The last club squeezes West, forcing him to unguard the jack of diamonds; dummy throws a spade.

Now a spade to the ace squeezes East. East must discard the high heart, setting up dummy's eight, or he must unguard the queen of diamonds, setting up South's seven. South loses only a heart trick.

4. You are South and hold these cards:

North East South West
10 Pass ?
What call do you make?

4. South bids four diamonds. Although North has signed off, he did have an opening bid, so South makes one more attempt to reach game.

HELPS FOR THE Handyman: A new tool with a two-way handle serves both as a plane and as a file. A special blade said to be the first of its kind, cuts fast and leaves a smooth, even surface on materials ranging from soft wood to tough steel. The blade is flexible, non-clogging, double-sided... Cutting corners? A compound miter calculator makes the difficult compound angle a simple operation. It calculates to the closest one-fourth degree of arc. You can transfer readings directly to miter and tilt scales of table or radial arm power saws.

If you'd like further information of the above items, write Lawrence Galton in care of the Post-Dispatch, identifying item, giving date of appearance and inclosing stamped self-addressed envelope. Inquiries must be sent no later than two weeks after the appearance of the item.

More for Your Money

By Lawrence Galton

HOMES AND FAMILY INCOMES: If you're buying a home, how much of your monthly income should you afford for mortgage, interest, taxes, insurance, utility cost and maintenance? Latest figures used by FHA as official guide in granting insurance for mortgages give you an idea. For a family with monthly after-tax income of \$250, the most typical approved expense for monthly housing payment is \$79; top approved payment is \$92. For other monthly incomes, typical and top figures are: \$300 income: \$84 and \$98; \$400, \$93 and \$112; \$500, \$101 and \$125; \$600, \$109 and \$138; \$700, \$118 and \$150; \$800, \$127 and \$161; \$900, \$136 and \$172; \$950, \$141 and \$177. Top figures are considered practical limit for all but the most exceptional cases.

CHECK-UP for new cars: The 1000-mile check-up and adjustment for a new car after the break-in period is something you pay for in purchase price, should use to fullest. Your dealer has definite list of checks to make. But as one recent report urges, if you do some careful checking yourself before taking the car in, you can direct attention to items that might be missed. Among them: Do body contours match, especially where doors blend with fenders? Do door locks work perfectly? Hood and deck lids close properly? Are headlights properly aimed? Do all instruments function? Does parking brake hold on steep hills? Is steering wheel centered, returning to straight-ahead by itself after a turn? Any thumps or jerks in the automatic transmission?

AROUND THE HOUSE: Don't scrub kitchen floors too often. The less washing of linoleum, rubber, cork or asphalt tile, the better. Once

every six months is plenty, according to an Iowa State College report... Inexpensive way to remove rust from chrome items, including car bumpers and headlights, is to rub with dampened sheet of aluminum foil... If you place new enamelware in cold water and bring it to a slow boil, it will be less likely to chip.

FUEL OIL SAVING: Savings of up to 20 per cent in fuel oil consumption are claimed for a new fuel oil conditioner. It is said to eliminate soot in fire boxes and flues, prevent formation of waxy deposits in pipes and strainers, and stop fouling of burner tips, thus reducing maintenance, cleaning and repair bills. The device, which costs about \$30, goes on the fuel oil pipe line leading to the burner and aids combustion without use of moving parts, electricity or chemicals. It is sold with a 120-day money-back guarantee.

FOR THE KITCHEN: A new kind of electric wiener cooker turns out one to six hot dogs in 45 to 60 seconds. The two and one-half pound machine does the job electrically by resistance and not by radiant heat. It is said to be a No more worrying about how to cut a pie with a new

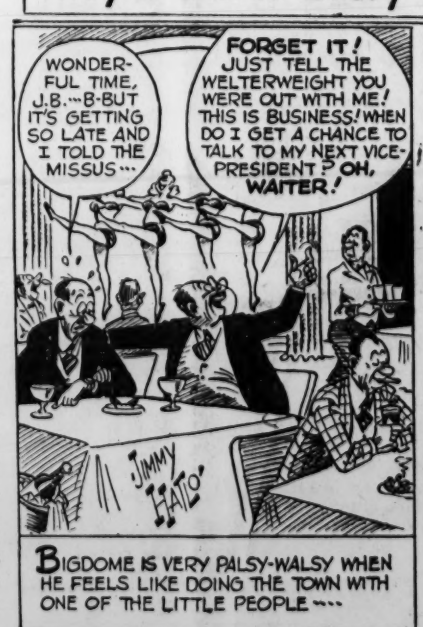

Senator Soaper PERHAPS it would be shrewd merchandising for the automobile industry to make all the extra equipment standard and let the car itself be optional.

It is suggested that medical training be shortened by two years. But would that give the student time enough to learn all the different inflections of "Hm!" that a doctor needs to know?

OPEN DAYS AND EVENINGS

His Wife Dies

By Jim Bishop

AT SEA. (DELAYED.)

THE monsignor moves slowly across the little ship's altar. There is a Force 6 wind outside. In the chapel, the worshippers cannot see the twists and plunges of the liner, but the feet feel them and the yellow tongues of flame on the candles move slowly back and forth. Monsignor Luigi Floran is saying a requiem mass for my wife. She died yesterday.

THERE are things a man does not want to write about. This is one. But these columns have led the readers overseas, and I cannot continue on a gay, lying note. At 3:35 p.m. yesterday Ginny called me from Sea Bright, N.J., and her voice sounded as though all the moaning winds of the seas were tearing at her hair. "Daddy? Dad? Can you hear me? Mommy died this morning. Yes, this morning. Can you hear... then the doctor... peritonitis and pneumonia... I can't hear... Please don't worry..."

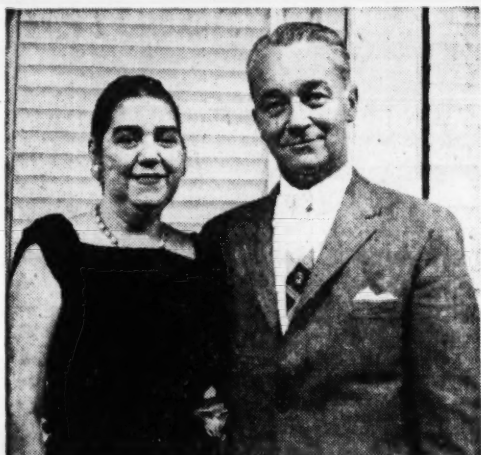

The monsignor moves to the right side of the altar. I try to pay attention. The black chasuble seems strange on a cruise ship. To my left kneels Father Matthew Houlihan, of Floral Park. Behind me is Mrs. Estella Rosa Viciano, who has asked the monsignor to say this first mass.

But my mind would not stay. It was 1400 miles west, with her, and with my two girls. The voyage is now a subdued nightmare. The thoughts are confused and irrational. I see Elinor on the deck of the liner United States, posing for a picture with me. She looks dark and attractive, as she has in all the 27 years we have been together. Edna says: "Pull the stole around to the front more, so it will be in the picture," and everybody roars laughing.

I SEE HER when we were keeping company. The fights. The tears. The mutual recriminations. I see her at the altar, the big white picture hat, the buds of the red roses shivering in her arms. The lean years of a kid reporter and a broker's secretary. The childish anger of the bride over a fancied slight and the enormous joy over some small remembrance.

A little girl born dead in 1931. A little girl who lived four hours in 1935. The signs of increasing nervousness, of petulance. The happiness beyond ecstasy when we were devoted to each other. The periods of silence in the house when we weren't.

The baby born in July 1937 in Leesburg, Va. We called her Virginia Lee. The one born in the war years, Gayle Peggy. They steadied her. Elinor was devoted to these things in this order: God, her mother, her church,

JIM BISHOP PHOTOGRAPHED WITH HIS WIFE, ELINOR, AT THEIR HOME IN NEW JERSEY.

her children, her husband. She feared God as though He was wrath incarnate. She loved her mother Maggy with something a shade this side of adoration. Elinor almost breathed for Maggy.

As Maggy passed the age of 75, Elinor began to fret. She waited on her mother more and more, and the daughter was dragging herself down inch by inch. On June 30, 1957, there were three women in the house at Sea Bright. One was Maggy, upstairs in bed; one was my mother, blind and leaning on a cane in the living room; one was Elinor, approaching her forty-seventh birthday and so nervous that she could neither sit nor stand.

IN TWO DAYS, Maggy was gone. In 32 more days, my mother was gone. Sixty-six more days, and Elinor was gone. Morbid? Far from it. I am thankful that we were permitted to have each of them as long as we did. These were the first deaths in our family in 50 years. We are lucky people.

The monsignor is saying the gospel. The Latin sounds the same here as it does in New York or in Rangoon. At the offertory, I remember to offer the mass up for my Elinor.

She was small and witty and we had much fun. When she felt good, she sparkled. Gayle, almost 14, laughs with the same helplessness. In the young years, Elinor loved nightclubs and shows and we made them all. In the later years, she became a recluse who did not want to go out, or answer a doorbell or a telephone.

AFTER HER MOTHER DIED, Elinor became defenseless. She was a little girl who wanted to be loved, and I was too impatient to give it. Her eyes pleaded for understanding. I asked her what she was afraid of, and she said death. I told her that she was still young and she said she couldn't help it.

I knew her as even her mother did not know her and I alternated between talking about doctors, and just turning my back. Nothing could move her. And when I left for Europe, I held her chin in my hand and said: "Remember, you're not in charge of your big girls this time. They're in charge of you. Stay well until I get home."

On the pier, she waved a handkerchief and cried into it. And I thought: "How typical! You'd think that it was the end of the world."

It was... It was...

Unanswered Invitation

By Christopher Billopp

AN unanswered invitation is one which was sent in the mail asking a relative or friend to come for a weekend visit. It was assumed that the relative or friend would reply immediately by letter.

Meanwhile every mail delivery is awaited impatiently. Until an answer is received the marketing for the week end cannot be done. No doubt the relative or friend is known to be on a diet or can eat only wholewheat bread, or drink grapefruit juice but not orange juice. But there is no use getting wholewheat bread and grapefruit juice and making everybody else consume them if the relative or friend is not coming.

As the time for the proposed visit approaches the person who issued the invitation will be called up and asked to join in all sorts of pleasant social activities. But they cannot accept until they have heard from the relative or friend.

During this period of uncertainty no commitment can be made.

When this uncertainty can be borne no longer there is nothing to be done but call the relative or friend by telephone and demand a definite answer. To this the relative or friend will no doubt reply calmly that he or she never dreamed of coming and had no idea an answer was required.

Nathan Leopold Tells His Own Story

How He and Richard Loeb Murdered Bobby Franks—His Lost Glasses Gave Chicago Police First Clue

LEOPOLD'S GLASSES, FOUND NEAR THE MURDER SCENE. HE AND LOEB DECIDED NOT TO TELL POLICE THEY BELONGED TO HIM.

First installment in Nathan Leopold's own story.

By Nathan Leopold

IT WAS a little after nine o'clock on the evening of May 21, 1924.

"Well," I said to myself, "it's over. There's no turning back now. How on earth could I ever have gotten involved in this thing? It was horrible—more horrible even than I figured it was going to be. But that's behind me now. Somehow I never believed that it would happen—that we'd actually go through with it. But it's done."

"And now, at least, there aren't any decisions to make. I'll be able to put all my slips—on staying one jump ahead of the police. But that's nonsense! Nobody's ever going to suspect me."

"I wish it weren't over with—that there were still time to change my mind. But what's the use of wishing things that are impossible? The thing I've got to do now is to be careful to do all the ordinary, normal things just as I've always done them. I'll stop at a drug store and call Connie to confirm our date for tomorrow night."

Dick and I were driving away from the swampland near Hegewisch, just south of Chicago, where we had left Bobby Franks's body in a conduit pipe under a railroad embankment.

Dick was in high spirits. The main part of the scheme he had lived with and lived for for months was accomplished. The difficult part, the risky part, now there remained only the collection of the ransom.

"That'll be a snap, Nate. Nothing to it. You saw how smooth this all went off. Just like I told you over and over it would. Are you convinced now that it was easy as falling off a log? And the rest will be even easier. We don't have to get within a hundred yards of anybody. Just sit safe and snug in that alley and wait for them to toss us the dough. Those rubes have about as much chance of catching up with us as a snowball in hell."

"What do you say, Butch, let's go out and have a few drinks after we make the phone call and mail the letter."

"Wish I could, Dick. I could use a drink. But you know I have to go home and drive Aunt Birdie and Uncle Al home. And then I have to say goodnight to my mother and go to bed. It's my night to be home. Tell you what, though, I can probably sneak out later, when I'm sure Dad's asleep. Say about midnight or 12:30."

"Now, that's too late. Skip it. What would I do with myself till then? Those coppers will be getting a good night's sleep. We better too, so's to be in top form tomorrow to stay ahead of 'em. About two miles ahead."

There it was again, that thought I'd had about Dick so often. You just couldn't figure the guy out. Those quick alterations of mood, those sudden changes of mind. But then there was nothing compared to the real fundamental contradiction in his character. Everybody went for the guy—and rightly so. There wasn't a sunnier, pleasanter, more likeable fellow in the world. Why, I thought more of Dick than of all the rest of my friends put together. His charm was magnetic—maybe mesmeric was the better word. He could charm anybody he had a mind to. Lots of people who thought the world of him would be surprised to know his real thoughts about them. He looked down on nearly everybody. But they never knew it.

And he was at home with everybody. College presidents or hoboes, it was all the same to Dick. He fitted in with everybody, became instantly a charter member of any group. The guy blended with his environment, as some moths and butterflies do. And he could be generous to a fault.

But then there was that other side of him. In the crime, for instance, he didn't have a single scruple of any kind. He wasn't immoral; he was just plain amoral—unnatural, that is. Right and wrong didn't exist. He'd do anything—anything. And it was all a game to him. He reminded me of an eight-year-old, all wrapped up in a game of cops and robbers. Dick, with his brilliant mind, with his sophistication!

And it wasn't just in big things like this crime we had just committed together. In little things, too. Didn't he realize that I knew he was lying about his grades at school for instance? "All A's," my

foot. I had stolen a peek at his card in the Registrar's office. Yet in spite of what I had seen with my own eyes, I still more than half believed him. Was he a little nuts to lie about little things where he was almost sure to be caught in the lie? But what about me then? I must be a lot more nuts to let him get away with the talking, with Dick crowded into the booth with me. This was Frank Johnson, I said. Their son had been kidnapped. They'd get a letter in the morning, containing instructions about the ransom.

The ransom letter, already written and in an envelope with special delivery stamp affixed, we mailed in a mail box on Hyde Park boulevard.

Next day we met for lunch after my morning classes at Law School. Dick was exuberant.

"Who says there's no way to get delivery of the ransom without letting anybody get a look at it? Or giving them a chance to plant a gang of dicks to watch you pick it up? This is neat, Nate—he's! I'm a poet—and all your idea, too. You deserve a lot of credit. I knew if we just put our heads together and gave ourselves time enough we could come up with a fool-proof scheme. Let's see them unravel this one."

ALL the way down to the Twelfth Street Station, where he bought a ticket on the I.C. train to Gary and planted the letter of instructions in the telegraph blank book in the last car. Dick was bubbling over. It was this kind of a thing that appealed most to Dick; the wheels within wheels. The more intricate and involved a series of actions was, the better he liked it. Precision, that was it. On the way back south to the place on Seventy-fifth street, where we were to wait for the ransom package, Dick suddenly joggled my arm.

"Hey, stop a minute. Did you see the newspaper truck just make the delivery to that stand? Let's get the latest. Hot off the press, boy!"

Even as Dick jumped out of the car, before he could reach the stand to buy a paper, I caught a glimpse of the big black headline on the Journal recognized by its green paper: **Body of Boy Found in Swamp.**

Absorbedly we read the story together. It wasn't some other body. But there was no identification yet. They didn't know who it was. Maybe we were still all right.

"What'da think, Nate? When are these damn papers printed?"

"Hell, I don't know. Couple of hours ago, I should think. Maybe they haven't had time to find out who it is."

"I'll bet they have. That was a swell damn place you picked to leave him. They'd never find him, huh. Not for 20 minutes anyhow!"

"Well, it's a cinch there's only one thing to do: play the string out. No sense assuming they know yet who it is. Remember, they think he's alive."

We drove to the Champion Manufacturing Co., on Seventy-fifth street, where the letter instructed the father to throw the ransom package from the

BOBBY FRANKS... THE MURDER VICTIM, PICKED AT RANDOM FROM A CHICAGO STREET.

NATHAN LEOPOLD, LEFT, AND RICHARD LOEB, RIGHT. THESE PICTURES WERE TAKEN SHORTLY AFTER THE SLAYING IN 1924.

Infamous 1924 Murder

BACK in 1924, two millionaires' sons, Nathan Leopold and Richard Loeb, kidnapped and murdered a young boy, Bobby Franks, picked at random on a Chicago street.

They were caught, confessed and went to trial in a glare of nationwide publicity. Clarence Darrow, the nation's No. 1 defense attorney, conducted the case with wide use of Freudian psychiatric opinion. His brilliant defense was considered a strong factor in getting Leopold and Loeb off with life imprisonment instead of a death verdict.

Now, for the first time in his own words, Leopold tells his own story.

train. We didn't have long to wait. There came the train—right on time. But no one came out to the back platform; no package came sailing through the air. The train disappeared.

Well, that was that. It was a busy time for me, that week. One of my brothers had just announced his engagement. There was a dinner party every night at the home of one or another friend or relative. And there were only another 10 days of school. Final examinations in all five of my law courses. And then there were the Harvard exams I had to take in the meantime.

I read what papers I could, but you didn't have to read the papers. Nobody was talking about anything but the crime. But Dick didn't miss an edition. He read every word in every one of the papers.

And yet it was I that first saw the item—the little, insignificant item—that was to bring us to prison for life.

A pair of horn-rimmed glasses had been found as soon as the body was discovered. For a few hours it had been believed that the glasses belonged to the dead boy. But that idea was corrected as soon as the body was identified.

Now a couple of days later, one of the detectives in charge of the investigation was saying that the glasses must belong to the murderer—that they furnished the best clue to his identity.

I knew at once that the glasses must be mine. I went to my room and searched carefully; looked through all the bureau drawers and in the breast pocket of all my suits. But I did it without much conviction. I knew those glasses were mine.

What a fluke! For I didn't wear glasses. Six months before, in October or November, I had been bothered with frequent headaches. When they didn't go away spontaneously, I did all the usual things to find their cause. Finally, someone suggested that maybe they were caused from eye strain. I was, after all, reading a lot. So I went to an oculist and he prescribed a pair of reading glasses. I wore them for reading for three or four weeks. But then the headaches went away and I quit wearing the glasses. I hadn't had them on for months.

My hobby was ornithology, and this kept me out in the

woods and swamps a good deal, especially in spring. Some of the terrain I had to cover is pretty hard on suits. So I had formed the habit of keeping two old suits, no longer good enough to wear to school, as "birding suits." The last time I wore the glasses I must have left them in the breast pocket of a suit I later converted to use for birding. Since I had no occasion to use them, I hadn't even known they were there. This must have been the suit I wore on May 21.

What should I do now? Go in and claim the glasses? Or hope they couldn't be traced to me? My prescription was a common one. I knew, I'd better talk it over with Dick. He knew lots more about these things than I. Wasn't he always reading detective stories and telling about methods of criminal investigation? He'd know what to do.

DICK wasn't too perturbed when I told him the glasses were mine.

"Go, are you sure? How in hell could you be such a stupe? Look, can they trace them, do you think?"

"That's just what I wanted to talk to you about. They're a very common prescription. Half a degree of astigmatism, or something, the doc said. There must be a jillion pairs like them in the city. So I don't think there's much chance of their being traced."

"On the other hand, I've got all the alibi in the world for their being found there. You know I go birding out there all the time. Hell, I've been there—right at that same spot—half a dozen times in the last couple of weeks. I had my birding class there Saturday. And I was out with Bill Campbell and Harry Stokes on Sunday. I think I've got oodles of respectable witnesses. Whadda ya say I go and claim them? Kinda spike their guns in advance."

"Now, I think that'd be a fool caper. Don't get mixed up in the case at all. They might try some rough stuff on you. And besides, it might take you a hell of a while to talk your way out of it. You've got your exams coming up and everything. And besides, you want to be on hand for the fun."

"You don't know your glasses are gone. Make 'em come to you. Then, if Wurst comes to

girl I'd seen. And far more intelligent—she was graduating from the university in June. And she was a wonderful dancer.

It seemed sound advice, even loyal, unselfish advice. For they weren't Dick's glasses. He wouldn't be mixed up in the case. I felt I had to make the offer to step up and claim the glasses. But I was relieved that Dick didn't think I should.

ALL week I went about my business normally, doing what I always did. Taking a couple of Harvard exams, playing a bit of bridge, going birding, going to what parties I couldn't get out of, and seeing as much as I possibly could of Connie. Now there was a girl! Like none I'd ever met before.

I was head over heels in love. Puppy love, if you like, but somehow it doesn't seem like puppy love when you're a puppy. All I knew was that she had more—much more—of all the desirable qualities than any other girl I knew. She was far more beautiful than any other

I wanted a date with her every night. She wouldn't hear of it. A girl didn't go out every night with the same fellow unless they were openly engaged. I'd plead the imminence of my departure for Europe, explain carefully and heart-rendingly how long it would be before I could see her again, for I'd be at Harvard all next year. Generally, I'd wind up with five nights out of the week, rather than the three she thought the upper limits of propriety.

That Saturday night we had a wonderful date; I didn't get home until very late. And so I was still asleep at 11 o'clock Sunday morning when Dad came into my room and woke me with the news that two police officers wanted to see me.

Mrs. Saylor Married To Norbert L. Harms

By Karin Hayward

MR. AND MRS. NORBERT L. HARMS, whose wedding was an event of Oct. 25, are living in their new home at 14 Pine Valley drive, St. Louis Country Club Grounds, Ladue. Mrs. Harms is the former Mrs. Dorothy Luer Saylor, daughter of Mrs. William J. Luer of Fairmount, Alton.

Mr. and Mrs. Harms have deferred their wedding trip until late this month when they will go to New York for Thanksgiving. There they will see Mrs. Harms' twin daughters, Miss Thru Saylor, a freshman at Colby Junior College, New London, N.H., and Miss Thru Saylor, a first-year student at Briarcliff Junior College, Briarcliff Manor, N.Y. The girls are graduates of Mary Institute, class of last June. After the Thanksgiving holidays, Mr. and Mrs. Harms will fly to the Isle of Pines, south of Cuba.

The wedding took place at Trinity Lutheran Church in Alton with only members of the two families as witnesses. The Rev. Reuben Baerwald officiated. The bridegroom's brother-in-law and sister, Mr. and Mrs. George Skinner, were the attendants. Their daughter, Miss Linda Skinner, attended the wedding as did Mr. Harms' younger daughter, Miss Martha Harms, a student in the high school department of Monticello College in Godfrey, Ill. His older daughter, Mrs. James Weir (Mary Virginia Harms), lives in Los Angeles.

Post-Mortem Deb Party.

BLACK-CLAD DEBUTANTES of a year ago and their escorts held a "post-mortem deb party" Saturday night at the home of Miss Melissa Ann Hickey, daughter of Mr. and Mrs. K. Myron Hickey, 2722 North Geyer road, Frontenac. Co-hostesses with Miss Hickey were Miss Marian Shipley, Miss Ann Vogler, Miss Carol Smith and Miss Jane Thatcher.

A Biblical quotation, "A generation goes, a generation comes," was framed over the living room mantel which was illuminated with black candles. A piano player entertained the 65 guests who were invited for dinner, served buffet style.

Art Exhibit Reception.

MR. AND MRS. HENRY B. PFLAGER of the Frontenac have invited friends to a reception Sunday afternoon at the St. Louis Artists Guild, from 3 to 5 o'clock, marking the opening of an exhibit of watercolors by Mrs. Pflager who signs her paintings Dorothy H. Pflager.

Assisting as hostesses will be Mrs. J. Sheppard Smith, Mrs. G. Chadbourne Taylor, Mrs. Arthur C. Hoskins, Mrs. William T. Chafee, Mrs. Ingram F. Boyd Jr., Mrs. Hiram Norcross Jr., Mrs. Kevin C. Morrin, Mrs. E. L. H. Brashear, Mrs. Earl Maynard Johnston, Mrs. Hugh L. King, Mrs. I. A. Long, Mrs. G. Donald Gibbins, Mrs. Warren B. Lammert, Mrs. Samuel Fitzhugh Gordon, Mrs. Pierre Loisel Papin Jr. and Mrs. George B. Atwood.

The exhibit, which will continue through Nov. 20, is comprised of more than 100 works. The paintings have been catalogued into the following groupings: Salutes Into the Abstract; the City of St. Louis and Its Environs; Immobilized Objects and Remnants of This and That; The Flora and Fauna of Mexico, Michigan and Maine; Thumb-nail Sketches of Europe, 1935; Honolulu Holiday.

Mrs. Pflager's most recent exhibit was in New York a few years ago. Among previous exhibits in St. Louis was a joint display with her mother, the late Ida H. Holloway, well-known artist of Cincinnati.

Miss Thomas to be February Bride.

ANNOUNCEMENT has been made by Mr. and Mrs. J. William Thomas of New York of the engagement of their daughter, Miss Tamara Ann Thomas, to James Rowland Sowell. The Thomases lived in St. Louis from 1934 to 1943, when they moved to New York, where Mr. Thomas is associated with Look Magazine.

The wedding will take place Nov. 30 at Fifth Avenue Presbyterian Church in New York. St. Louisans planning to attend are Miss Thomas's grandmother, Mrs. Fred C. White, 1110 North drive, Warren Woods, and Mr. White, and her uncle and aunt, Mr. and Mrs. Eugene Blumeyer, 6352 Forsyth boulevard, Clayton. The bride-elect, a direct descendant of Daniel Boone, is a granddaughter of the late J. William Thomas of Fairfield and Louisville, Ky., and St. Louis and of the late Mr. and Mrs. Baxter Barton Diver of Fulton, Mo.

Miss Thomas was graduated from The Spence School in New York and from Briarcliff Junior College, Briarcliff Manor, N.Y. Now a student at the University of Colorado, Boulder, she is pledged to Delta Delta Delta sorority. Mr. Sowell, son of Mr. and Mrs. Jason Byron Sowell, Dallas, Tex., is a former student of Choate School, Wallingford, Conn., and Fountain Valley School, Colorado Springs, Colo. Later he attended Washington and Lee University, Lexington, Va., where he was pledged to Phi Delta Theta fraternity. He is now stationed with the Army in Colorado Springs where he and his bride, after a Jamaica honeymoon, will live. When he is released from service the couple will return to college.

St. Louisans Attend Football Game.

AMONG the many St. Louisans who motored to South Bend, Ind., Saturday for the Notre Dame-Navy football game were Mr. and Mrs. Paul J. Kaveney, 6904 Washington avenue, University City, who chaperoned three seniors from the Academy of the Sacred Heart. The girls were their daughter, Miss Frances Kaveney; Miss Mimi Garesche, daughter of Mr. and Mrs. John P. Garesche, 6311 Washington avenue, and Miss Maureen Tuthill, daughter of Mr. and Mrs. Harold J. Tuthill, 6054 McPherson avenue.

Before the return trip the party was scheduled to attend a post-game celebration in Chicago with several students from St. Louis now attending Notre Dame.

Prospective Bride

MISS TAMARA ANN THOMAS, FIANCEE OF JAMES ROWLAND SOWELL.

My Day

Problem of 'Big Unions'

By Eleanor Roosevelt

I REMEMBER Justice Louis Brandeis once talking to my husband about the evils that come with "bigness," and I have a memorandum before me now which reflects some of the concern that existed in the past about "big business" as regards "big unions."

Big unions have had to grow to their present size and power to cope with big business, but they now are finding that there is a disadvantage in their very bigness. One man who has made a study of the situation in both the business and union fields, but who is primarily interested in making the unions as serviceable to their members and as good as possible, says: "I think it is a respect for this pathetic central core of our existence that differentiates the true from the false in human relations. Social and economic democracy should aim to create an external world in which the insecurities are somewhat lessened, its positive and creative wills are freed, and its armor against malicious, vulgar or savage assault is strengthened."

"I like to move about with members of my union because something of this comes over to me from the personal talk, the give-and-take planning, and the facing of common dangers and difficulties together. The more trade union officials do of this, the less time they have to run power machines within their own unions. It's the only 'technique' that accounts for reciprocal trust and confidence."

AT A TIME when labor is being attacked for its corrupt leaders, such thoughtful suggestions for efforts to bring back some of the personal contacts within the union are certainly worthwhile.

Another important effort being made is the appointment by the United Auto Workers of a public review board. Walter P. Reuther, UAW president, says

of this board: "The leadership of the UAW proposed the public review board because the union is prepared to have a body of outstanding citizens review the conduct of UAW affairs and report its findings not just to a few officials but to the entire UAW membership and to the public at large."

THE ESTABLISHMENT of this board and the facing up to the problems and the difficulties which have come with the growth and strength of the unions is a very encouraging sign. Labor is growing in a sense of responsibility to the community and to its membership, and I think it is much to the credit of its leadership that, as labor grows in strength, it faces the problems that strength creates and tries to meet them in the spirit of service to the community as a whole.

This is shown, I think, by another quotation, this one from a booklet put out to describe the functions of the UAW review board:

"Illegal wrong-doing is only a part of the problem. The labor movement is concerned with more than adhering to standards of technical legality. It is no disparagement of the efforts of this committee to assert that the labor task is itself of the labor movement itself."

There have been times in the past when businesses have been concerned only with "technical legality," and it would not be surprising to see labor go through a similar stage. Perhaps, to some extent, this stage has been the background for some of labor's internal troubles, but it is encouraging to know unions are facing the fact that seeking to live up to standards of "technical legality" is not enough.

Webster Groves Trips, Parties And Visitors

DR. AND MRS. LOUIS K. DEASLEY, 444 Somerset avenue, returned home last week from a holiday. They were in Boston while he attended the meeting of the American College of Gastro-Enterologists. After sightseeing in New England, they went to Greencastle, Ind., to visit with their daughter, Miss Carolyn Deasley.

Miss Deasley, a senior at De Pauw University, is president of her sorority, Pi Beta Phi.

Mr. and Mrs. B. O. Burkitt, 321 South Elm avenue, are expecting her son and daughter-in-law, Mr. and Mrs. William B. Mead, in about 10 days. The Meads have been traveling in Europe since mid-summer, when he received his discharge from the Army.

Mrs. Burkitt's older son, Dr. C. Alden Mead, departed a few days ago for Upton, L.I., where he will live.

Mrs. George T. Fishback and Miss Katharine Bowman departed for their home in Versailles, Ky., Friday, concluding a two-week visit here with their sister, Mrs. Herman Bowman, 370 Gray avenue, and Dr. Bowman.

The Fortnightly Dancing Club of Webster Groves held its second party of the season Saturday night. It was a dinner dance at Algonquin Golf Club. The club is made up of high school juniors and seniors.

The chapter committee was headed by Mr. and Mrs. Richard P. Edwards and composed of Mr. and Mrs. Ralph Metcalf, Mr. and Mrs. Eugene Dougherty, Mr. and Mrs. Russell Doerner, Mr. and Mrs. H. K. Vahle, Mr. and Mrs. Norman Goedecke, Mr. and Mrs. Norman Marshall and Mr. and Mrs. C. W. Welsch.

The Webster Groves Dance Club had a party Saturday night at 9:30 o'clock at the Municipal Club.

Earlier in the evening members attended two cocktail parties, Mr. and Mrs. Harry Stein gave one of the early parties at their home, 103 Glen road, assisted by Mr. and Mrs. John Lively, Mr. and Mrs. Charles Jost and Mr. and Mrs. Schell Furry. The other party was given at the home of Mr. and Mrs. James Croft, 450 West Lockwood avenue, with Mr. and Mrs. M. H. Brahl, Mr. and Mrs. Herbert I. Finch Jr. and Mrs. G. W. Marsalek assisting.

Women's Clubs Musical Group To Give Program Of Scandinavia

By Fay Profflet

A PROGRAM of music, "Sweden—Denmark—Finland—Iceland," will be presented at 1:30 o'clock tomorrow afternoon at a meeting of the Musical Research Club at the Music Hall of Scruggs, Vandervoort and Barney.

Mrs. Brice R. Smith is in charge of the program which continues the year's subject, "Music Throughout the World." Mrs. Smith will discuss crafts and sports of the countries and some of their well-known natives such as Jean Sibelius, Jenny Lind and Hans Christian Andersen.

Members of the club who will appear on the program are Mrs. Alberto Aranda, Mrs. Oscar E. Cross, Mrs. Edward L. Eyerman, Mrs. Nels W. Jansson, Mrs. William B. Martin, Mrs. Harold J. Perrings and Mrs. Hans Schmidt. Mrs. George T. Shutt and Mrs. Herbert P. Stellwagen will be the accompanists.

After the program, a tea will be served in the store's tearoom. Mrs. Theodore C. Wetterau is president of the club.

Miss Eliza Richeson will read a paper on "Mother India" at the Morning Etude Music Club meeting Wednesday at 10:30 o'clock at the College Club. Others participating in the program will be Mrs. George A. Kercher, Mrs. Hans Schmidt, Mrs. Walter Diekmann, Mrs. Frederick Laise, Mrs. Harold Levent, Mrs. George Bloch, Mrs. Harry Bonewits, Mrs. Fred A. Niemoller and Mrs. Everett E. Diez. Mrs. Kercher, president, will preside.

The Altru Club will meet at the General Insurers, 4144 Lindell boulevard, Tuesday night at 6:30 o'clock. Dr. Fred Brooks of the University City Schools will show pictures of the Near East and of the Holy Land and lead a discussion of problems in these sections. Miss Helen Manley, international relations chairman, will introduce the speaker.

The Query Club will meet Friday morning at 10:30

Ben A'Kiba Society Anniversary Party Planned Wednesday

THE Ben A'Kiba Aid Society will celebrate its sixty-fifth anniversary with a luncheon at noon Wednesday at the Y.M.H.A. auditorium. Mrs. David Goldstein is president of the group, one of the oldest philanthropic organizations in the community.

Guests of honor will be Mrs. Maurice Davis and Mrs. Harry Haas, honorary past presidents; and former presidents, Mrs. Rebecca Hochman Rosenblum, Mrs. Samuel Haffner, Mrs. Nathan Zonnin, Mrs. Saul Seligman, Mrs. Jahn-Croft for Mrs. Hazel Woolf Epstein, Mrs. Herman Fitter, Mrs. Simon Goldstein, Mrs. George J. Amitin and Mrs. Morris Kwekin.

Mrs. Isadore Bernstein is hospitality chairman for the birthday party. Her co-chairmen are Mrs. Hymen Goldstein and Mrs. Irwin Rowe. Mrs. Max Nissenbaum is program chairman.

The society was formed to give first aid to the needy. Its present project is the Ben A'Kiba Aid Society play therapy department in the new Jewish Hospital Medical Center psychology department. Other projects include the Clara Larsson Tribute and Shoe Fund, which provides braces for children in the Cerebral Palsy Center at Cardinal Glennon Memorial Hospital and material for garments made by the sewing committee of the society for distribution to hospitals and other institutions.

Martha Carr's

OPINION

Dear Martha:

I HAVE a problem. I took care of my mother until she died. Then my sister grieved so that she went to a sanatorium. She is still there. I have never had a real chance at life. If I didn't have to work all the time and keep house and wash and iron and clean house at night, maybe I could get a date and go out. But nobody asks me. I am just about out of my mind. I have fallen in love with a man 30 years older than I. He loves me too and wants to marry me, but he has a wife. What are we going to do? I want him to get a divorce but he is afraid it will ruin his good name as he has been married 40 years. But he doesn't love her anymore. Don't you think he should get a divorce and try to get some happiness out of life? She won't give him a divorce.

TRUE LOVER.

I'm afraid I have news for you. He has no intention of getting a divorce. It's the same old story and many a woman who believed it would work out this way has lived to regret she ever let the man into her life. No, I can't say he should get a divorce and marry you. You have a right to happiness, yes, but you haven't any right to break up his marriage. And if it's real happiness you want, you won't try. Why don't you let me send you some of my lists of clubs where you will have an opportunity to meet congenial friends? Go to church. Get into church and community activities. Join a hobby club. The more groups you're in, the more people you'll meet—and the more chances you'll have to meet a man who is not only loveable, but free to marry.

IN ANSWER TO Sally Lou: During the war, the custom of proxy showers for a bride-elect or mother-to-be gained wide popularity. So if the honoree can't be here for the party, you could still invite a group of friends, ask them to bring gifts, then ship the presents on to her. It might be part of the entertainment to wrap the presents at the party—perhaps in a little competition. As hostess, provide the paper and ribbon and give prizes for the prettiest package and the zaniest. This way, all the guests could oh and ah over the gifts before they go to the honoree. You would be responsible for mailing them.

Martha Carr's free shower leaflets will help you plan parties for the bride-elect or mother-to-be. Write today for your free copies. Please enclose a stamped, self-addressed envelope with your request.

The Dean Speaks Up

By Adele Starbird

I HAVE long since become resigned to my position as second fiddle—in fact, ever since it dawned on me that people were dropping in not to see me, but to see my boxer. No matter how I exert myself, my callers grow restless if she fails to put in an appearance. They have even left me with only a book for company while they crawled under the bed in a futile effort to coax Tiny to come out. "I've never seen the dog that wouldn't make up with me," they mutter in frustration.

Their technique is all wrong. The way to win Tiny is to ignore her. When she hears unfamiliar voices in the living room she makes a cautious entrance, poised to flee like a startled fawn; if nobody speaks to her she looks baffled and distinctly disappointed; finally she goes from one indifferent guest to another in her most ingratiating manner.

But if she has recognized the voices, she makes a prima donna entrance and greets each one with affection. Naturally I can't compete with so much charm.

HOWEVER, I DO HESITATE to turn over my column to her, as some people want me to do. Letters come in asking for "more about Tiny." Since I have no power of invention and belong to no school of fiction, I am rather put to it, for Tiny's days are uneventful. They say that happy nations have no history, and that applies also to dogs.

She receives a considerable fan mail, with "get well" cards when she has been ill. For several years she has kept up an epistolary flirtation with Rudy, the handsome Weimarner who owns the Arthur Baers. He sent her a lovely picture of herself with a note saying that his family had the jitters. "With my beauty and all-around attractiveness they are dreadfully afraid I'll be kidnapped. But not me. I love every word your missus writes. You know I'm just a hound for pup-licity. Fondly, Rudy Baer."

For seven years she has lived in the expectation of catching a squirrel. I let her chase them, secure in the knowledge that the squirrel can always spiral around a tree while she is trying to brake her momentum.

One morning I was walking through the sweet gum trees without her, and come upon a young squirrel too tame to scamper away at my approach. I stopped to talk to it. "Oh, little squirrel," I said, "you really must be more cautious. This is a cruel world, and dreadful things can happen if you don't run away. Now if Tiny were with me—"

Just then a man passed noiselessly on the grass. I knew what he thought, that I was nutty enough for the squirrels, a perfect model for a drawing of The Girls, that wonderful cartoon of silly and sentimental women of uncertain age.

BUT TO RETURN to Tiny, this is her day: She awakens early and begins sniffing and nudging me gently. When I show signs of life, she goes wild, jumping on and off the bed, wheezing and snorting ecstatically in my face. I don't know why I'm not utterly revolted, but I really don't mind. I just try to duck.

I let her out. When I whistle for her return, she comes like a guided missile. On wet mornings I rub her dry with her own fancy towel bought by a friend of hers at Abercrombie and Fitch. I give her two pills, one of digitals, and one of riboflavin. Immediately she rushes to her blue bowl and I open a can. Her three metal tongs clink gaily against the bowl as she snuffles down the horse-meat. She finishes in time to join me for breakfast.

We go to my office in the next building. She spends the morning quietly under the big Italian table that serves me as a desk, her head resting on the crosspiece. She knows when it is noon and insists on starting back to the apartment. After lunch she is just as impatient to return to the office.

And so it goes for both of us, back and forth, back and forth. It does not sound exciting, but we love it, and would not exchange our monotony for all the "copy" in the world.

Style for Dublin

International Designer Pattern

IRENE GILBERT's designs have the serenity of Ireland's countryside with the lift of Irish coffee thrown in. One of the main reasons why Dublin is a must stopover for the fashion press, she combines good design with timeless styling.

This model with its "pick-up" tucks in the midriff is a modified reflection of the important belted mode, for while the tucks do not exactly ignore the waistline, they give the amount of definition American women prefer.

In spite of its great chic and detail, the pattern consists of only six pieces and is, therefore, very easy to make. The tucking which widens at the bottom releases soft pleats for a graceful skirt. The high neckline with its slight V extends around the back into a collar.

Make it in a surfaced lightweight wool for daytime or in crepe, shantung or taffeta for dress wear. From this chart select the one size best for you.

Sizes	Bust	Waist	Hips	Length from neck to waist
10	34	24	35	16 1/2"
12	35	25	36	16 3/4"
14	36 1/2	26 1/2	37 1/2	17"
16	38	28	39	17 1/4"
18	40	30	41	17 1/2"

Pattern S-243. Size 12 requires 3 1/2 yards of 54-inch material for dress.

To order a pattern, state size, send \$1. For new Jumbo 96-page Pattern Booklet 14, send 50c—for Irene Gilbert label, send 25c. For air mail service in U.S.A., add 25c per pattern, 50c per booklet. Sales tax extra. Address SPADENA, in care of the St. Louis Post-Dispatch, Box 993, G.P.O., Dept. SX-17, New York 1, N.Y. If paid by check, bank requires 4c handling charge.

Serve guests a colorful fruit cup that combines the pale pear, a scarlet plum, a vivid apricot and a sunny slice of pineapple. Grated orange peel is a tasty addition.

MAYBE YOU'LL TELL ME OFF FOR ASKING, DR. GREENE, BUT HOW'D YOUR DAUGHTER EVER GET SO FAR OUT OF HAND?

I'M A BUSY MAN, MIKE...AND ROBYN'S MOTHER IS LIVING ABROAD!

WE SHOULD LAND BY SUN-UP!--WHICH WILL GIVE ME A CHANCE TO INTRODUCE YOU BEFORE I GO TO THE HOSPITAL!

AT THIS MOMENT-- WAKE UP, SLEEPY-HEAD! YOUR FATHER WILL SOON BE ...

OH!

PULL YOURSELF TOGETHER, SON. BEFORE THE SHOOTING, WHAT ELSE DID HASHI SAY?

NOTHING. JUST THAT MIRA AND I COULD NEVER MARRY, BECAUSE WE WERE BROTHER AND SISTER... I TOLD HIM IT WAS A LIE!

IT WAS A LIE, WASN'T IT, FATHER?

A BOLD-FACED LIE! YOU WERE OUR ONLY CHILD. ALIDA, YOUR MOTHER, WAS CAPTURED BY PIRATES A FEW MONTHS AFTER YOU WERE BORN.

MIRA YOUR SISTER! **IMPOSSIBLE!** UNLESS...UNLESS...

UNLESS WHAT, FATHER?

HURRIEDLY, ALMOST DESPERATELY, MINDY TRIES ON DRESS AFTER DRESS!

I TELL YOU MY DEAR, THAT IS YOUR!

BUT, AT THE END OF AN HOUR ...

NO, LET'S FACE IT! I SIGH! I THINK I ...

M. J. 1954

NOBBY WALSH FINDS HIMSELF UNDER THE SPELL OF DR. IGNATZ PLUMPKIN, THE WORLD'S FOREMOST HYPNOTIST.

BECAUSE YOU HAVE INSULTED MY GREATNESS, I WILL MAKE YOU COMMIT ACTS VICH GO AGAINST YOUR TRUE NATURE? FIRST, I WANT YOU SHOULD GO INTO THE STREET CHASE LIKE YOU ARE AND BEHAVE LIKE A COO-COO BIRD...

AND NEXT, YOU WILL GO TO THE NEAREST JEWELRY SHOP AND ROB IT...AND ZEN...

YOU WILL KILL...YOU HEAR ME-KILL...KILL! (HEE-HEE) NOW I GO...YOU WILL DO ALL THOSE THINGS VEN YOU AWAKEN, YAH?

YAH!

By Ramon Coffman

Q. What kind of knife was known in the Stone Age?

A. The stone knife. This was a piece of stone which had been broken or chipped on one side to make a sharp edge. Most Stone Age knives were of flint, but some were of quartz. When flint is broken, it often provides one or more cutting edges.

During the Late Stone Age (also called the New Stone Age) men learned to grind the edges of knives and other tools. This was done by rubbing the stone pieces against

★ ★ ★

Q. For what purpose did Stone Age people use knives?

A. Chiefly to cut meat, to take the skins from animals and to defend themselves against enemies.

In that period men also had

quiring if we'd consider breaking up our beep-beeps with commercials!"

AT LEFT IS AN OLD FLINT KNIFE OF THE OLD STONE AGE. THE OTHER THREE WERE IN USE ABOUT 500 YEARS AGO.

stone-pointed spears. Bows and arrows were invented much later than stone-pointed spears.

Q. What was the next big

A. In the Bronze Age men used knives with bronze blades.

Bronze gave way to iron, and still later to steel. During the

Middle Ages in Europe men had knives in the form of daggers. Sometimes the knives

gers. Sometimes the knives were provided with decorated handles.

In the same way that we may speak of an arrow as a "little spear" we may describe the

sword as a "big knife." Some American Indians observed the white men carrying swords on

fell into the custom of calling the whites "big knives."
